Martin,2025-10-08 Mirror Crimes is an investigation into a unique and unsettling corner of forensics where reflections become key pieces of evidence The book explores how investigators analyze reflections from various surfaces from a shattered mirror at a crime scene to the victim s own eye to solve crimes It delves into both the science of analyzing distorted or fragmented reflections and the psychology of how criminals interact with their own image during a crime The author presents several case studies including how a faint smudge on a mirror a ghost like image on a darkened TV screen and even the eerie glowing eyes of a housecat have helped solve murders The book ultimately serves as a guide to reflective awareness encouraging readers to understand the hidden information in the world around them
