The Oxford Handbook of Radio and Podcasting Michele Hilmes, Andrew Bottomley, 2024 Radio today remains the most accessible and widely available communication medium worldwide despite technological shifts and a host of upstart challengers Since its origins in the 1920s radio has innovated a new world of sound culture now expanded into the digital realm of podcasting that is enabling the medium to reach larger audiences than ever before Yet radio remains one of the least studied of the major areas of communication arts due largely to its broadcast era ephemerality With the advent of digital technology radio's past has been unlocked and soundwork is exploding as a creative field creating a lively and diverse sonic present while simultaneously making critical historical analysis possible at last This volume offers newly commissioned chapters giving readers a wide ranging view of current critical work in the fields of radio and podcasting employing specific case studies to analyze sound media's engagement with the arts with the factual world of news talk and documentary programming as a primary means of forging community along with national transnational and alternative identities and as a subject of academic and critical research Its historical scope extends from radio's earliest days through its mid twentieth century decades as the powerful voice of nations and empires onto its transformation into a secondary medium during the television era and into the expanding digital present Over the course of 37 chapters it provides evidence of the sound media's flexibility and adaptation across diverse cultures by examining radio's past and present uses in regions including the United States Canada Britain Australia Poland China Korea Kenya Angola and Mozambique South Asia and the Caribbean Contributors include historians and media scholars as well as sound artists and radio podcast producers Notably companion links to digital quotations from works analyzed are included in many chapters along with chapter audiographies offering links to further listening Throughout *The Oxford Handbook of Radio and Podcasting* connects radio's broadcast past to its digital present and traces themes of creativity identity community nation and transnationality across more than a century of audio media

The Broadcast 41 Carol A Stabile, 2018-10-16 How forty one women including Dorothy Parker Gypsy Rose Lee and Lena Horne were forced out of American television and radio in the 1950s Red Scare At the dawn of the Cold War era forty one women working in American radio and television were placed on a media

blacklist and forced from their industry The ostensible reason so called Communist influence But in truth these women among them Dorothy Parker Lena Horne and Gypsy Rose Lee were by nature of their diversity and ambition a threat to the traditional portrayal of the American family on the airwaves This book from Goldsmiths Press describes what American radio and television lost when these women were blacklisted documenting their aspirations and achievements Through original archival research and access to FBI blacklist documents The Broadcast 41 details the blacklisted women s attempts in the 1930s and 1940s to depict America as diverse complicated and inclusive The book tells a story about what happens when non male non white perspectives are excluded from media industries and it imagines what the new medium of television might have looked like had dissenting viewpoints not been eliminated at such a formative moment The all white male dominated Leave it to Beaver America about which conservative politicians wax nostalgic existed largely because of the forcible silencing of these forty one women and others like them For anyone concerned with the ways in which our cultural narrative is constructed this book offers an urgent reminder of the myths we perpetuate when a select few dominate the airwaves

The Radio Station Michael C. Keith, 2007 Publisher description

The Synchronized Society Randall Patnode, 2023-03-17 The Synchronized Society traces the history of the synchronous broadcast experience of the twentieth century and the transition to the asynchronous media that dominate today Broadcasting grew out of the latent desire by nineteenth century industrialists political thinkers and social reformers to tame an unruly society by controlling how people used their time The idea manifested itself in the form of the broadcast schedule a managed flow of information and entertainment that required audiences to be in a particular place usually the home at a particular time and helped to create water cooler moments as audiences reflected on their shared media texts Audiences began disconnecting from the broadcast schedule at the end of the twentieth century but promoters of social media and television services still kept audiences under control replacing the schedule with surveillance of media use Author Randall Patnode offers compelling new insights into the intermingled roles of broadcasting and industrial post industrial work and how Americans spend their time
