Natural Areas Journal ,2002 *Coal and Peat Fires: A Global Perspective* Glenn B. Stracher, Anupma Prakash, Ellina V. Sokol, 2010-09-30 *Coal and Peat Fires A Global Perspective* is a compelling collection of research conducted by scientists and engineers around the world The first of four volumes in the collection *Coal Geology and Combustion* features chapters that discuss the origin of coal and coal fires mining and use of coal combustion and coal petrology environmental and health impacts of coal fires combustion by products geochemical geophysical and engineering methodologies for studying coal fires the control extinguishment and political implications of coal fires and much more Integrates pioneering coal fires research with topical coverage of remote sensing policymaking and more Serves as an essential guide to the socio economic and geo environmental impacts of coal fires **Peacekeeping Under Fire** Robert A. Rubinstein, 2015-11-17 The international community increasingly responds to civil wars humanitarian crises and other intrastate conflicts through the instrument of UN peacekeeping Nearly all of these interventions take place in non Western areas and involve interactions among militaries and nongovernmental organizations from all around the globe In this wide ranging book Rubinstein draws on decades of his own research on peacekeeping and on other current and historical cases to develop a broad understanding of the roles that culture plays in peacekeeping s success or failure *Peacekeeping under Fire* shows that cultural considerations are key elements at all levels of peacekeeping operations Culture influences what happens between peacekeepers and local populations how military and nongovernmental organizations interact and even how missions are planned and authorized *Peacekeeping under Fire* analyzes how political symbolism and ritual are critical to peacekeeping and demonstrates how questions of power identity and political perception emerge from the cultural context of peacekeeping **Around the Sacred Fire** J. Treat, 2016-04-30 *Around the Sacred Fire* is a compelling cultural history of intertribal activism centered on the Indian Ecumenical Conference an influential movement among native people in Canada and the U S during the Red Power era Founded in 1969 the Conference began as an attempt at organizing grassroots spiritual leaders who were concerned about the conflict between tribal and Christian traditions throughout Indian country By the mid seventies thousands of people were gathering each summer in the foothills of the Rockies where they participated in weeklong encampments promoting spiritual revitalization and religious self determination Most historical overviews of native affairs in the sixties and seventies emphasize the prominence of the American Indian Movement and the impact of highly publicized confrontations such as the Northwest Coast fish ins the Alcatraz occupation and events at Wounded Knee The Indian Ecumenical Conference played a central role in stimulating cultural revival among native people partly because Conference leaders strategized for social change in ways that differed from the militant groups Drawing on archival records published accounts oral histories and field research James Treat has written the first comprehensive study of this important but overlooked effort at postcolonial interreligious dialogue **Yearbook of International Humanitarian Law - 2001** Avril

McDonald, John Dugard, William Fenrick, Hans-Peter Gasser, Christopher Greenwood, Hortensia Gutierrez Posse, 2011-01-07

The defining moments of 2001 the terrorist attacks of September 11 against the United States of America marked a turning point in international law and relations. By their scale and audaciousness overnight they helped to propel the issue of international terrorism to the top of the international security agenda and particularly that of the USA with consequences for many branches of international law including the *jus ad bellum* the *jus in bello* international law relating to terrorism international human rights law and international criminal law that were just beginning to be felt as the year closed. The September 11 attacks were immediately characterised by the United States as an act of war an armed attack on such a scale as to constitute an armed conflict. Its immediate response was to declare a so called Global War on Terrorism. Avowedly acting in self defense on 7 October the US launched armed attacks against Afghanistan not because Afghanistan was considered to be legally responsible for the September 11 attacks but for harbouring and refusing to surrender members of Al Qaeda including its leader Osama Bin Laden and refusing to dismantle terrorist training camps. Although the main target of the attacks was Al Qaeda the armed conflict that ensued was an international armed conflict between the US and its allies and the state of Afghanistan notwithstanding that the US never recognised the Taliban as the government of Afghanistan.

An Introduction to Fire Dynamics Dougal Drysdale, 2011-08-24 Drysdale's book is by far the most comprehensive everyone in the office has a copy now including me. It holds just about everything you need to know about fire science. Review of *An Introduction to Fire Dynamics* 2nd Edition. After 25 years as a bestseller Dougal Drysdale's classic introduction has been brought up to date and expanded to incorporate the latest research and experimental data. Essential reading for all involved in the field from undergraduate and postgraduate students to practising fire safety engineers and fire prevention officers. *An Introduction to Fire Dynamics* is unique in that it addresses the fundamentals of fire science and fire dynamics thus providing the scientific background necessary for the development of fire safety engineering as a professional discipline. *An Introduction to Fire Dynamics* includes experimental data relevant to the understanding of fire behaviour of materials. Features numerical problems with answers illustrating the quantitative applications of the concepts presented. Extensively course tested at Worcester Polytechnic Institute and the University of Edinburgh and widely adopted throughout the world. Will appeal to all those working in fire safety engineering and related disciplines.

Fire and Climatic Change in Temperate Ecosystems of the Western Americas Thomas T. Veblen, William L. Baker, Gloria Montenegro, Thomas W. Swetnam, 2006-05-10 Both fire and climatic variability have monumental impacts on the dynamics of temperate ecosystems. These impacts can sometimes be extreme or devastating as seen in recent El Niño La Niña cycles and in uncontrolled fire occurrences. This volume brings together research conducted in western North and South America areas of a great deal of collaborative work on the influence of people and climate change on fire regimes. In order to give perspective to patterns of change over time it emphasizes the integration of paleoecological studies with studies of modern

ecosystems Data from a range of spatial scales from individual plants to communities and ecosystems to landscape and regional levels are included Contributions come from fire ecology paleoecology biogeography paleoclimatology landscape and ecosystem ecology ecological modeling forest management plant community ecology and plant morphology The book gives a synthetic overview of methods data and simulation models for evaluating fire regime processes in forests shrublands and woodlands and assembles case studies of fire climate and land use histories The unique approach of this book gives researchers the benefits of a north south comparison as well as the integration of paleoecological histories current ecosystem dynamics and modeling of future changes *General Technical Report RMRS ,2003*
