Detailed Report of the Inspector of Insurance Ontario. Dept. of Insurance, 1907 *Land and People in Late Medieval England* Bruce M.S. Campbell, 2024-10-28 This is the third collection of articles by Bruce Campbell to appear in the Variorum series Late medieval England was an overwhelmingly rural society Never since has such a large proportion of the population lived in the countryside or relied so directly for its livelihood upon agriculture The lot of a majority of that population was always a hard one and never more so than during the first half of the 14th century when peasants competed with each other for ever scarcer land and work and a succession of major harvest failures jeopardised the survival of many Nevertheless experience varied considerably both during this era of mounting population pressure and the century and more of population decline and stagnation that followed the demographic disaster of the Black Death How well individual communities coped during these contrasting conditions of expansion and contraction owed much to the quality and composition of their natural resource endowment a good deal to their ability to take advantage of changing commercial opportunities and sometimes almost everything to how exposed they were to military conflict Always however much hinged upon how the twin feudal institutions of lordship and serfdom were mapped onto land and people via the manorial system These are the themes variously explored by the eight essays assembled in this volume which range from a case study of a single crowded Norfolk manor to a consideration of the broad and towards the end of the Middle Ages widening contrasts that persisted between North and South *Sessional Papers* Ontario. Department of Insurance, 1904 The Cambridge History of the Book in Britain: Volume 6, 1830-1914 David McKitterick, 2009-03-05 The years 1830 1914 witnessed a revolution in the

manufacture and use of books as great as that in the fifteenth century Using new technology in printing paper making and binding publishers worked with authors and illustrators to meet ever growing and more varied demands from a population seeking books at all price levels The essays by leading book historians in this volume show how books became cheap how publishers used the magazine and newspaper markets to extend their influence and how book ownership became universal for the first time The fullest account ever published of the nineteenth century revolution in printing publishing and bookselling this volume brings The Cambridge History of the Book in Britain up to a point when the world of books took on a recognisably modern form **The Agricultural Labourer ...** Great Britain.
