

The book cover features a dramatic sunset or sunrise over a body of water. The sky is filled with vibrant orange and red clouds. In the lower center, a small white lighthouse with a dark roof stands on a dark, silhouetted island. A large, white, stylized graphic, resembling a large 'C' or a compass needle, curves from the bottom left towards the top right, passing behind the title text.

Radical Christian Communities:

Radical Christian Communities Thomas P. Rausch, 2002-09-27 Throughout the centuries certain Christians chose to live out the challenges of the Gospel in communities that withdrew from the common and conventional in the world This book studies this phenomenon and focuses on a number of contemporary Christian communities lay and religious who respond to the Gospel call to discipleship in a radical way whether by being communities of peace and reconciliation of social ministry and solidarity with the poor of service to the Church or of prayer and contemplation *Radical Religious Communities*, 2025-06-30 The twenty first century has demonstrated that radicalism remains a vital analytical concept in the study of modern religion and politics However its application to earlier periods has been met with more ambivalence This volume challenges that trend by examining religious political subversives near the close of the Middle Ages as radical within their historical and intellectual contexts spanning several centuries and cultures with a focus on Central Europe In doing so it seeks to bridge entrenched geographical chronological and methodological divides fostering broader discussions on the comparative relevance of radicalism in pre modernity *Transforming Faith Communities* Michael I. Bochenski, 2013-03-14 *Transforming Faith Communities* argues for a model of being church that combines congregationalism with a constructive approach to church state relationships Congregationalism within a vision for a renewed Christendom is commended here as a viable option for Christian mission in the twenty first century world In making this case two movements are explored those inspired by sixteenth century Anabaptism and late twentieth century Latin American liberation theology Each movement is held up as a mirror to the other A continuing vision for the transformation of church and society emerges from this book as a number of contemporary resonances begin to sound These include an outline of some likely common features in the development of radical religious communities an examination of some of the factors that create world affirming Christian faith communities and many examples of effective and constructive engagement with church and society across the centuries

Radical, Religious, and Violent Eli Berman, 2011-09-30 Applying fresh tools from economics to explain puzzling behaviors of religious radicals Muslim Christian and Jewish violent and benign How do radical religious sects run such deadly terrorist organizations Hezbollah Hamas Lashkar e Taiba and the Taliban all began as religious groups dedicated to piety and charity Yet once they turned to violence they became horribly potent executing campaigns of terrorism deadlier than those of their secular rivals In *Radical Religious and Violent* Eli Berman approaches the question using the economics of organizations He first dispels some myths radical religious terrorists are not generally motivated by the promise of rewards in the afterlife including the infamous seventy two virgins or even by religious ideas in general He argues that these terrorists even suicide terrorists are best understood as rational altruists seeking to help their own communities Yet despite the vast pool of potential recruits young altruists who feel their communities are repressed or endangered there are less than a dozen highly lethal terrorist organizations in the world capable of sustained and coordinated violence that threatens governments and

makes hundreds of millions of civilians hesitate before boarding an airplane What's special about these organizations and why are most of their followers religious radicals Drawing on parallel research on radical religious Jews Christians and Muslims Berman shows that the most lethal terrorist groups have a common characteristic their leaders have found a way to control defection Hezbollah Hamas and the Taliban for example built loyalty and cohesion by means of mutual aid weeding out free riders and producing a cadre of members they could rely on The secret of their deadly effectiveness lies in their resilience and cohesion when incentives to defect are strong These insights suggest that provision of basic social services by competent governments adds a critical nonviolent component to counterterrorism strategies It undermines the violent potential of radical religious organizations without disturbing free religious practice being drawn into theological debates with Jihadists or endangering civilians

Historical Dictionary of Radical Christianity William H. Brackney, 2012-05-03 There are several eras in the history of Christianity radical forms of the tradition are obvious the early church of the first five centuries the medieval era the age of reform the early modern era and the contemporary era Radical Christian activity and experience may reflect either a primary or a derived level of spirituality New converts may join a sect or movement with radical characteristics or they may become dissatisfied with their initial Christian experiences and desire a different or deeper Christian spirituality usually closely parallel to that seen in the New Testament The Historical Dictionary of Radical Christianity covers the history of this movement and includes an introductory essay and a bibliography The dictionary section has over 400 cross referenced entries The dictionary entries selected reflect the leading groups movements and sects from each major era of Christian history Especially in the contemporary period the great proliferation of radical thinkers and groups has necessitated a selection process with those selected exhibiting sustained group activity possessing an identifiable following and demonstrating a significant cultural impact This book is an excellent access point for students researchers and anyone wanting to know more about Radical Christianity

body of Christ **Christianity and the Law of Migration** Silas W. Allard, Kristin Heyer, Raj Nadella, 2021-09-05 This collection brings together legal scholars and Christian theologians for an interdisciplinary conversation responding to the challenges of global migration. Gathering 14 leading scholars from both law and Christian theology, the book covers legal perspectives, theological perspectives, and key concepts in migration studies. In Part 1, scholars of migration law and policy discuss the legal landscape of migration at both the domestic and international level. In Part 2, Christian theologians, ethicists, and biblical scholars draw on the resources of the Christian tradition to think about migration. In Part 3, each chapter is co-authored by a scholar of law and a scholar of Christian theology who bring their respective resources and perspectives into conversation on key themes within migration studies. The work provides a truly interdisciplinary introduction to the topic of migration for those who are new to the subject, an opportunity for immigration lawyers and legal scholars to engage Christian theology, an opportunity for pastors and Christian theologians to engage law, and new insights on key frameworks for scholars who are already committed to the study of migration. *Christian Community in History Volume 1* Roger D. Haight, 2004-09-16 Drawing upon the methodology developed in his *Dynamics of Theology* 1990 and exemplified in *Jesus Symbol of God* 1999, Roger Haight in this magisterial work achieves what he calls an historical ecclesiology or ecclesiology from below. In contrast to traditional ecclesiology from above, which is abstract idealist, and ahistorical ecclesiology from below, which is concrete realist and historically conscious. In this first of two volumes, Haight charts the history of the church's self-understandings from the origins of the church in the Jesus movement to the late Middle Ages. In volume 2, Haight develops a comparative ecclesiology based on the history and diverse theologies of the worldwide Christian movement from the Reformation to the present. While the ultimate focus of the work falls on the structure of the church and its theological self-understanding, it tries to be faithful to the historical, social, and political reality of the church in each period. **Christian Community in History Volume 1** Roger Haight, 2004-09-16 Drawing upon the methodology developed in his *Dynamics of Theology* 1990 and exemplified in *Jesus Symbol of God* 1999, Roger Haight in this magisterial work achieves what he calls an historical ecclesiology or ecclesiology from below.
