Corporate Strategic Business Sourcing Kevin Maromonte, 1998-02-18 Is your company saving money by using outside suppliers Is outsourcing reliable As a result is your company gaining a competitive edge Or would the company do better by keeping some of the efforts in house And how is the performance of outside suppliers and in house functions measured to facilitate effective sourcing decisions These are questions the author a specialist in corporate performance improvement tackles in this book The answers are surprising and the guidance presented will have far reaching benefits for organizations He maintains that companies expectations from outsourcing are not being met because there is not a methodical approach to measuring and evaluating the performance of sources By fully assessing the performance of available sources the best can be selected and the company can benefit long term Succinctly and comprehensively Maromonte guides companies step by step through his proprietary techniques for

sourcing performance assessment and decision making His book will be an important useful resource for senior management and executives operations managers finance purchasing and quality professional and anyone with responsibility for bottom line results To improve competitiveness in the global marketplace companies are reducing costs through outsourcing the purchase of goods and services from suppliers In many cases outsourcing is less expensive for companies than producing these goods and services internally Companies however do not always achieve their ultimate goal of competing more effectively This is because decisions to outsource are primarily based on the promise of lower direct costs without considering other source performance criteria that also impact costs and ultimately competitiveness Corporate Strategic Business Sourcing guides management in selecting the best sources those that will raise performance to world class levels and improve competitiveness To improve sourcing decisions the concept of the Strategic Business Unit or SBU is applied to each source being considered to provide the company with goods and services Following the SBU approach similar product and service lines are grouped together in the corporation As a result quality levels delivery performance customer service and product advancements as well as costs are more easily measured and improved Just as the focus on these five criteria leads to improved SBU performance the same approach can be applied to enhance the performance of the individual sources of goods and services This is accomplished by similarly quantifying and improving the quality delivery cost customer service and product advancement performance of the companies sources whether outside suppliers or in house functions
