Rock Art of East Mexico and Central America Matthias Strecker,1979 **Rock Art of East Mexico and Central America** Matthias Strecker,1982-12-31 *Introduction To Library Research In Anthropology* John M. Weeks,2019-04-11

This book is an introduction to library research in anthropology written primarily for the undergraduate student about to begin a research project It contains a summary description of the type of resource being discussed and its potential use in a research project **An Archaic Mexican Shellmound and Its Entombed Floors** Barbara Voorhies,2015-12-31

Tlacuachero is the site of an Archaic period shellmound located in the wetlands of the outer coast of southwest Mexico This book presents investigations of several floors that are within the site s shell deposits that formed over a 600 800 year interval during the Archaic period ca 8000 2000 BCE a crucial timespan in Mesoamerican prehistory when people were transitioning from full blown dependency on wild resources to the use of domesticated crops The floors are now deeply buried in an limited area below the summit of the shellmound The authors explore what activities were carried out on their surfaces discussing the floors patterns of cultural features sediment color density and types of embedded microrefuse and phytoliths as well as chemical signatures of organic remains The studies conducted at Tlacuachero are especially significant in light of the fact that data rich lowland sites from the Archaic period are extraordinarily rare the wealth of information gleaned from the floors of the Tlacuachero shellmound can now be widely appreciated **Moche Tombs at Dos Cabezas** Christopher B.

Donnan,2007-12-31 Moche civilization flourished on the north coast of Peru between approximately AD 100 and 800 Although the Moche had no writing system they left a vivid artistic record of their beliefs and activities in beautifully modeled and painted ceramic vessels remarkable objects of gold silver and copper sumptuous textiles and carved and inlaid bone wood and stone Tens of thousands of these objects can be seen today in museums and private collections throughout the world Unfortunately nearly all of them have been looted from Moche tombs by grave robbers and thus there is no record of the grave or the archaeological site or even the valley from which they came This lack of information severely limits what could have been learned about the Moche if the graves had been excavated archaeologically and their contents systematically recorded This study focuses on five extraordinary Moche tombs that were archaeologically excavated at the site of Dos Cabezas The tombs are remarkable not only for the wealth of objects they contained but also because we know how the tombs were constructed how they relate to one another both spatially and temporally and what individuals they contained The tombs provide an unusual opportunity to understand aspects of Moche funerary practice that are lost when tombs are looted and to appreciate the extraordinary artistic and technological sophistication of this ancient Peruvian civilization **Visions of Tiwanaku** Charles Stanish,Alexei Vranich,2013-12-31

For over half a millennium the megalithic ruins of Tiwanaku in the highlands of the Andes mountains have stood as proxy for the desires and ambitions of various empires and political agendas in the last hundred years scholars have attempted to answer the question What was Tiwanaku

by examining these shattered remains from a distant preliterate past This volume contains twelve papers from senior scholars whose contributions discuss subjects from the farthest points of the southern Andes where the iconic artifacts of Tiwanaku appear as offerings to the departed to the heralded ruins weathered by time and burdened by centuries of interpretation and speculation Visions of Tiwanaku stays true to its name by providing a platform for each scholar to present an informed view on the nature of this enigmatic place that seems so familiar yet continues to elude understanding by falling outside our established models for early cities and states

The South American Camelids Duccio Bonavia, 2009-02-01

One of the most significant differences between the New World's major areas of high culture is that Mesoamerica had no beasts of burden and wool while the Andes had both Four members of the camelid family wild guanacos and vicunas and domestic llamas and alpacas were native to the Andes South American peoples relied on these animals for meat and wool and as beasts of burden to transport goods all over the Andes In this book Duccio Bonavia tackles major questions about these camelids from their domestication to their distribution at the time of the Spanish conquest One of Bonavia's hypotheses is that the arrival of the Europeans and their introduced Old World animals forced the Andean camelids away from the Pacific coast creating the mistaken impression that camelids were exclusively high altitude animals Bonavia also addresses the diseases of camelids and their population density suggesting that the original camelid populations suffered from a different type of mange than that introduced by the Europeans This new mange he believes was one of the causes behind the great morbidity of camelids in Colonial times In terms of domestication while Bonavia believes that the major centers must have been the puna zone intermediate zones he adds that the process should not be seen as restricted to a single environmental zone Bonavia's landmark study of the South American camelids is now available for the first time in English This new edition features an updated analysis and comprehensive bibliography In the Spanish edition of this book Bonavia lamented the fact that the zooarchaeological data from R S MacNeish's Ayacucho Project had yet to be published In response the Ayacucho's Project's faunal analysts Elizabeth S Wing and Kent V Flannery have added appendices on the Ayacucho results to this English edition This book will be of broad interest to archaeologists zoologists social anthropologists ethnohistorians and a wide range of students

New Perspectives on Prehistoric Art Günter Berghaus, 2004-04-30

Following the discovery of Franco Caribbean cave art in the nineteenth century standard interpretations of these works usually revolved around hunting magic and fertility cults Orthodox positions such as these have weighed heavily on later generations of art historians archaeologists and anthropologists even those whose views dissented from those of their predecessors In the last few decades however new approaches to cave art often based on discoveries made in Africa Asia Australia North America and the Arctic region have produced new insights into possible meanings and functions of prehistoric paintings and sculptures This new collection of essays explores these insights gathering the observations of eight experts from a variety of disciplines and examining some of the social and spiritual functions of a variety of artistic genres ranging from 40 000 B C to 5 000 B C

These insights which derive from evolutionary biology feminist scholarship ritual studies and new modes of anthropology argue collectively that prehistoric art was a culture specific form of communication that should be interpreted in the social context of early hunter gatherer societies and should not be measured with the criteria and paradigms of modern art

Essential reading for anyone interested in prehistoric art or its cultural implications this volume represents a bold step forward in the research and analysis of the very first artists *Rock Art at Little Lake* John C. Bretney, Gordon Hull, Jo Anne Van Tilburg, 2012-12-31 Recipient of the Jo Anne Stolaroff Cotsen Prize The product of ten years of fieldwork at Little Lake Ranch in the Rose Valley the southern gateway to the Owens Valley this book presents the results of intensive rock art analyses carried out by the interdisciplinary research team of the UCLA Rock Art Archive The research attempts to establish a connective web of associations to break down traditional but artificial barriers between rock art and the rest of archaeology Through time honored methods of stylistic analysis the focus is on recent breakthroughs in the analysis of meaning and religion in the context of landscape attributes and ecological opportunities Regional or ethnic differences suggested by the rock art record has made it possible to create a flexible analytical framework containing previously unpublished or overlooked archaeological excavation and object data This book describes the occurrence concentration distribution and formal variation of pecked and painted motifs Scratched pecked and painted patterns are analyzed separately Full color illustrations throughout enhance the physical appeal of this beautiful book **Altera Roma** Claire L. Lyons, John M. D. Pohl, 2016-12-31 Altera Roma explores the confrontation of two cultures European and Amerindian and two empires Spanish and Aztec In an age of exploration and conquest Spanish soldiers missionaries and merchants brought an array of cultural preconceptions Their encounter with Aztec civilization coincided with Europe's rediscovery of classical antiquity and Tenochtitlan came to be regarded a second Rome or altera Roma Iberia's past as the Roman province of Hispania served to both guide and critique the Spanish overseas mission The dialogue that emerged between the Old World and the New World shaped a dual heritage into the unique culture of Nueva Espana In this volume ten eminent historians and archaeologists examine the analogies between empires widely separated in time and place and consider how monumental art and architecture created theater states a strategy that links ancient Rome Hapsburg Spain prequest Mexico and other imperial regimes The Archaeology of Political Organization Barbara L. Stark, 2022-01-01 In this volume Barbara Stark examines settlement in the coastal plain of lowland Mesoamerica which was richly endowed with fertile soil and valued tropical resources such as jaguars cacao avian species with bright plumage and cotton The book provides basic archaeological data about regional settlement from three decades of survey research in south central Veracruz in the western lower Papaloapan basin a region with low density urbanism The data reveals political and social change with consolidation of wealth by elite families during the Late Classic period The political analysis considers archaeological evidence related to several organizational principles collective versus autocratic corporate versus exclusionary network and

segmentary unspecialized versus specialized Many variables related to these principles used by other scholars are either suited to historically documented states not archaeological ones or ambiguous Many published studies either focus on a particular city or use documents or other evidence drawn from the top of the settlement hierarchy characterizing the whole society politically from a biased sample This political analysis is regional in scope and attentive to variation in the settlement hierarchy providing a guidepost to analysis of political principles with archaeological data **Roman Foodprints at Berenike** Rene T. J. Cappers, 2006-12-31 During the Graeco Roman period Berenike served as a gateway to the outside world together with Myos Hormos Commodities were imported from Africa south of the Sahara Arabia and India into the Greek and Roman Empire the importance of both harbors evidenced by several contemporary sources Between 1994 and 2002 eight excavation seasons were conducted at Berenike by the University of Delaware and Leiden University the Netherlands This book presents the results of the archaeobotanical research of the Roman deposits It is shown that the study of a transit port such as Berenike located at the southeastern fringe of the Roman Empire is highly effective in producing new information on the import of all kinds of luxury items In addition to the huge quantities of black pepper plant remains of more than 60 cultivated plant species could be evidenced several of them for the first time in an archaeobotanical context For each plant species detailed information on its possible origin its use its preservation qualities and the Egyptian subfossil record is provided The interpretation of the cultivated plants including the possibilities of cultivation in Berenike proper is supported by ethnoarchaeobotanical research that has been conducted over the years The reconstruction of the former environment is based on the many wild plant species that were found in Berenike and the study of the present desert vegetation **Ancient Americans** Juan Schobinger, 2016-12-05 Lavishly illustrated in full color and black and white this handsome reference provides a broad survey of the rich artistic heritage of pre Columbian North and South America Meticulously researched by archaeologists and anthropologists the set features dramatic close ups of engraved rock artifacts cave paintings pottery and inscribed and sculpted bones Covering the entire two continents from present day Canada in the far north through Central America and down to the Andes Mountains and Patagonia in the south it is a stunning visual and written record of the great variety of artworks created by Neolithic American peoples over many millennia **Village Potters of the Troodos Mountains** Gloria London, 2024-03-01 Village Potters of the Troodos Mountains Ceramic Production in Agios Demetrios Cyprus 1891 2002 by Gloria London is a study of four generations of female potters working in a remote Cypriot mountain village Their coil built jars jugs cookware beehives ovens and decorative pots are the subject of the author's ethnoarchaeological research including her quantitative data on pot sizes production rates firing times and rate of loss This data will serve archaeologists worldwide who are concerned with craft specialization and standardization learning frameworks markings on pots and identifying production locations **People of Ancient Daunia** Camilla Norman, 2024-06-01 The statue stelae of Early Iron Age Daunia north Apulia Italy a group of stone slabs are each incised to represent the garb and accoutrements of a person

They detail the clothing and adornment worn by men and women in full regalia plus through additional figurative images drawn on the robes show ritual practices everyday activities and scenes of local legend As such they offer an unparalleled window into the lives of a proto historic people providing a rich source of self representation for what is otherwise a fairly poorly understood society Grounded in the scholarship of post colonial and gender archaeology this book pays full respect to the agency of indigenous communities and the important role of women It considers the stelae not through a Hellenic lens but in the Italo Adriatic context to which they belong This is the first time an in depth holistic study of the Daunian stelae has been undertaken and the first presentation of the material in English *An Investigation into Early Desert Pastoralism*

Steven A. Rosen, 2011-10-11 Negev focuses on two primary purposes one theoretical methodological and the second substantive Briefly stated the book comprises a case study of excavations at an early ca 2800 B C pastoral site in the Negev providing detailed analyses and a synthetic overview of a seasonal encampment from this early period in the evolution of desert pastoral societies It thus both demonstrates the feasibility of an archaeology of early mobile pastoralism and grapples with the basic anthropological and methodological issues surrounding the subject Substantively both the architectural and material culture assemblages uncovered constitute the first detailed analysis of this early desert culture and include materials previously unreported for the region and period Historically the Camel Site is placed in a larger perspective of the beginnings of multiresource nomadism in relation to the rise of complex societies Kasapata and the Archaic Period of the Cuzco Valley Brian S. Bauer, 2007-12-31 Although the Cuzco Valley of Peru is renowned for being the heartland of the Incas little is known concerning its pre Inca inhabitants Until recently it was widely believed that the first inhabitants of the Cuzco Valley were farmers who lived in scattered villages along the valley floor ca 1000 BC and that there were no Archaic Period remains in the region This perspective was challenged during a systematic survey of the valley when numerous preceramic sites were found Additional information came from excavations at the site of Kasapata the largest preceramic site identified during the survey It is now clear that the Cuzco Valley was inhabited like many other regions of the Andes soon after the retreat of the Pleistocene glaciers and that it supported thriving cultures of hunters and foragers for hundreds of generations before the advent of permanent settlements This edited volume provides the first overview of the Archaic Period 9000 2200 BC in the Cuzco Valley The chapters include a detailed discussion of the distribution of Archaic sites in the valley as well as the result of excavations at the site of Kasapata Separate chapters are dedicated to examining the lithics human burials faunal remains and obsidian recovered at this remarkably well preserved site *Excavations at Cerro Azul, Peru* Joyce Marcus, 2008-12-31 Recipient of the Jo Anne Stolaroff Cotsen Prize During the Late Intermediate period AD 1100 1470 the lower Canete Valley of Peru was controlled by the walled Kingdom of Huarco While inland sites produced irrigated crops the seaside community of Cerro Azul 130 km south of Lima produced fish for the rest of the kingdom Cerro Azul s noble families lived in large multipurpose compounds with tapia walls Their pottery had its strongest ties with valleys to the south such as

Chincha and Ica During the course of excavation the University of Michigan Project excavated two tapia buildings in their entirety saving every sherd from every room walled work area feature and midden This remarkable volume is the final site report on the architecture and pottery of Late Intermediate Cerro Azul Vilcabamba and the Archaeology of Inca Resistance Brian S. Bauer, Javier Fonseca Santa Cruz, Miriam Araoz Silva, 2015-12-31 The sites of Vitcos and Espiritu Pampa are two of the most important Inca cities within the remote Vilcabamba region of Peru The province has gained notoriety among historians archaeologists and other students of the Inca since it was from here that the last independent Incas waged a nearly forty year long war AD 1536 1572 against Spanish control of the Andes Building on three years of excavation and two years of archival work the authors discuss the events that took place in this area speaking to the complex relationships that existed between the Europeans and Andeans during the decades that Vilcabamba was the final stronghold of the Inca empire This has long been a topic of interest for the public the results of the first large scale scientific research conducted in the region will be illuminating for scholars as well as for general readers who are enthusiasts of this period of history and archaeology **Images from the Underworld** Andrea J. Stone, 2010-07-05 An in depth look at Maya cave painting from Preconquest times to the Colonial period plus a complete visual catalog of the cave art of Naj Tunich In 1979 a Kekchi Maya Indian accidentally discovered the entrance to Naj Tunich a deep cave in the Maya Mountains of El Peten Guatemala One of the world s few deep caves that contain rock art Naj Tunich features figural images and hieroglyphic inscriptions that have helped to revolutionize our understanding of ancient Maya art and ritual In this book Andrea Stone takes a comprehensive look at Maya cave painting from Preconquest times to the Colonial period After surveying Mesoamerican cave and rock painting sites and discussing all twenty five known painted caves in the Maya area she focuses extensively on Naj Tunich Her text analyzes the images and inscriptions while photographs and line drawings provide a complete visual catalog of the cave art some of which has been subsequently destroyed by vandals This important new body of images and texts enlarges our understanding of the Maya view of sacred landscape and the role of caves in ritual It will be important reading for all students of the Maya as well as for others interested in cave art and in human relationships with the natural environment Not only an extraordinarily detailed and insightful analysis of the painted representations and texts found in Naj Tunich but also a complete survey of all known Maya painted caves A major monograph on a major Maya site For completeness of presentation for clarity of writing and for depth and scope of analysis Images from the Underworld is a model of what a final report should be Journal of Anthropological Research
