Nutritional Care Of The Older Adult:

Nutrition Care of the Older Adult: a Handbook for Dietetics Professionals Working Throughout the Continuum of Care

Kathleen C. Niedert, Becky Dorner, 2004 Completely revised with new chapters and sections covering everything the health care provider needs to know when working with the older adult either at home or in nursing and long term care facilities

Chapters cover factors affecting nutrition nutrition and disease nutritional assessment dining challenges and regulatory compliance This scientifically sound and practical resource for new and experienced nutrition professionals includes new forms resources the food guide pyramid for older adults and an index of tales Nutritional Care of the Older Adult Annette

B. Natow, Jo-Ann Heslin, Allen Natow, 1986 Nutrition for the Older Adult Melissa Bernstein, Ann Luggen, 2010 Nutrition for the Older Adult is a clear comprehensive text that introduces students to nutrition and health promotion for older adults

Covering such important topics as the physiological changes of aging weight and nutrition problems in older adults nutritional assessment and support for the elderly and diet and cultural diversity as well as exercise prescriptions for older adults this text is an essential resource for students in the fields of nutrition nursing and gerontology Interdisciplinary

Nutritional Management and Care for Older Adults Ólöf G. Geirsdóttir, Jack J. Bell, 2021-09-10 This open access book aims to primarily support nurses as leaders and champions of multimodal Interdisciplinary nutrition care for older adults A

structured approach to fundamentals of nutrition care across Interdisciplinary settings is combined with additional short chapters about special topics in geriatric nutrition The book is designed to provide highly accessible information on evidence based management and care for older adults with a focus on practical guidance and advice across acute rehabilitation and

primary and secondary malnutrition prevention settings The cost of malnutrition in England alone has been estimated to be 19 6 billion per year or more than 15% of the total public expenditure on health and social care 65 years The importance and

benefit of specialised nutrition care delivered by experts in field is well established for those with complex nutrition care needs However despite the substantial adverse impact of malnutrition on patient and healthcare outcomes specialised

management of this condition is often under resourced overlooked and under prioritised by both older adults and their treating teams As an alternative timely efficient and effective supportive nutrition care opportunities may be appropriately

implemented by nurses and non specialist Interdisciplinary healthcare team members working together with nutrition specialists and the older adults they care for Practical low risk opportunities should be considered across nutrition screening

assessment intervention and monitoring domains for many patients with or at risk of malnutrition Whilst a variety of team members may contribute to supportive nutrition care the nursing profession provide a clear focal point Nurses across diverse

settings provide the backbone for Interdisciplinary teamwork and essential patient care The nursing profession should consequently be considered best placed to administer Interdisciplinary multimodal nutrition care wherever specialist

nutrition care referrals are unlikely to add value or are simply not available As such the book is a valuable resource for all

healthcare providers dedicated to working with older patients to improve nutrition care
