

The background of the book cover is a detailed illustration of a classical architectural interior. On the left, a large column with a fluted shaft and an ornate capital is visible. To the right of the column, a statue is draped in a heavy, flowing cloth, possibly representing a classical figure. The architecture includes a pediment and other classical elements, rendered in a style that suggests a historical or academic setting.

Golden,2003 Being Moved by Moving Words Joseph Bessler,2025-02-14 There are many fine philosophical and theological engagements with the works of John Caputo He is one of our most serious philosophical theologians But he s also hilariously funny To read Caputo is to encounter someone who wants to move you to grasp your attention your humor your creativity because what he s looking for is not another philosophical couch potato He s looking for someone who s open to being moved to put down the book even his book especially his book and risk reaching out to help another one who is other one at the margins of this culture He s interested in the kind of courage that there is far too little of and conventional religion he suggests has more than its share of the blame The more familiar one becomes with his work the more one wonders why Caputo in all his emphasis upon hermeneutics and responsiveness to the call of the other seemed not to see or perhaps want to claim the many rhetorical gifts in his possession the many rhetorical gifts at work in his writing Even as Caputo is a master of all things hermeneutical he claims ignorance on all things rhetorical viewing the word itself through an old lens of adding mere ornamentation what he calls rouge to beautify the basic claim Bringing the last forty years of work in rhetorical studies to bear on Caputo s texts the author has written this book in hopes of convincing Caputo and his many students that he made whether he sees it or not what can only be called the Rhetorical Turn in philosophy and theology **A Companion to Medieval English Literature and Culture, c.1350 -**

Rhetoric and Power Nathan Crick, 2014-10-28 An examination of how intellectuals and artists conceptualized rhetoric as a medium of power in a dynamic age of democracy and empire. In *Rhetoric and Power*, Nathan Crick dramatizes the history of rhetoric by explaining its origin and development in classical Greece, beginning the oral displays of Homeric eloquence in a time of kings, following its ascent to power during the age of Pericles and the Sophists, and ending with its transformation into a rational discipline with Aristotle in a time of literacy and empire. Crick advances the thesis that rhetoric is primarily a medium and artistry of power, but that the relationship between rhetoric and power at any point in time is a product of historical conditions, not the least of which is the development and availability of communication media. Investigating major works by Homer, Heraclitus, Aeschylus, Protagoras, Gorgias, Thucydides, Aristophanes, Plato, Isocrates, and Aristotle, *Rhetoric and Power* tells the story of the rise and fall of classical Greece while simultaneously developing rhetorical theory from the close criticism of particular texts. As a form of rhetorical criticism, this volume offers challenging new readings to canonical works such as Aeschylus's *Persians*, Gorgias's *Helen*, Aristophanes's *Birds*, and Isocrates's *Nicocles* by reading them as reflections of the political culture of their time. Through this theoretical inquiry, Crick uses these criticisms to articulate and define a plurality of rhetorical genres and concepts such as heroic eloquence, tragicomedy, representative publicity, ideology, and the public sphere, and their relationships to different structures and ethics of power such as monarchy, democracy, aristocracy, and empire. *Rhetoric and Power* thus provides a foundation for rhetorical history, criticism, and theory that draws on contemporary research to prove again the incredible richness of the classical tradition for contemporary rhetorical scholarship and practice.

The Politics of Dependence Patrick J. L. Cockburn, 2018-05-08 The central claim of this book is that the dichotomy between economic dependence and economic independence is completely inadequate for describing the political challenges faced by contemporary capitalist welfare states. The simplistic contrast between markets and states as sources of income renders invisible the relations of dependence established in our basic economic institutions such as the family, property, and money. This book is a work of political theory that attacks narrow conceptions of dependence and identifies distinct senses of dependence that might allow political

communities to make clearer decisions about the justice of our economic institutions and practices Inheritance for example is as much a form of dependence as support by a welfare state but these are never compared in debates about economic justice This book begins the work of comparing forms of economic dependence and argues that economic dependence is always an issue of both vulnerability and parasitism It builds bridges between political theory and social science and is of relevance to those concerned with social and economic justice in and beyond contemporary capitalist welfare states **Community**

Over Chaos James A. Mackin, 2014-12-20 As James A Mackin Jr shows both modernism and postmodernism have undermined the traditional foundations for ethics Using an ecological model however Community over Chaos develops a common ground for ethical judgments about communication thus countering the current theoretical climate of pessimistic cynicism toward the very possibility of ethics **American Eloquence** Roderick P. Hart, 2023-01-24 What makes political speech powerful How does eloquent rhetoric transcend ordinary language Which stylistic choices allow effective orators to stir emotions and spur action And in the age of Donald Trump does political eloquence still matter This book examines a wide swath of political discourse to shed new light on the meaning and significance of eloquence Roderick P Hart a leading scholar of political communication develops new ways of measuring persuasiveness and rhetorical power through the use of computer based methods He examines one hundred of the most important speeches of the twentieth century given by presidents and politicians as well as leaders activists and cultural figures including Martin Luther King Jr Lou Gehrig Mario Savio Carrie Chapman Catt and Stokely Carmichael Deploying the tools of the digital humanities as well as critical rhetorical analysis Hart considers what distinguishes the linguistic properties of iconic oratory from those of more mundane texts He argues that eloquence represents the confluence of cultural resonance personal investment and poetic imagination providing empirical metrics for assessing each of these qualities A quantitative and qualitative exploration of American political speech this interdisciplinary book offers a powerful argument for why eloquence is essential for a functioning democracy
