**The Pathology of the Human Placenta** KURT BENIRSCHKE, 2012-12-06 This presentation of the diseases of the placenta differs in many ways from the first such treatment in these volumes by the eminent Robert Meyer It is a deliberate attempt to bring together the practical information which has been gathered about the pathology of this complex organ and to make it available to the practicing pathologist as well as clinician Despite the ready availability of the placenta for study

the pathologist is often ill prepared to interpret lesions which he may find Moreover it has been difficult for him to find reference material published commonly in journals and books with which he is not familiar Further more the interpretation of lesions affecting the placenta seemed less challenging since the organ had served its function was to be discarded and presumably little of significance could be expected from such a retrospective study Recently with new emphasis on maternal and fetal health and disease it has become apparent that knowledge of pathologic changes in the placenta often provides a unique insight into antenatal events Thus there has been an abundance of publications in this field in recent years several in book form These and the most important older investigations on the morbid anatomy of the human placenta are here reviewed This book has been written with a special point of view however which reflects our own bias Edward Kaufmann: Pathology for Students and Practitioner's. initial publication of his *Anatomy Descriptive and Surgical* SINCE the publication of the first English edition of this work in 1858 and the first American edition in 1859 great advances in the subject of Anatomy have been made especially in microscopic anatomy and the anatomy of the embryo This knowledge was embodied from time to time in the successive editions until finally considerable portions of the text sometimes sections were devoted to these subjects However the main text has always remained primarily a descriptive anatomy of the human body In the present edition the special sections on embryology and histology have been distributed among the subjects under which they naturally belong New matter on physiological anatomy laws of bone architecture the mechanics and variations of muscles have been added occupying much of the space formerly devoted to the sections in applied anatomy

*Photographic Atlas of Practical Anatomy I* Walter Thiel, 2012-12-06 Walter Thiel's brilliant photographs are unique They revolutionize macroscopic anatomy because due to a new preservation technique developed by the author himself all tissues retain their living colour consistency and position For the first time anatomical sites show the real colour and form of human organs as well as their true positions Thiel's new technique his exceptional abilities as a photographer and the filigree dissections add up to vivid almost artistic illustrations of great depth and clarity Apart from the topographical anatomy of abdomen and lower extremities Part I illustrates the most important punctures of joints and some surgical approaches Thus this atlas is not only of interest to anatomists and pathologists but particularly to surgeons and orthopaedic surgeons

*Histories of Fetal Knowledge Production in Sweden*, 2024-10-07 In this timely and richly illustrated book a group of multidisciplinary scholars explores the uses and handlings of fetuses still born reproductive organs and pregnant bodies for knowledge production including the development of vaccines and pharmaceuticals in Sweden over five hundred years By examining the conflicted values and balancing acts of a variety of actors such as medical experts legal officials policymakers media professionals disability organizations and women's movements it demonstrates how the uses of aborted fetuses for research generated public controversy and became regulated by ethics and law in Sweden Contributors are Eva Hult Annika Berg Elisabet Björklund Maria Björkman Maja Bondestam Isa Dussauge Helena Franzén Solveig Jönlich Francis Lee Tove Paulsson Holmberg Morag Ramsey Anton Runesson Helena Tinnerholm Ljungberg and Anna Tunlid
