Black Authors and Illustrators of Books for Children and Young Adults Barbara Thrash Murphy, Deborah L. Murphy, 2006-12-21 Black Authors and Illustrators of Books for Children and Young Adults is a biographical dictionary that provides comprehensive coverage of all major authors and illustrators past and present As the only reference volume of its kind available this book is a valuable research tool that provides quick access for anyone studying black children s literature whether one is a student a librarian charged with maintaining a children s literature collection or a scholar of children s literature The Fourth Edition of this renowned reference work illuminates African American contributions to children s literature and books for young adults The new edition contains updated and new information for existing author illustrator entries the addition of approximately 50 new profiles and a new section listing online resources of interest to the authors and readers of black children s literature **Robo Sacer** David S.

Dalton, 2023-05-15 Robo Sacer engages the digital humanities critical race theory border studies biopolitical theory and necropolitical theory to interrogate how technology has been used to oppress people of Mexican descent both within Mexico and in the United States since the advent of the North American Free Trade Agreement NAFTA in 1994 As the book argues robo sacer identity emerges as transnational flows of bodies capital and technology become an institutionalized state of exception that relegates people from marginalized communities to the periphery And yet the same technology can be utilized by the oppressed in the service of resistance The texts studied here represent speculative stories about this technological empowerment These texts theorize different means of techno resistance to key realities that have emerged within Mexican

and Chicano a x communities under the rise and reign of neoliberalism The first three chapters deal with dehumanization the trafficking of death and unbalanced access to technology The final two chapters deal with the major forms of violence femicide and drug related violence that have grown exponentially in Mexico with the rise of neoliberalism These stories theorize the role of technology both in oppressing and in providing the subaltern with necessary tools for resistance Robo Sacer builds on the previous studies of Sayak Valencia Irmgard Emmelhainz Guy Emerson Achille Mbembe and of course Giorgio Agamben but it differentiates itself from them through its theorization on how technology and particularly cyborg subjectivity can amend the reigning biopolitical and necropolitical structures of power in potentially liberatory ways Robo Sacer shows how the cyborg can denaturalize constructs of zo by providing an outlet through which the oppressed can tell their stories thus imbuing the oppressed with the power to combat imperialist forces *Clearwater National Forest (N.F.)*, *Robo Elk*, 2011

Robo Sapiens Japonicus Jennifer Robertson, 2018 Japan is arguably the first postindustrial society to embrace the prospect of human robot coexistence Over the past decade Japanese humanoid robots designed for use in homes hospitals offices and schools have become celebrated in mass and social media throughout the world In Robo sapiens japonicus Jennifer Robertson casts a critical eye on press releases and public relations videos that misrepresent robots as being as versatile and agile as their science fiction counterparts An ethnography and sociocultural history of governmental and academic discourse of human robot relations in Japan this book explores how actual robots humanoids androids and animaloids are imagineered in ways that reinforce the conventional sex gender system and political economic status quo In addition Robertson interrogates the notion of human exceptionalism as she considers whether civil rights should be granted to robots Similarly she juxtaposes how robots and robotic exoskeletons reinforce a conception of the normal body with a deconstruction of the much invoked Theory of the Uncanny Valley *Automating the News* Nicholas Diakopoulos, 2019-06-10 From hidden connections in big data to bots spreading fake news journalism is increasingly computer generated An expert in computer science and media explains the present and future of a world in which news is created by algorithm Amid the push for self driving cars and the roboticization of industrial economies automation has proven one of the biggest news stories of our time Yet the wide scale automation of the news itself has largely escaped attention In this lively expos of that rapidly shifting terrain Nicholas Diakopoulos focuses on the people who tell the stories increasingly with the help of computer algorithms that are fundamentally changing the creation dissemination and reception of the news Diakopoulos reveals how machine learning and data mining have transformed investigative journalism Newsbots converse with social media audiences distributing stories and receiving feedback Online media has become a platform for A B testing of content helping journalists to better understand what moves audiences Algorithms can even draft certain kinds of stories These techniques enable media organizations to take advantage of experiments and economies of scale enhancing the sustainability of the fourth estate But they also place pressure on editorial decision making because they allow journalists to

produce more stories sometimes better ones but rarely both Automating the News responds to hype and fears surrounding journalistic algorithms by exploring the human influence embedded in automation Though the effects of automation are deep Diakopoulos shows that journalists are at little risk of being displaced With algorithms at their fingertips they may work differently and tell different stories than they otherwise would but their values remain the driving force behind the news The human algorithm hybrid thus emerges as the latest embodiment of an age old tension between commercial imperatives and journalistic principles

Advanced Artificial Intelligence and Robo-Justice Georgios I. Zekos,2022-05-16 The book deals with digital technology which is transforming the landscape of dispute resolution It illustrates the application of AI in the legal field and shows the future prospect of robo justice for an AAI society in the advanced artificial intelligence era In other words the present justice system and the influence of current AI upon courts and arbitration are investigated The transforming role of AI on all legal fields is examined thoroughly by giving answers concerning AI legal personality and liability The analysis shows that digital technology is generating an ever growing number of disputes and at the same time is challenging the effectiveness and reach of traditional dispute resolution avenues To that extent the book presents in tandem the impact of AI upon courts and arbitration and reveals the role of AAI in generating a new robo justice system Finally the end of the perplexing relation of courts and arbitration is evidenced methodically and comprehensively

Robo-Advisors in Management Gupta, Swati,Taneja, Sanjay,Kumar, Vijay,Ozen, Ercan,Vardari, Luan,2024-04-22 In the ever evolving landscape of management the introduction of robo advisors has introduced challenges and opportunities that require careful examination Organizations grapple with the profound impact of these automated systems on decision making processes resource allocation and strategic planning The need for a comprehensive understanding of how robo advisors integrate into various management functions and sectors has become paramount Decision makers researchers and students seeking clarity in this transformative period are faced with a shortage of literature that bridges theoretical insights with practical applications Robo Advisors in Management stand out as a

pioneering solution to this crucial gap in the existing body of knowledge This book does not merely explore the challenges presented by robo advisors it delves into the heart of these challenges and navigates the diverse applications of these technologies in sectors ranging from wealth management to healthcare and real estate By seamlessly blending theoretical foundations with real world scenarios the book equips both professionals and academics with the tools needed to comprehend and harness the potential of robo advisors It is an invaluable resource for decision makers looking to optimize their strategies researchers seeking in depth insights and students aspiring to navigate the intersection of management and fintech

Social Robots: Technological, Societal and Ethical Aspects of Human-Robot Interaction Oliver Korn, 2019-07-01 Social robots not only work with humans in collaborative workspaces we meet them in shopping malls and even more personal settings like health and care Does this imply they should become more human able to interpret and adequately respond to human emotions Do we want them to help elderly people Do we want them to support us when we are old ourselves Do we want them to just clean and keep things orderly or would we accept them helping us to go to the toilet or even feed us if we suffer from Parkinson s disease The answers to these questions differ from person to person They depend on cultural background personal experiences but probably most of all on the robot in question This book covers the phenomenon of social robots from the historic roots to today s best practices and future perspectives To achieve this we used a hands on interdisciplinary approach incorporating findings from computer scientists engineers designers psychologists doctors nurses historians and many more The book also covers a vast spectrum of applications from collaborative industrial work over education to sales Especially for developments with a high societal impact like robots in health and care settings the authors discuss not only technology design and usage but also ethical aspects Thus this book creates both a compendium and a guideline helping to navigate the design space for future developments in social robotics

Robo Sapiens: Tales of Tomorrow (Omnibus) Toranosuke Shimada, 2021-11-23 In the future robots are more than machines Autonomous cyber persons with A I brains are part of society interacting with humans while developing their own culture In fact they may be surpassing humans as biological homo sapiens have begun to die out and give way to robo sapiens But are humans truly disappearing or are robots the newest form of humanity This millennia spanning speculative science fiction manga of interconnected stories both human and robotic was awarded the Division Grand Prize at the 2020 Japan Media Arts Festival

Robot Soccer Vladan Papić, 2010-01-01 The idea of using soccer game for promoting science and technology of artificial intelligence and robotics was presented in the early 90s of the last century Researchers in many different scientific fields all over the world recognized this idea as an inspiring challenge Robot soccer research is interdisciplinary complex demanding but most of all fun and motivational Obtained knowledge and

results of research can easily be transferred and applied to numerous applications and projects dealing with relating fields such as robotics electronics mechanical engineering artificial intelligence etc As a consequence we are witnesses of rapid advancement in this field with numerous robot soccer competitions and a vast number of teams and team members The best illustration is numbers from the RoboCup 2009 world championship held in Graz Austria which gathered around 2300 participants in over 400 teams from 44 nations Attendance numbers at various robot soccer events show that interest in robot soccer goes beyond the academic and R

Land Use, Nature Conservation and the Stability of Rainforest Margins in Southeast Asia Gerhard Gerold, Michael Fremerey, Edi Guhardja, 2013-06-29 Southeast Asia constitutes one of the world's most extended rainforest regions It is characterized by a high degree of biodiversity and contains a large variety of endemic species Moreover these forests provide a number of important and singular ecosystem services like erosion protection and provision of high quality water which cannot be replaced by alternative ecosystems However various forms of encroachment mostly those made by human interventions seriously threaten the continuance of rainforests in this area There is ample evidence that the rainforest resources apart from large scale commercial logging are exposed to danger particularly from its margin areas These areas which are characterized by intensive man nature interaction have been identified as extremely fragile systems The dynamic equilibrium that balances human needs and interventions on the one hand and natural regeneration capacity on the other is at stake The decrease of rainforest resources is to a substantial degree connected with the destabilization of these systems Accordingly the search for measures and processes which prevent destabilization and promote stability is regarded as imperative This refers to both the human and the natural part of the forest margin ecosystem
