President Masaryk Tells His Story:

President Masaryk Tells His Story Tomáš Garrigue Masaryk, Karel Čapek, 1934 *President Masaryk Tells His Story* Tomáš Garrigue Masaryk, Karel Čapek, 1934 *President Masaryk Tells His Story* Karel Čapek, 2014-04-15 This account of President Masaryk's life was taken from his own lips and set down in his own words by Karel Čapek. The chapters were not told consecutively as they are given here; they have been built up from material gathered by Čapek during several years of intercourse with the President. For weeks at a time Čapek stayed with President Masaryk and his family in their charming country house at Topolčanky in Slovakia and in the course of talks on summer days in the fields beside a bonfire in the evenings on quiet afternoons in the rose covered summer house or on picnics which the whole family joined he learned the facts, events and theories which he has woven into this book. This early work by Karel Čapek was originally published in 1924 and we are now republishing it with a brand new introductory biography **Hovory s T.G. Masarykem** Karel Čapek, 1951

President Masaryk Tells His Story T. G. Masaryk, 1934 *President Masaryk Tells His Story. Recounted by Karel Čapek. Translated from the Czech. Karel Čapek Ivan Klíma, 2002 And although originally written in Czech the book was commissioned by Catbird Press and was therefore written with foreign readers in mind in other words no prior knowledge of Čapek's writings or his milieu is required. **BOOK JACKET** *Toward the Radical Center* Karel Čapek, 1990 Čapek's best plays, stories and columns take us from the social contributions of clumsy people to dramatic meditations on mortality and commitment. The Reader includes a new and at last complete English translation of *R U R*, the play that introduced the literary robot *Iris Runge* Renate Tobies, 2012-01-05 This book concerns the origins of mathematical problem solving at the internationally active Osram and Telefunken Corporations during the golden years of broadcasting and electron tube research. The woman scientist Iris Runge, who received an interdisciplinary education at the University of Göttingen, was long employed as the sole mathematical authority at these companies in Berlin. It will be shown how mathematical connections were made between statistics and quality control and between physical chemical models and the actual problems of mass production. The organization of industrial laboratories, the relationship between theoretical and experimental work and the role of mathematicians in these settings will also be explained. By investigating the social, economic and political conditions that unfolded from the time of the German Empire until the end of the Second World War, the book hopes to build a bridge between specialized fields: mathematics and engineering and the general culture of a particular era. It hopes furthermore to build a bridge between the history of science and industry on the one hand and the fields of Gender and Women's Studies on the other. Finally, by examining the life and work of numerous industrial researchers, insight will be offered into the conditions that enabled a woman to achieve a prominent professional position during a time when women were typically excluded from the scientific

workforce Battle for the Castle Andrea Orzoff, 2009-07-21 After World War I diplomats and leaders at the Paris Peace Talks redrew the map of Europe carving up ancient empires and transforming Europe's eastern half into new nation states. Drawing heavily on the past the leaders of these young countries crafted national mythologies and deployed them at home and abroad. Domestically myths were a tool for legitimating the new state with fractious electorates. In Great Power capitals they were used to curry favor and to compete with the mythologies and propaganda of other insecure postwar states. The new postwar state of Czechoslovakia forged a reputation as Europe's democratic outpost in the East an island of enlightened tolerance amid an increasingly fascist Central and Eastern Europe. In *Battle for the Castle* Andrea Orzoff traces the myth of Czechoslovakia as an ideal democracy. The architects of the myth were two academics who had fled Austria-Hungary in the Great War's early years: Tomáš Garrigue Masaryk who became Czechoslovakia's first president and Edvard Beneš its longtime foreign minister and later president. Propagated the idea of the Czechs as a tolerant prosperous and cosmopolitan people devoted to European ideals and Czechoslovakia as a Western ally capable of containing both German aggression and Bolshevik radicalism. Deeply distrustful of Czech political parties and Parliamentary leaders Beneš and Masaryk created an informal political organization known as the Hrad or Castle. This powerful coalition of intellectuals journalists businessmen religious leaders and Great War veterans struggled with Parliamentary leaders to set the country's political agenda and advance the myth. Abroad the Castle wielded the national myth to claim the attention and defense of the West against its increasingly hungry neighbors. When Hitler occupied the country the mythic Czechoslovakia gained power as its leaders went into wartime exile. Once Czechoslovakia regained its independence after 1945 the Castle myth reappeared. After the Communist coup of 1948 many Castle politicians went into exile in America where they wrote the Castle myth of an idealized Czechoslovakia into academic and political discourse. *Battle for the Castle* demonstrates how this founding myth became enshrined in Czechoslovak and European history. It powerfully articulates the centrality of propaganda and the mass media to interwar European cultural diplomacy and politics and the tense combative atmosphere of European international relations from the beginning of the First World War well past the end of the Second.

The Schism of '68 Alana Harris,2018-03-02 This volume explores the critical reactions and dissenting activism generated in the summer of 1968 when Pope Paul VI promulgated his much anticipated and hugely divisive encyclical *Humanae Vitae* which banned the use of artificial contraception by Catholics Through comparative case studies of fourteen different European countries it offers a wealth of new data about the lived religious beliefs and practices of ordinary people as well as theologians interrogating traditional teachings in areas relating to love marriage family life gender roles and marital intimacy Key themes include the role of medical experts the media the strategies of progressive Catholic clergy and laity and the critical part played by hugely differing Church State relations In demonstrating the Catholic Church s important and overlooked contribution to the refashioning of the sexual landscape of post war Europe it makes a critical intervention into a growing historiography exploring the 1960s and offers a close interrogation of one strand of religious change in this tumultuous decade
