Prevention Of Neural Tube Defects:

Prevention of Spina Bifida and Other Neural Tube Defects John Dobbing, 1983 Tube defect prevention in high incidence areas and epidemiological evidence concerning the cause of neural tube defects Two additional topics appended to the text discuss a regional study of maternal diet and nutrition during early pregnancy and following delivery and the economic aspects associated with neural tube defect prevention Tabular and graphical presentations of data and literature citations are provided throughout the text *Neural Tube Defects* Kannan Lakshmi Narasimhan, 2012-03-16 The book *Neural Tube Defects* Role of Folate Prevention Strategies and Genetics has several eminent international authors and the book is a resource for anybody who is interested in this very important subject The authors are distinguished and the chapters are a product of their extensive research **The Prevention of Neural Tube Defects with Folic Acid**, 1978 Folic Acid Supplementation for the Prevention of Neural Tube Defects Tracy A. Wolff, Catherine Takacs Witkop, Therese Miller, Shamsuzzoha B. Syed, U.S. Preventive Services Task Force, 2009 BACKGROUND Neural tube defects (NTDs) are among the most common birth defects in the United States PURPOSE To update the evidence on folic acid supplementation in women of childbearing age for the prevention of neural tube defects in their offspring DATA SOURCES MEDLINE and Cochrane Library searches from January 1995 through November 2007 recent systematic reviews reference lists of retrieved articles and expert suggestions STUDY SELECTION English language studies were selected to answer the following two questions Does folic acid supplementation in women of childbearing age reduce the risk of a pregnancy affected by a neural tube defect Does folic acid supplementation in women of childbearing age increase the risk of any harmful outcomes for either the woman or the infant The following study types were selected for potential benefits of folic acid randomized controlled trials RCTs case control studies cohort studies systematic reviews and meta analyses for potential harms of folic acid RCTs case control studies systematic reviews meta analyses and large observational studies DATA EXTRACTION All studies were reviewed abstracted and rated for quality using predefined U S Preventive Services Task Force criteria DATA SYNTHESIS Four observational studies reported benefit in reduction of risk of NTD associated with folic acid containing supplements Differences in study type and methods prevent the calculation of a summary of the reduction in risk The one included study on harms reported that the association of twinning with folic acid intake disappeared after adjusting for in vitro fertilization and for underreporting of folic acid intake LIMITATIONS There is limited evidence on dose We found no evidence on the potential harm of masking vitamin B12 deficiency in women of childbearing age Our search focused on NTDs and therefore does not provide a comprehensive review of the effects of folic acid on all possible outcomes CONCLUSIONS New observational evidence supports previous RCT evidence that folic acid containing supplements reduce the risk of NTD affected pregnancies The association of folic acid use with twin gestation may be confounded by fertility interventions including ovulation stimulation and in vitro fertilization **Neural Tube Defects** Alberich Klein, 2013 *Neural Tube Defects*

NTDs are congenital malformations of the central nervous system caused by partial or complete failure of the neural tube to close within 28 days of conception They represent the second most frequent cause of congenital abnormality In this book the authors discuss the prevalence pathogenesis and prevention of neural tube defects Topics include preconception folic acid as a primary prevention tool for NTD and its risk assessment understanding and preventing folic acid resistant neural tube defects knowledge of the cellular mechanisms responsible for normal neural tube formation in comprehending and preventing NTDs developmental delay in interneuron motor neuron sensory tract and synapse formation in chick spina bifida and an examination of whether neural tube defects lead to structural alterations in the urinary and genital organs in human foetuses
