Sloan,2015-05-07 While the earliest character representations in video games were rudimentary in terms of their presentation and performance the virtual characters that appear in games today can be extremely complex and lifelike These are characters that have the potential to make a powerful and emotional connection with gamers As virtual characters become more Cognitive and Affective Perspectives on Immersive Technology in Education Zheng, Robert Z.,2020-05-22

Immersive technology as an umbrella concept consists of multiple emerging technologies including augmented reality AR virtual reality VR gaming simulation and 3D printing Research has shown immersive technology provides unique learning opportunities for experiential learning multiple perspectives and knowledge transfer Due to its role in influencing learners cognitive and affective processes it is shown to have great potential in changing the educational landscape in the decades to come However there is a lack of general cognitive and affective theoretical framework to guide the diverse aspects of immersive technology research In fact lacking the cognitive and affective theoretical framework has begun to hamper the design and application of immersive technology in schools and related professional training Cognitive and Affective Perspectives on Immersive Technology in Education is an essential research book that explores methods and implications for the design and implementation of upcoming immersive technologies in pedagogical and professional development settings The book includes case studies that highlight the cognitive and affective processes in immersive technology as well as the successful applications of immersive technology in education Featuring a wide range of topics such as curriculum design K 12 education and mobile learning this book is ideal for academicians educators policymakers curriculum developers instructional designers administrators researchers and students Interactive Media: The Semiotics of Embodied

Interaction Shaleph O'Neill,2008-09-18 The author discusses the existing theoretical approaches of semiotically informed research in HCI what is useful and the limitations He proposes a radical rethink to this approach through a re evaluation of important semiotic concepts and applied semiotic methods Using a semiotic model of interaction he explores this concept through several studies that help to develop his argument He concludes that this semiotics of interaction is more appropriate

than other versions because it focuses on the characteristics of interactive media as they are experienced and the way in which users make sense of them rather than thinking about interface design or usability issues
