Believe in the Power of Rock & Roll? John Robb, 2023-04-27 Do You Believe in the Power of Rock Roll is a history of alternative rock from John Robb with the music still ringing in his ears This collection follows John s journey from the late 1970s when he was first caught up in punk s high octane thrill to the present day via the early days of the rave scene the birth of electronic and techno and myriad bands that spun off on their own idiosyncratic paths John was the first person to write about Nirvana he coined the term Britpop and he documented the Stone Roses rise out of Manchester before anyone else was interested He was at every pivotal gig and has interviewed every key player in the business including Jordan the queen of punk founding father of new American rock Steve Albini goth rock guitarist Daniel Ash infamous Oasis co founder Noel Gallagher and music greats like Lemmy and Poly Styrene Few others have witnessed first hand so many important moments of the last forty years of rock history Here they come together to form the essential history of a personal quest to document the ever changing soundtrack of the modern world *World Book's Our Earth* , De Bow's Review James Dunwoody Brownson De Bow, R. G. Barnwell, Edwin Bell, William MacCreary Burwell, 1861 *Reefs of Time* Lisa S. Gardiner, 2025-06-10 Because of global warming scientists predict that the majority of the world s coral reefs may be gone by the end of the century based on rapid declines in the past century In fact the amount of living coral on Caribbean reefs dropped by 80% in the last three decades of the 1900s But there s hope Researchers studying both living and fossilized corals are bringing together their work to better understand the past and present of coral reefs and applying that understanding to help reefs become more resilient into the future In *Reefs of Time* paleontologist Lisa Gardiner introduces readers to coral reefs through the lens of the fossilized limestone structures they ve left behind Gardiner argues that understanding the life cycles of reefs that existed in shallow deep time that is the era of the youngest fossils inhabited by creatures much like those of today s world but unaffected by human contact can help us better grasp the unique challenges facing corals in the present As Gardiner shows once we know what happened in the past and what s happening in the present we can begin to solve the questions of the future Do coral reefs have any chance of surviving climate change ocean warming pollution and other problems of the Anthropocene And if so how can humans be part of the solution The book begins with an introduction to fossilization and the singular way coral and other limestone producing organisms interact with the ocean s geological cycles After an exploration of ancient reefs and the field of paleoecology Gardiner shifts to a discussion of present day reefs and the deleterious effects of ocean warming and other stressors that impact coral s ability to bounce back from disruption She then returns to the fossil record to explore ways coral has built up resilience in the past and discusses how scientists can use this knowledge to help coral become more resilient in the future Throughout Gardiner draws on her own research and experience studying living and dead corals along with a synthesis of the latest conclusions from other scientists to illuminate how unlocking the recent past can help us change the future Provided by publisher Affect and Emotion in Tourism Dorina-Maria Buda, Jennie Germann Molz, 2023-03-31 Bringing affect and emotion to the forefront of tourism studies

this book presents a new generation of scholars who consolidate emerging affective approaches and establish a route for scholarship that examines the roles of emotion and affect in tourism. Attuning to affect and emotion, this book steers the affective turn to encompass touring bodies and tourism places. Engaging the concept of affect as a constitutive element of social life often leaves academics grasping for terminology to describe something that is by its very nature beyond words. For this reason, as evident in the four interconnected sections of this volume, studying affect poses a significant and fruitful challenge to the status quo of social scientific method and analysis. From African American emotional labour while travelling to visiting Banksy's Dismaland park to affective heritagescapes, self-love and travelling mittens, and across socio-spatial theories of emotions, decolonial feminist theory and atmospheric politics, this book demonstrates the epistemic and empirical richness of affective tourism. Along with the contributors to this volume, the editors make a case for thinking about emotions and affects through collective and individual practices as interrelated, shaping tourism encounters in and with places. That is to break it down as doing and as shared between bodies and places through the doing. The chapters in this book were originally published as a special issue of *Tourism Geographies*. *Confederate Industry* Harold S. Wilson, 2014-07-10

By 1860 the South ranked high among the developed countries of the world in per capita income and life expectancy and in the number of railroad miles, telegraph lines and institutions of higher learning. Only the major European powers and the North had more cotton and woolen spindles. This book examines the Confederate military's program to govern this prosperous industrial base by a quartermaster system. By commandeering more than half the South's produced goods for the military, the quartermaster general, in a drift toward socialism, appropriated hundreds of mills and controlled the flow of southern factory commodities. The most controversial of the quartermasters general was Colonel Abraham Charles Myers. His iron hand set the controls of southern manufacturing throughout the war. His capable successor, Brigadier General Alexander R. Lawton, conducted the first census of Confederate resources, established the plan of production and distribution and organized the Bureau of Foreign Supplies in a strategy for importing parts, machinery, goods and military uniforms. While the Confederacy mobilized its mills for military purposes, the Union systematically planned their destruction. The Union blockade ended the effectiveness of importing goods and under the Union army's General Order 100, Confederate industry was crushed. The great antebellum manufacturing boom was over. Scarcity and impoverishment in the postbellum South brought manufacturers to the forefront of southern political and ideological leadership. Allied for the cause of southern development were former Confederate generals, newspaper editors, educators and President Andrew Johnson himself, an investor in a southern cotton mill. Against this postwar mania to rebuild, this book tests old assumptions about southern industrial re-emergence. It discloses even before the beginnings of Radical Reconstruction that plans for a New South with an urban industrialized society had been established on the old foundations and on an ideology asserting that only science, technology and engineering could restore the region. Within this philosophical mold, Henry Grady, one of the New South's great reformers, led

the way for southern manufacturing By the beginning of the First World War half the nation s spindles lay within the former Confederacy home of a new boom in manufacturing and the land of America s staple crop cotton
