by emphasizing informal learning and personal vision and the roles that can be played by planners Mintzberg proposes new and unusual definitions of planning and strategy and examines in novel and insightful ways the various models of strategic planning and the evidence of why they failed Reviewing the so called pitfalls of planning he shows how the process itself can destroy commitment narrow a company's vision discourage change and breed an atmosphere of politics In a harsh critique of many sacred cows he describes three basic fallacies of the process that discontinuities can be predicted that strategists can be detached from the operations of the organization and that the process of strategy making itself can be formalized Mintzberg devotes a substantial section to the new role for planning plans and planners not inside the strategy making process but in support of it providing some of its inputs and sometimes programming its outputs as well as encouraging strategic thinking in general This book is required reading for anyone in an organization who is influenced by the planning or the strategy making processes **Papers on Business Strategy and Antitrust** Richard Craswell, Edward Morrison, 1980
