**F-86 Sabre vs MiG-15** Douglas C. Dildy, Warren Thompson, 2013-05-20 As the routed North Korean People s Army NKPA withdrew into the mountainous reaches of their country and the People s Republic of China PRC funneled in its massive infantry

formations in preparation for a momentous counter offensive both lacked adequate air power to challenge US and UN. Reluctantly Josef Stalin agreed to provide the requisite air cover introducing the superior swept wing MiG 15 to counter the American's straight wing F 80 jets. This in turn prompted the USAF to deploy its very best the F 86A Sabre to counter this threat. Thus began a two and a half year struggle in the skies known as MiG Alley. In this period the unrelenting campaign for aerial superiority witnessed the introduction of successive models of these two revolutionary jets into combat. This meticulously researched study not only provides technical descriptions of the two types and their improved variants complete with a fighter pilot's assessment of these aircraft but also chronicles the entire scope of their aerial duel in MiG Alley by employing the recollections of the surviving combatants including Russian, Chinese and North Korean pilots who participated.

The book explores how technological advancements, strategic adaptations and human factors have shaped air combat across major historical eras. Readers gain insights into the core principles of air power, examining the rapid development of aircraft design, weaponry and electronic warfare. For example, early pilots relied on improvised tactics while modern pilots face the complexities of drone warfare and cyberwarfare.
