Most of our young people have far more facility with computer and telecommunications technology than our teaching corps and generally that gap only widens as students travel from elementary school all the way to university and beyond. It's a brave new and often dangerous world that today's youth must learn to navigate. Now more than ever they need educators to step up and teach them how to be critical thinkers able to discriminate between the true and the merely seductive to see beyond the glossy veneer on harmful websites, harmful ideas and sadly harmful people in both the real and cyber worlds. We need to spend a little less time teaching students how to take standardized tests and a lot more time developing their critical faculties so they will be able to solve life's problems profit from challenging situations and understand the increasingly complex world they must ken at an earlier and earlier age. There are 38 TiPs which include activities with handouts and information pages. These are designed for individual and/or groups of staff to use for reflection and development of action plans to promote student motivation to learn. *Digital Learning based Education* Amitava Choudhury, Arindam Biswas, Sadhan Chakraborti, 2023-01-30 This book presents the systematic evolution of digitized education, trends, advances, challenges encountered and their solutions toward the use of advanced technologies.
