All chapters are thoroughly updated to reflect new medical findings as a side effect of radiotherapy and the factors affecting them from many research centers and up to date references. Supportive Care of Children with Cancer Children's Oncology Group, 2004-04-05 Three of every four children and adolescents with cancer can now be cured. However, physicians are using increasingly intensive treatment regimens. These treatments can expose patients to toxic chemotherapeutic agents, invasive surgical procedures and radiation oncology interventions that risk disfigurement, neuropsychiatric damage and life threatening organ toxicity. These potentially dire consequences have mandated that advances in cancer treatment go hand in hand with supportive care measures that sustain patients through their therapeutic ordeal and allow each patient to achieve maximum quality of life. In this book, now in its third edition, the discipline of supportive care in pediatric oncology is covered in depth. Supportive Care of Children with Cancer is a ready reference.
