**Moral Reflections on Foreign Policy in a Religious War** Ronald H. Stone, 2008-05-02 Moral Reflections on Foreign Policy in a Religious War argues that foreign policy thinkers and actors must take religion more seriously than they have in analysis and action The tragedy of U S policy in Iraq is in part due to the dangers of ignoring religious conflicts in that country until it was too late and then responding too lightly Working as a philosopher of religion and politics Stone shows how both in the United States and the Middle East unreflective religion in a dialogic relationship with politics power has proven hazardous Stone proposes policy changes for the United States based on his analysis and calls for reform in the ways that both politics and religion are understood Without peace between religions there will be no peace in the Middle East Without understanding how religion functions in international politics the United States is doomed to repeat disastrous policies in the Middle East

Reflections on the Cuban Missile Crisis Raymond Garthoff, 2011-03-01 The Soviet response to the first edition of Reflections has been a prime example of the new openness under glasnost in discussing previously taboo subjects Using new revelations such as the fact that Moscow had twice as many troops in Cuba as the Kennedy administration believed from key Soviet and Cuban Sources Garthoff has revised his earlier analysis to produce the most accurate eye opening story yet of the 1963 crisis In this book Raymond L Garthoff a participant in the crisis deliberations of the U S government reflects on the nature of the crisis it s consequences and it s lessons for the future He provides a unique combination of memoir historical analysis and political interpretations He gives particular attention to the aftermath and afterlife of the crisis and to its bearing on current and future policy In the first edition of the book in 1987 the Garthoff presented a number of facts for the first time Since then more information has become available particularly from Soviet sources in part from conferences in which Garthoff participated but even more from individual interviews and research This new information much of it presented here in this volume for the first time helps to fill in gaps in our knowledge about events and motivations on the Soviet side More importantly it enlarges our understanding of the crisis interaction

Critical Reflections on Regional Competitiveness Gillian Bristow, 2010-04-05 Since the early 1990s governments and development agencies have become increasingly preoccupied with the pursuit of regional competitiveness However there is considerable confusion around what exactly regional competitiveness means how it might be achieved whether and how it can be measured and whether it is a meaningful and appropriate goal for regional economies The central aim of this book is to provide a comprehensive and critical account of these debates with reference to theory policy and practice and thus to explore the meaning and value of the concept of regional competitiveness The book is structured into

three parts Part one introduces the concept of regional competitiveness by tracing its origins and exploring its different meanings in regional economic development This will critically engage with political economy approaches to understanding the nature and dominance of the competitiveness discourse Part two interrogates the pursuit of regional competitiveness in policy and practice This critically evaluates the degree to which the pursuit of competitiveness is encouraging convergence in policy agendas in regions through an examination of key determinants of policy sameness and difference notably benchmarking and devolved governance Part three explores the limitations to regional competitiveness and explores whether and how its predominance in the policy discourse might be challenged by alternative agendas such as sustainable development and wellbeing This focuses on the developing qualitative character of regional development This volume critically engages with the theory and policy of regional competitiveness thus providing the first integrated critique of the concept for undergraduate and postgraduate students as well as academics interested in regional development and policy It will unpack the concept of regional competitiveness and explain its usefulness limitations and policy appeal as well as examining its sustainability in the light of evolving governance structures and the imperatives of broadening regional development agendas *A Call for Solidarity* ,1986 **Reflections on the Revolution in France** Edmund Burke,1890
