The Future of Transatlantic Security Relations Richard A. Chilcoat, Joseph R. Cerami, Patrick Baetjer, 2006

Transforming America's Military, *New Transatlantic Agenda and the Future* Joerg Monar, 1998-12-18 This book presents the results of an international conference on the New Transatlantic Agenda organized in Brussels in July 1996 by the Centre for European Politics and Institutions CEPI of the University of Leicester in cooperation with the Directorate General I of the European Commission and Kluwer Law International While most of its chapters are revised versions of papers presented at the conference some were commissioned afterwards in order to address several relevant issues which could not be covered adequately within the time limited framework of the conference The book provides an analysis both of the innovative

elements of the New Transatlantic Agenda and of the main challenges that EU US relations will have to face at the turn of this century While the main focus is on whether the New Transatlantic Agenda constitutes an adequate response to these challenges this volume also explores the necessary conditions for a successful long term implementation of the Agenda and asks what lessons can be drawn in this respect from previous experiences in transatlantic cooperation Emphasis has been given to the consideration of justice and home affairs as matters of EU US cooperation not only because this is undoubtedly one of the most innovative areas of the New Transatlantic Agenda but because it is an area in which both governments are confronted with rapidly increasing challenges This volume aims to make a significant contribution to the discussion of the future of the transatlantic relationship whose quality is likely to depend on the capability of both sides to respond with new approaches such as those laid out in the New Transatlantic Agenda to inevitable changes in both the bilateral and global contexts

European Union and Strategy Kjell Engelbrekt, Jan Hallenberg, 2010-09-13 This edited volume sets out to explore the paradox that the European Union EU produces policies with strategic qualities but lacks the institutions and concepts to engage in strategic reasoning and action proper The book has a two fold agenda exploring current EU external policies that are or seem to be linked to strategic priorities and also studying the concept of strategy in the particular context of EU decision and policymaking The volume first examines the character of the Union as a strategic actor at this stage of its development It then explores the ability of the Union to act and otherwise influence both its periphery and the wider world focusing in particular on how it is perceived by other actors The final section comprises personal assessments by a group of contributors regarding the character of the union as a strategic actor in the present and future When these are pieced together a picture emerges of a European strategy in the making albeit one that so far is modest and partial This book will be of interest to students of European Security European Politics and IR

Partnership in Crisis Paul Cornish, 1997-01-01 Focuses on the inner workings of NATO during the period 1996 97 After a summary of theoretical reflections on military alliances chapters describe four paths to compromise US British French and German without which the goals and complex formulae devised in 1996 and 1997 could not have been agreed upon and analyze the international adaptation of NATO and its strength of consensus on both sides of the Atlantic Distributed by Books International Annotation copyrighted by Book News Inc Portland OR

Russia Faces NATO Expansion Joseph Laurence Black, 2000 The importance of Russian thinking about NATO expansion eastward has been badly underestimated in the West In this first comprehensive English language assessment of the Russian position Black seeks to remedy that oversight by a thorough examination of Russian official statements expert analysis party platforms and media commentary which show the degree to which NATO expansion has brought a rare unity to the otherwise fragmented and volatile Russian political arena Based entirely on Russian language sources this timely study provides invaluable insights into current Russian thinking on NATO expansion and projects the significance of such thinking for the Western Alliance into the future

British Foreign Policy Under New Labour,

1997-2005 P. Williams, 2005-11-22 This important new study provides a critical analysis of the foreign policies conducted during the first two terms of Tony Blair's government. It focuses upon the government's key foreign policy commitments, three of its most important international relationships with the US, the European Union and Africa, and how Blair's government dealt with five fundamental policy issues: political economy, defence, international development, intervention, and Iraq. It argues that throughout this period Labour's foreign policies attempted to paper over some important contradictions.
