*Quantitative Sociology* H. M. Blalock, 1971      *Quantitative Sociology*, 1975      **Sustainable Industrialization in Africa** Banji Oyelaran-Oyeyinka, Padmashree Gehl Sampath, 2016-04-29 Sustainable Industrialization in Africa explores the issues that confront development policy in the context of the MDGs and the post 2015 development agenda from an African perspective The book argues that development is an ultimate outcome of sustainable equitable industrialization and that any development agenda for the future has to ensure that industrialization is fostered in a way that makes economies independent and responsive to the needs of all citizens Future challenges for sustainable industrialization in Africa based upon the differences in its current industrialization trajectories are discussed to ensure that industrial growth results in positive economic and social outcomes in the context of the post 2015 development agenda      **Strategic Purchasing and Supply Management** Roger Moser, 2007-12-11 Roger Moser analyses the relationships between business priorities and PSM strategy and shows in detail how business strategies influence PSM He develops a PSM strategy concept which enables supply managers to break down strategic priorities from a business strategy level to a PSM level and to define appropriate actions when dealing with suppliers supply markets and internal customers      **Nursing Theorists and Their Work** Martha Raile Alligood, PhD, RN, ANEF, 2013-09-24 The most comprehensive of its kind Nursing Theorists and Their Work 8th Edition provides an in depth look at 39 theorists of historical international and significant importance Each chapter features a clear consistent presentation of a key nursing philosophy or theory Case studies critical thinking activities and in depth objective critiques of nursing theories help bridge the gap between theory and application Critical Thinking Activities at the end of each theorist chapter help you to process the theory presented and apply it to personal and hypothetical practice situations A case study at the end of each theorist chapter puts the theory into a larger perspective demonstrating how it can be applied to practice A Brief Summary in each theorist chapter helps you review for tests and confirm your comprehension A Major Concepts Definitions box included in each theorist chapter outlines the theory's most significant ideas and clarifies content specific vocabulary Each theorist chapter is written by a scholar specializing in that particular theorist's work often having worked closely with the theorists to provide the most accurate and complete information possible Beginning chapters provide a strong foundation on the history and philosophy of science logical reasoning and the theory development process Diagrams for theories help you visualize and better understand inherently abstract concepts Pictures of theorists as well as a listing of contact information for each individual enables you to contact the source of information directly Theorist chapters have been reviewed and edited by the theorist validating the accounts set forth in the text for currency and accuracy An extensive bibliography at the conclusion of each theorist chapter outlines numerous primary and secondary sources of information ideal for both undergraduate and graduate research projects NEW Quotes from the theorist make each complex theory more memorable NEW Chapter on Afaf Meleis profiles a theorist who has shaped theoretical development in nursing and explores

her transition theory NEW Need to Know Information is highlighted to streamline long complex passages and help you review key concepts NEW Points for Further Study at the end of each chapter direct you to assets available for additional information

*Rational Techniques in Policy Analysis* Michael Carley, 2013-10-22 Rational Techniques in Policy Analysis covers the role of rational techniques in policy making process This book is organized into two parts encompassing 12 chapters that consider the relationship of policy making and other approaches to rational analysis Part I deals with the disintegration of rational policy analysis to find out what the pieces are how they work how the parts interact and how they relate to the wider policy making environment Part II considers the types of rational analysis in more detail and serves not only as a survey of rational techniques but as an introduction to the important literature in each field This part specifically looks into the cost utility techniques social forecasting and evaluation and social indicator research This book is intended primarily for analysts researchers and students of the policy making process in university and government

*Social Choice and Welfare* P.K. Pattanaik, M. Salles, 2016-04-20 This volume comprises papers presented at the Symposium on Collective Choice by leading experts in this field It presents recent advances in Social Choice Theory and Welfare Economics The papers are classified in two broad groups 1 those dealing with the ethical aspects of the theory of social choice and 2 those concerned with the positive aspects The papers in the first part are concerned with the Arrow type aggregation problem or aspects of it and with more specific questions relating to optimality justice and welfare In part II several papers discuss the problem of strategic misrevelation of preferences by individuals others discuss simple voting games social choice correspondences and electoral competition The main features are Recent advances in social choice theory and welfare economics New mathematical approaches to social choice theory differential and algebraic topology New aspects of the concepts of justice and optimality in welfare economics and social choice

**Statistical Signal Processing of Complex-Valued Data** Peter J. Schreier, Louis L. Scharf, 2010-02-04 Complex valued random signals are embedded in the very fabric of science and engineering yet the usual assumptions made about their statistical behavior are often a poor representation of the underlying physics This book deals with improper and noncircular complex signals which do not conform to classical assumptions and it demonstrates how correct treatment of these signals can have significant payoffs The book begins with detailed coverage of the fundamental theory and presents a variety of tools and algorithms for dealing with improper and noncircular signals It provides a comprehensive account of the main applications covering detection estimation and signal analysis of stationary nonstationary and cyclostationary processes Providing a systematic development from the origin of complex signals to their probabilistic description makes the theory accessible to newcomers This book is ideal for graduate students and researchers working with complex data in a range of research areas from communications to oceanography

*Managerial Discretion and Performance in China* Hagen Wülferth, 2013-04-17 The theoretical and empirical literature to date has fallen short of reaching a consensus as to whether granting more managerial discretion to

managers tends to enhance not alter or diminish organizational performance the discretion puzzle This book aims to build a bridge between these contradictory results by synthesising principal agent theory stewardship theory and managerial discretion theory into a new empirically validated model Using a representative sample of double blind interviews with managers of 467 firms in China and applying partial least squares path modelling PLS the study identifies a potential cause of the discretion puzzle the failure of the extant literature to account for granularity in the way that managers use their discretion This generates far reaching implications for theoretical and empirical research as well as practical

recommendations for managing managers in multinationals and Chinese companies      **Family Transitions** Philip A. Cowan,E. Mavis Hetherington,2013-03-07 This volume the result of the second annual Summer Institute sponsored by the Family Research Consortium focuses on family transitions both normative and non normative The subject of family transitions has been a central concern of the consortium largely because studies of families in motion help to highlight mechanisms leading to adaptation and dysfunction This text represents a collective effort to understand the techniques individuals and families employ to adapt to the pressing issues they encounter along their life course      Statistics Thomas Hill,Pawel Lewicki,Paweł Lewicki,2006 This one of a kind book offers a comprehensive almost encyclopedic presentation of statistical methods and analytic approaches used in science industry business and data mining written from the perspective of the real life practitioner consumer of these methods      **Data Mining Methods and Applications** Kenneth D.

Lawrence,Stephan Kudyba,Ronald K. Klimberg,2007-12-22 With today s information explosion many organizations are now able to access a wealth of valuable data Unfortunately most of these organizations find they are ill equipped to organize this information let alone put it to work for them Gain a Competitive Advantage Employ data mining in research and forecasting Build models with data management      Rural Education Research in the United States Gwen C. Nugent,Gina M. Kunz,Susan M. Sheridan,Todd A. Glover,Lisa L. Knoche,2016-10-12 This volume represents current and futuristic thinking of seminal rural education researchers with the goal of providing perspectives and directions to inform the work of rural education research practice and policy With an emphasis on leveraging collaboration among key rural education stakeholders this title both outlines our current research knowledge base and maps a future research agenda for maximizing the educational experiences and achievement of rural K 12 students and their families and educators in the United States In examining the interrelated impacts of teacher practices family engagement school community environment and contextual factors the book offers the evidence based insights of seminal researchers on issues ranging from professional development and family school partnership approaches to methodological considerations It also explores the needs opportunities and realities associated with translating research to the arenas of practice and policy while considering how the latter can inform future scholarship

Multilinear Subspace Learning Haiping Lu,Konstantinos N. Plataniotis,Anastasios Venetsanopoulos,2013-12-11 Due to advances in sensor storage and networking technologies data is being generated on a daily basis at an ever increasing pace

in a wide range of applications including cloud computing mobile Internet and medical imaging This large multidimensional data requires more efficient dimensionality reduction schemes than the traditional technique

**Advanced Intelligent Computing Theories and Applications** De-Shuang Huang,Donald C. Wunsch,Daniel S. Levine,Kang-Hyun Jo,2008-09-08 The International Conference on Intelligent Computing ICIC was formed to provide an annual forum dedicated to the emerging and challenging topics in artificial intelligence machine learning bioinformatics and computational biology etc It aims to bring together researchers and practitioners from both academia and industry to share ideas problems and solutions related to the multifaceted aspects of intelligent computing ICIC 2008 held in Shanghai China September 15-18 2008 constituted the 4th International Conference on Intelligent Computing It built upon the success of ICIC 2007 ICIC 2006 and ICIC 2005 held in Qingdao Kunming and Hefei China 2007 2006 and 2005 respectively This year the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications Therefore the theme for this conference was Emerging Intelligent Computing Technology and Applications Papers focusing on this theme were solicited addressing theories methodologies and applications in science and technology

*Caring for Children* Jeffrey Lande,Sandra Scarr,Nina Guzenhauser,2014-02-25 Childcare is one of the most debated issues today This volume provides a comprehensive and current review of childcare research and public policy issues Chapters are contributed by leaders from such fields as developmental research and early childhood education as well as by public policy officials All major discussions and debates are summarized to promote a complete overview and speak to key issues of the day including affordability availability and staffing

Introduction to Structural Equation Modeling Using IBM SPSS Statistics and EQS Niels J. Blunch,2015-10-15 This student orientated guide to structural equation modeling promotes theoretical understanding and inspires students with the confidence to successfully apply SEM Assuming no previous experience and a minimum of mathematical knowledge this is an invaluable companion for students taking introductory SEM courses in any discipline Niels Blunch shines a light on each step of the structural equation modeling process providing a detailed introduction to SPSS and EQS with a focus on EQS excellent graphical interface He also sets out best practice for

data entry and programming and uses real life data to show how SEM is applied in research The book includes Learning objectives key concepts and questions for further discussion in each chapter Helpful diagrams and screenshots to expand on concepts covered in the texts A wide variety of examples from multiple disciplines and real world contexts Exercises for each chapter on an accompanying A detailed glossary Clear engaging and built around key software this is an ideal introduction for anyone new to SEM

**A Primer on Partial Least Squares Structural Equation Modeling (PLS-SEM)** Joseph F. Hair, Jr., G. Tomas M. Hult, Christian Ringle, Marko Sarstedt, 2016-02-29 A Primer on Partial Least Squares Structural Equation Modeling PLS SEM by Joseph F Hair Jr G Tomas M Hult Christian Ringle and Marko Sarstedt is a practical guide that provides concise instructions on how to use partial least squares structural equation modeling PLS SEM an evolving statistical technique to conduct research and obtain solutions Featuring the latest research new examples using the SmartPLS software and expanded discussions throughout the Second Edition is designed to be easily understood by those with limited statistical and mathematical training who want to pursue research opportunities in new ways

**Applications of Mathematics in Models, Artificial Neural Networks and Arts** Vittorio Capecchi, Massimo Buscema, Pierluigi Contucci, Bruno D'Amore, 2010-08-03 The book shows a very original organization addressing in a non traditional way but with a systematic approach to who has an interest in using mathematics in the social sciences The book is divided in four parts a a historical part written by Vittorio Capecchi which helps us understand the changes in the relationship between mathematics and sociology by analyzing the mathematical models of Paul F Lazarsfeld the model of simulation and artificial societies models of artificial neural network and considering all the changes in scientific paradigms considered b a part coordinated by Pier Luigi Contucci on mathematical models that consider the relationship between the mathematical models that come from physics and linguistics to arrive at the study of society and those which are born within sociology and economics c a part coordinated by Massimo Buscema analyzing models of artificial neural networks d a part coordinated by Bruno D Amore which considers the relationship between mathematics and art The title of the book Mathematics and Society was chosen because the mathematical applications exposed in the book allow you to address two major issues a the general theme of technological innovation and quality of life among the essays are on display mathematical applications to the problems of combating pollution and crime applications to mathematical problems of immigration mathematical applications to the problems of medical diagnosis etc b the general theme of technical innovation and creativity for example the art and mathematics section which connects to the theme of creative cities The book is very original because it is not addressed only to those who are passionate about mathematical applications in social science but also to those who in different societies are a involved in technological innovation to improve the quality of life b involved in the wider distribution of technological innovation in different areas of creativity as in the project Creative Cities Network of UNESCO
