Susan Ward, 2021-03 Since meeting Susan Ward I have been consistently impressed by her in depth knowledge of women s health issues her desire and commitment to helping the next generation of doctors develop their knowledge and skills and by her respectful compassionate and collaborative approach to caring for women I am delighted that she has captured some of her expertise in this book Susan draws not only on her extensive knowledge of women s health her years of experience within specialist education and as a Head of School her decade of working with RCOG exams but also her understanding of what women need in their relationship with their healthcare professionals For those who are interested in developing skills and making a difference in women s health this book will prove to be invaluable Women s health issues are brought to General Practitioners attention daily and they play a vital role in the health journeys of girls and women during their whole life course Many women will in all probability have spent time selfmanaging symptoms juggling their other responsibilities pondering if their concerns are really worth medical attention whilst searching varying sites online for information before visiting their GP Because of the sensitive nature of many women s health issues and the fact many women can feel embarrassed to discuss these it is essential that women have a relationship of trust with their GP Knowing that your GP has both knowledge and

skills in women s health is essential in building this relationship of trust **Questions and Answers for the DRCOG**
