Rock Fall Engineering Duncan C. Wyllie, 2014-09-24 Rock falls can be a public safety issue This book provides comprehensive information on identification of these hazards and design and construction of protection methods Rock Fall Engineering describes first the theoretical background to rock fall behavior in terms of the impact and trajectory phases of rock falls and second how this informati Investigation of the December 12, 2013, fatal rock fall at 368 West Main Street, Rockville, Utah Willian R. Lund, Tyler R. Knudsen, Steve D. Bowman, 2014-03-26 On the afternoon of December 12 2013 a large joint controlled block of the Shinarump Conglomerate Member of the Chinle Formation with an estimated volume of almost 1400 cubic yards and weighing about 2700 tons detached from the cliff face at the top of the Rockville Bench in Rockville Utah The block fell on to the steep Moenkopi Formation slope below the cliff and shattered into numerous cobble to very large boulder sized fragments The fragments moved rapidly downslope before striking and destroying a house detached garage and car at 368 West Main Street in Rockville The two occupants in the house were killed The purpose of this 20 page investigation was to document the characteristics of the fatal rock fall evaluate future rock fall hazard at and near the site and provide recommendations for homeowners the Town of Rockville and other officials to consider in managing rock fall risk Although the first fatal event this rock fall is the sixth large rock fall within the Town of Rockville in the 35 years prior to December 12 2013 Five of those events occurred within the past nine years and at least three of those struck and damaged structures at the base of the Rockville Bench **Engineering Geology for a Habitable Earth: IAEG XIV Congress 2023 Proceedings, Chengdu, China** Sijing Wang, Runqiu Huang, Rafiq Azzam, Vassilis P. Marinos, 2024-08-30 This book collects the selected papers of the XIV Congress of the International Association for Engineering Geology and the Environment held in Chengdu Sichuan China from September 21st 27th 2023 with the theme of Engineering Geology for a Habitable Earth The meeting proceedings analyses the dynamic role of engineering geology in our changing world The congress is expected to enhance the inter disciplinary research development of international engineering geology and the environment and contribute to the advancement of major projects ecological progress and habitable earth with in depth discussion in the area of engineering geology and global climate change geological hazard assessment and prevention geotechnical properties of rock and soil mass engineering geology and the environmental issues concerning marine transportation urban and ecological environment protection engineering geology and resilience engineering construction intelligent engineering geology and new theories methods and techniques in engineering geology **Landslides and Engineered Slopes. Engineering Stéphane Lambert, François Nicot, 2013-02-07 Rockfall Engineering is an up to date international picture of the state of the art in rockfall engineering The three basic stages of rockfalls are considered the triggering stage the motion stage and the interaction with a structure stage along with contributions including structural characterization of cliffs remote monitoring stability analysis boulder propagation design of protection structures an risk assessment Academic contributions are illustrated by practical examples and completed by engineering contributions where practical purposes are thoroughly considered This title is intended for engineers students as well as researchers Optimisation of Cushion Materials for Rockfall Protection Galleries Ravikiran Chikatamarla, 2007 **Advances in Protective Structures Research** Hong

Hao, Zhong-Xian Li, 2012-08-17 The International Association of Protective Structures IAPS was launched on 1 October 2010 in Manchester UK during the first International Conference of Protective Structures The primary purpose of IAPS is to bring researchers and engineers working in the area of protective structures together and to promote research and development work for better life and structure protection against shock and impact loads More information can be found at <http://www.protectivestructures.org/contact.html> Advances in Protective Structures Research is the first publication in a series of planned publications by IAPS It contains 13 chapters prepared by active and prominent researchers around the world in the area of protective structures It covers the dynamic material model and material properties structural response analysis structural reliability analysis impact loads and ground shock The contents of the book reflect well the current research achievements and practice in structural protection against blast and impact loads They represent the advanced international research status in theoretical derivations numerical simulations and laboratory and field tests for structure protections

Sustainable Construction Materials and Technologies Yoon-Moon Chun, Peter Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2007-05-31 The construction materials industry is a major user of the world's resources While enormous progress has been made towards sustainability the scope and opportunities for improvements are significant To further the effort for sustainable development a conference on Sustainable Construction Materials and Technologies was held at Coventry University Coventry U K from June 11th 13th 2007 to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies This book presents selected important contributions made at the conference Over 190 papers from over 45 countries were accepted for presentation at the conference of which approximately 100 selected papers are published in this book The rest of the papers are published in two supplementary books Topics covered in this book include sustainable alternatives to natural sand stone and Portland cement in concrete sustainable use of recyclable resources such as fly ash

Geological Deformation of Sediments A. Maltman, 2012-12-06 shallow processes and for the pursuit of more Sediments are now known to undergo deformation in a wide variety of geological circumstances quantitative relationships With these goals in The deforming processes can happen on a vast mind workers are increasingly drawing on the scale and at all stages before the material be principles and methods of the well established comes fully lithified In fact as exploration of the engineering discipline of soil mechanics earth continues the widespread extent and im All this is beginning to attract wider geological portance of sediment deformation is still being interest Yet to the newcomer because progress revealed for example below the oceans and has been rapid in recent years the literature is beneath ice sheets At the same time it is still already formidable The information is scattered being realized just how varied are the resulting so even an expert on sediment deformation in a structures and how strikingly similar they can be certain setting may be unaware of analogous to those produced by the deformation of deeply problems and successes in other environments buried rocks At the same time although the same basic prin However there are few precedents to guide the ciples apply in the various geological regimes a geologist in interpreting structures that formed in subtly different terminology is evolving which unlithified sediments or in understanding the can make the subject boundaries hard to cross **Deformation and Progressive Failure in**

Geomechanics A. Asaoka, Toshihisa Adachi, F. Oka, 1997-10-23 Progressive failure has been a classical problem in the field of geotechnical engineering and has attracted considerable attention in connection with slope stability and foundation problems It is associated with strain localization or shear banding and is also related to damage in material structures As knowledge of the progressive failure mechanism increases it is now necessary to establish effective communications between researchers and engineers The International Symposium on Deformation and Progressive Failure in Geomechanics provided an opportunity for discussing recent advances in this area A total of 136 papers were contributed from 22 countries As well as these the symposium proceedings also contain 8 interim technical reports on the subject by the members of the Asian Technical Committee of the International Society for Soil Mechanics and Foundation Engineering and the Japanese Geotechnical Society National Committee on Progressive Failure in Geo structures **Tree Rings and Natural Hazards**

Markus Stoffel, Michelle Bollschweiler, David R. Butler, Brian H. Luckman, 2010-07-15 Dendrogeomorphology Beginnings and Futures A Personal Reminiscence My early forays into dendrogeomorphology occurred long before I even knew what that word meant I was working as a young geoscientist in the 1960s and early 1970s on a problem with slope movements and deformed vegetation At the same time unknown to me Jouko Alestalo in Finland was doing something similar Both of us had

seen that trees which produced annual growth rings were reacting to geomorphic processes resulting in changes in their internal and external growth patterns Dendroclimatology was an already well established field but the reactions of trees to other environmental processes were far less well understood in the 1960s It was Alestalo 1971 who first used the term dendrogeomorphology In the early 1970s I could see that active slope movement processes were affecting the growth of trees in diverse ways at certain localities I wanted to learn more about those processes and try to extract a long term chronology of movement from the highly diverse ring patterns
