Regionalism Multilateralism And Economic Integration The Recent Experience:

Regionalism, Multilateralism, and Economic Integration Gary P. Sampson, Stephen Woolcock, 2003 This publication considers whether regional trade agreements have led to a new form of economic co operation by promoting deeper integration in the regulatory structures of participating countries An examination of recent experiences are found to show that although there is no single model for deeper integration regional trade agreements have generally more effective than more remote WTO procedures in facilitating trade and improving transparency Regional processes and rules are found to have been consistent with the multilateral obligations of each party with additional commitments in the regional agreements complementing WTO rules

The Politics of Economic Regionalism K. Cai, 2010-01-20 While major theories of economic regionalism in the existing literature are primarily constructed to explore institutionalized regional integration European integration in particular the analytical framework developed in this work explains the unique process and pattern of regional integration in East Asia

Global Politics of Regionalism Mary Farrell, Björn Hettne, Luk Van Langenhove, 2005-08-20 This book explores the phenomenon of regionalism In a seeming

contradiction to globalization there is a growing tendency for countries to enter into regional arrangements as a response to the pressures of operating in a global marketplace But regionalism is also emerging as a phenomenon in its own right serving distinct purposes and taking different forms in different areas The contributors explore how these patterns impact on wider issues such as global governance democracy and trade The book reviews the major theoretical approaches to regional cooperation including perspectives from international relations political economy economics and sociology It is divided into three main sections theoretical approaches to regionalism issues of regional cooperation such as security monetary issues identity and integration and an exploration of specific case studies including the Middle East Africa the Americas China Europe Asia and the Pacific With an international range of contributors including Bjorn Hettne Louise Fawcett and Andrew Hurrell this in depth and multi disciplinary guide will be of interest to students across the social sciences and to the wider policy community

Regionalism in International Investment Law Leon Trakman, Nick W. Ranieri, 2013-04-25

Rethinking the World Trade Order Mohammad F.

A. Nsour, 2010 Regional Trade Agreements RTAs have proliferated at an unprecedented pace since the creation of the World Trade Organization WTO Although the WTO legally recognizes countries entitlement to form RTAs neither the WTO nor parties to RTAs have an unequivocal understanding of the relationship between the WTO and RTAs In other words the legal controversies the result of uncertainty regarding the application of the WTO GATT laws risk undermining the objectives of the multilateral trade system This research tackles a phenomenon that is widely believed to be heavily economic and political It highlights the economic and political aspects of regionalism but largely concentrates on the legal dimension of regionalism The main argument of the book is that the first step to achieving harmony between multilateralism and regionalism is the identification of the legal uncertainties that regionalism produces when countries form RTAs without taking into account the

substantive and procedural aspect of the applicable WTO GATT laws The book calls for the creation of a legal instrument i e agreement on RTAs that combines all of the applicable law on RTAs and simultaneously clarifies the legal language used therein Likewise the WTO should have a proactive role not merely as a coordinator of RTAs but as a watchdog for the multilateral system that has the power to prosecute violating RTAs The author is aware that political concerns are top priorities for governments and policy makers when dealing with the regionalism problematic Hence legal solutions or proposals are not sufficient to create a better international trade system without the good will of the WTO Members who are in fact the players who are striving to craft more regional trade arrangements

"L'Être situé", Effectiveness and Purposes of International Law Shotaro Hamamoto, Hironobu Sakai, Akiho Shibata, 2015-05-26 The traditional and mainstream conception of international law presupposes a certain ideal type of State However each State is situated in a particular context an *Etat situ* and the universal impartial and non discriminatory application of international law to each State often produces unjustifiable results in the real world International law thus needs to cope with this existential question in order to ensure and maintain the effectiveness of the international legal order without however being trapped by a nihilistic relativism This approach requires a flexible understanding and reconstruction of the international law making theory The present collection of essays gathers contributions written in honour of Professor Ryuichi Ida by his colleagues and former students inspired by the *d d icataire* who places particular emphasis upon the context effectiveness and purposes of international law The *d d icataire*'s perspective finds wide ranging applications and the present collection deals with international economic law international criminal law international environmental law international law making the law of State responsibility and the law of international organizations Contributors are Tatsuya Abe Pierre Marie Dupuy Shotaro Hamamoto Machiko Kanetake Tomohiko Kobayashi Tomonori Mizushima Hironobu Sakai Akiho Shibata Mari Takeuchi Dai Tamada Sakda Thanitcul Zhi an Wang and Takuhei Yamada

Battles Over Free Trade, Volume 4 Mark Duckenfield, 2017-07-05 After the collapse of the Doha Development Round of the World Trade Organization talks agricultural subsidies and market liberalization went high on the political agenda This work features historical documents that address the thorny relationship between trade and politics the appropriate role of international regulation

and domestic concerns *Theory and Practice of Harmonisation* Mads Andenas, Camilla Baasch Andersen, 2012 Harmonised and uniform international laws are now being spread across different jurisdictions and fields of law bringing with them an increasing body of scholarship on practical problems and theoretical dimensions This comprehensive and insightful book focuses on the contributions to the development and understanding of the critical theory of harmonisation The contributing authors address a variety of different subjects concerned with harmonisation and the application of legal rules resulting from harmonisation efforts This study is written by leading scholars engaged in different aspects of harmonisation and covers both regional harmonisation within the EU and regional human rights treaties as well as harmonisation with international treaty obligations With comparative analysis that contributes to the development of a more general theory on the harmonisation process this timely book will appeal to EU and international law scholars and practitioners as well as those looking to future legal harmonisation in other regions in Asia Latin America and Africa *Enlarging the Euro Area* Kenneth

Dyson, 2006-11-02 This book seeks to offer the first in depth and systematic analysis of the challenges of the Euro Area and the eastward enlargement of the European Union It focuses in particular on how the prolonged process of accession to the Euro Area is affecting domestic economic policies in the accession states of east central Europe It contributes to Europeanization studies comparative political economy and to studies of Economic and Monetary Union It also provides a picture of processes of domestic transformation in such countries as the three Baltic States Bulgaria the Czech Republic Hungary Poland and Romania The book brings together a range of recognized experts from across Europe and combines country and sectoral case studies with a thematic treatment It begins by offering an outside in perspective which situates the effects of EMU on the accession states in the wider context of the development of global economic norms The second part focuses on an inside out analysis of how Euro Area accession affects the states of east central Europe their policies politics and public institutions The final part assesses how Euro Area accession is affecting key policy sectors in east central Europe financial market regulation fiscal policies and welfare states and labour markets **Climate and Trade Policy** Carlo

Carraro, Christian Egenhofer, 2007-01-01 The difficulty of achieving and implementing a global climate change agreement has stimulated a wide range of policy proposals designed to favour the participation of a large number of countries in a global cooperative effort to control greenhouse gas emissions This significant book analyses the viability of controlling climate change through a set of regional or sub global climate agreements rather than via a global treaty The authors argue that the principal challenge in devising a truly global architecture is in providing sufficient incentives for all party participation whilst also ensuring compliance which raises global governance issues The main purpose of this study is not to trace in detail the process of negotiation and implementation of international regimes but rather to evaluate whether a series of regional or sub global agreements is more likely to achieve climate change control than a global agreement attempted from the outset From a political science perspective the focus centres on institution building and governance From an economic perspective it

concentrates on incentives used to encourage participation in a global and non fragmented agreement Lessons from EU integration and actual global and regional trade agreements are employed in order to analyse the future prospects of climate change negotiations The focus on climate change and more generally the management of environmental and resource problems will make this book essential reading for participants observers and analysts of the public policy process as it concerns climate change and more generally the management of environmental and resource problems In addition the rich combination of international relations theory and economic literature with findings from the policy process will appeal to both general readers and the academic community

Canada Looks South Peter McKenna, 2012-12-06 Recent events in the western hemisphere have led to a dramatic shift in the strategic and political importance of Latin America But with relations still cool between the United States and Cuba and Venezuela becoming more distant every day there is considerable potential for Canada with its longstanding commitment to constructive engagement to forge mutually beneficial relations with these nations as well as rising industrial and economic players such as Mexico and Brazil In *Canada Looks South* experts on foreign policy in Canada and Central America provide a timely exploration of Canada's growing role in the Americas and the most pressing issues of the region Starting with the historical scope of the bilateral relationship the volume goes on to cover such subjects as trade engagement democratization and security As current and future Canadian governments embrace expanding linkages with this region this collection fills a significant gap in scholarship on Canadian Latin American relations

Reforming WTO Rules on State-Owned Enterprises Yingying Wu, 2019-01-28 This book argues that the trade distorting effects of advantages associated with SOEs are more severe from an economic perspective and the behavior of SOEs after receiving advantages is of more concern compared to private owned enterprises POEs The premise is that the existence of SOEs per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to SOEs compared to POEs and ii the behavior of SOEs once they receive advantages The book offers a systematic analysis focusing on the various advantages granted to SOEs and their subsequent behavior Its detailed analysis reveals the inadequacy of current WTO rules and is complemented by a number of concrete proposals

The Right to Regulate in International Investment Law Catharine Titi, 2014-12-01 Since the inception of the international investment law system investment promotion and protection have been the *raison d'être* of investment treaties and states have confined their policy space in order to attract foreign investment and protect their investors abroad Languishing in relative obscurity until recently the right to regulate has gradually come to the spotlight as a key component of negotiations on new generation investment agreements around the globe States and regional organisations including notably the European Union and the United States have started to examine ways in which to safeguard their regulatory power and guide and delimit the interpretive power of arbitral tribunals by reserving their right to pursue specific public policy objectives The monograph explores the status quo of the right to regulate in order to offer an appraisal and a reference tool for treatymakers thus contributing to a better understanding of the concept and the broader discourse on how to enhance the investment law system's legitimacy
