Rail Centres: Peterborough (No. 4). Peter Waszak,1984 **Rail Centres, Peterborough** Peter Waszak,1984 **The World's First Railway System** Mark Casson,2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography **Rail Centres, York** K. Hoole,1983 An Historical Geography of Railways in Great Britain and Ireland David Turnock,2016-12-05 Although a great deal has been published on the economic social and engineering history of nineteenth century railways the work of historical geographers has been much less conspicuous This overview by David Turnock goes a long way towards restoring the balance It details every important aspect of the railway's influence on spatial distribution of economic and social change providing a full account of the nineteenth century geography of the British Isles seen in the context of the railway The book reviews and explains the shape of the developing railway network beginning with the pre steam railways and connections between existing road and water communications and the new rail lines The author also discusses the impact of the railways on the patterns of industrial urban and rural change throughout the century Throughout the historical geography of Ireland is treated in equal detail to that of Great Britain *Railways, Urban Development and Town Planning in Britain: 1948-2008* Russell Haywood,2016-03-23 This book provides a critical overview of the relationships between planning and railway management and development during the key period in the 20th Century when the railway was in public ownership 1948-94 It assesses the strength of the relationships when working in collaboration with the private sector The book then focuses on the interplay between planning and railway since privatization in 1994 and points to best practice for the future in institutional

structures and policy development to secure improved outcomes **The Deindustrialized World** Steven High, Lachlan MacKinnon, Andrew Perchard, 2017-07-20 Since the 1970s the closure of mines mills and factories has marked a rupture in working class lives The Deindustrialized World interrogates the process of industrial ruination from the first impact of layoffs in metropolitan cities suburban areas and single industry towns to the shock waves that rippled outward affecting entire regions countries and beyond Scholars from France Canada Australia the United Kingdom and the United States share personal stories of ruin and ruination and ask others what it means to be working class in a postindustrial world Part 1 examines the ruination of former workplaces and the failing health and injured bodies of industrial workers Part 2 brings to light disparities between rural resource towns and cities where hipster revitalization often overshadows industrial loss Part 3 reveals the ongoing impact of deindustrialization on working people and their place in the new global economy Together the chapters open a window on the lived experiences of people living at ground zero of deindustrialization revealing its layered impacts and examining how workers environmentalists activists and the state have responded to its challenges **The Railway Magazine** ,1907 Industrial Canada ,1917 **The East Coast Main Line 1939-1959 (Volume 2)** Peter Tuffrey, B. W. L. Brooksbank, 2022-07-02 The first detailed study of this huge mainline through its operational history Features extended commentaries from the authors rich in detail Superbly illustrated with black and white photographs many never seen before In this second and final volume the whole of the East Coast Main Line between King s Cross and Edinburgh Waverley stations is examined closely with a particular emphasis on the ways and structures the line stations connections yards and other physical features Interposed are accounts of the traffic at the principal stations including connecting and branch line services with observations on changes over the period 1939 to 1959 Some emphasis is placed on freight traffic on account of its importance and perhaps its relative unfamiliarity to the reader The lines stations and many other elements are described as they were in August 1939 but as some plans on which they are based are dated before the late 1930s there may be marginal differences from the precise layout in 1939
