Norfolks Waters An Illustrated History Of Hampton Roads:

Norfolk's Waters William L. Tazewell, 1982 Hampton Roads Patrick Evans-Hylton, 2005 When Capt John Smith first landed his ships at Cape Henry in Virginia Beach he must have known the military importance of the jut of land today it is home to Fort Story and the location played a key role during World War II in making sure enemy ships and subs did not sail into the mouth of the Chesapeake Bay and onto Norfolk the world's largest naval base Smith established this country's first military base when he settled in Jamestown building a fort to protect the early colonists That simple military presence grew exponentially and during World War II was instrumental in not only defending the homeland but in winning the war From the Peninsula to Southside the Hampton Roads area is military proud There are more than a dozen forts and bases many of which sprung up during World War II or were greatly expanded during that time America's Wetland Roy T. Sawyer, 2010-05-05 The geologically ancient Tidewater region of southeastern Virginia and northeastern North Carolina rests precariously atop millions of years of erosion from the nearby Appalachian Mountains An immense wetland at near sea level it is host to every conceivable body of fresh water ranging from brooding swamps and large hidden lakes to sluggish blackwater rivers and brackish sounds one of which was so large an early explorer thought he had found the Pacific Ocean In this engaging book biologist and Tidewater native Roy T Sawyer delivers an ecohistory of this unique waterland whose wind driven tides cover a rich human and natural past Jutting prominently into the Atlantic this wetland is the final stop for the warmth of the Gulf Stream before it is deflected from the American mainland At the top of a narrow warm coastal strip it provides an ideal home for a vast array of animal and plant life including prodigious numbers of reptiles such as the world's northernmost population of alligators and overwintering waterfowl It is also home to the oldest known living trees east of the Rocky Mountains The climate and geography made the area a natural choice for very early human habitation as far back as the last ice age when the region was a rich oasis just south of a veritable tundra In examining the impact of humans upon this environment and vice versa Sawyer reveals how our alarming shortsightedness has produced a fragile and endangered present Although human manipulation started here as early as ten thousand years ago coinciding with extinction of mammoths and other megafauna the environment has been altered most radically over only the last one hundred years particularly in regard to land drainage deforestation overfishing and pollution The author provides an authoritative overview of the human impact on these wetlands and suggests ways in which we might still salvage them In so doing he explores the effects of hurricanes droughts forest fires and ice ages of the past and anticipates in this age of global warming natural events that may be still to come *Classic Restaurants of Coastal Virginia* Patrick Evans-Hylton, 2019-06-10 The history of dining in Virginia goes back to 1607 Dairy lunches and tearooms dominated the early twentieth century dining scene Local favorite Doumar's famous for inventing the ice cream cone became the rage at the 1907 Jamestown Exposition and palatial seaside resorts like the Cavalier attracted patrons to their luxurious dining rooms in the Roaring Twenties In the 1930s Bacalis Hot Dog Place invented the
