Rocket Fighter:

Rocketing Into the Future Michel van Pelt, 2012-05-30 This book describes the technology history and future of rocket planes Michel van Pelt journeys into this exciting world examining the exotic concepts and actual flying vehicles that have been devised over the last hundred years He recounts the history of rocket airplanes from the early pioneers who attached simple rockets onto their wooden glider airplanes to the modern world of high tech research vehicles The author visits museums where rare examples of early rocket planes are kept and modern laboratories where future spaceplanes are being developed He explains the technology in an easily understandable way describing the various types of rocket airplanes and looking at the possibilities for the future Michel van Pelt considers future spaceplanes presenting various modern concepts and developments He describes the development from cutting edge research via demonstrator vehicles to operational use He also evaluates the replacement of the Space Shuttle with a seemingly old fashioned capsule system the parallel developments in suborbital spaceplanes such as SpaceShipOne and SpaceShipTwo piloted versus automatic flight and related developments in airliners and military aircraft

Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945 Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen They proposed rotating wing ramjet fighters arrowhead shaped rammers rocket firing bat winged gun platforms sleek speed machines tailless flying wings tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors *Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945* by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs illustrations and period documentation from archives around the world

Energiya-Buran Bart Hendrickx, Bert Vis, 2007-12-05 This absorbing book describes the long development of the Soviet space shuttle system its infrastructure and the space agency's plans to follow up the first historic unmanned mission The book includes comparisons with the American shuttle system and offers accounts of the Soviet test pilots chosen for training to fly the system and the operational political and engineering problems that finally sealed the fate of Buran and ultimately of NASA's Shuttle fleet

Spaceships Ron Miller, 2016 An illustrated guide to real and imagined spaceships and how popular

culture influenced the development of each Provided by publisher Code Name Caesar Jerome Preisler, Kenneth Sewell, 2013-07-02 In the waning days of World War II a little known battle took place under the frozen seas off the coast of Norway and changed the course of the war In February of 1944 Germany and Japan devised a desperate plan to escape defeat The Germans would send Japan a submarine boat U 864 packed with their most advanced rocket and jet aircraft technology Japan could then reestablish air superiority in the Pacific drawing the attention of Allied forces long enough for Germany to regroup Meanwhile British code breakers working with the Norwegian underground had discovered the plan But even though they were unable to stop the submarine from embarking the British submarine HMS Venturer was waiting for it at sea In a cat and mouse battle beneath the waves they hunted one another each waiting to strike The Venturer won the game becoming the only submarine in history to sink another sub in underwater combat This is the dramatic action packed account of one of the greatest unsung victories in military history and of a historical moment in the annals of naval warfare

Fighters of the Dying Sun Justo Miranda, 2021-07-11 The first B 29 flew over Tokyo on 1 November 1944 It was a photographic reconnaissance aircraft ironically named Tokyo Rose The Ki 44 fighters of the 47th Sentai took off to intercept it but as it turned out the Superfortress flew at such an altitude and speed that they could not reach it The Ki 44 II Otsu had been specifically designed for this type of interception and could reach the astonishing rate of climb of 5 000 m in four minutes however it was not good enough During the following ten months a devastating bombing campaign of thousands of Superfortress destroyed 67 Japanese cities and half of Tokyo The cultural shock and the political consequences were huge when it was realised that the Japanese industry was not able to produce the specially heat and stress resistant metallic alloys that were required to manufacture the turbo superchargers needed by the fighters in charge of defending the Japanese mainland They lacked the essential chromium and molybdenum metals to harden the steel This fact thwarted the manufacturing of numerous advanced projects of both conventional fighters and those derived from the transfer of German technology fitted with turbojets and rocket engines They are thoroughly described in this book **Hawker's Secret Projects** Christopher Budgen, 2023-12-21 Hawker Aircraft Ltd at Kingston was arguably the most successful and long lasting manufacturer of military aircraft in Great Britain and Europe In its various evolved manifestations Hawker Aircraft Hawker Siddeley Aviation British Aerospace its output of war winning aircraft mainly fighters was unsurpassed From the Hart and

Hurricane through the Hunter Harrier and Hawk the company consistently produced aircraft that the UK fighting services wanted But some designs for whatever reason failed to reach flight or were declined by the services With their sometimes advanced aerodynamics and technology these aircraft could have had successful service careers but instead were abandoned their stories failing to reach mainstream consciousness Having not received their just dues the present book seeks to redress this omission The reasons for failure are many and varied often financial or political but in each case the reasons behind the failure of the design are examined In a wide ranging investigation that documents the origins of Hawker Aircraft Ltd and its famous Project Office this work the third in Christopher Budgen s investigation of the inner workings of Hawker Aircraft is a fitting tribute to the many who made the company the success it was **Flying Magazine** ,1950-01 **Cold War Delta Prototypes** Tony Buttler,2020-12-24 The fascinating history of how the radical delta wing became the design of choice for early British and American high performance jets and of the role legendary aircraft like the Fairey Delta series played in its development At the dawn of the supersonic jet age aircraft designers were forced to devise radical new planforms that suited the new power of the jet engine One of the most successful was the delta wing Although Gloster produced the delta wing Javelin and Boulton Paul its P 111 research aircraft Fairey and Avro were the champions of the delta in Britain Meanwhile in America with the exception of Douglas s Navy jet fighter programmes Convair largely had the delta wing to itself These development lines one on each side of the Atlantic had essentially the same objective to produce high speed fighter aircraft In Britain the Fairey Delta 2 went on to break the World Air Speed Record in spectacular fashion but it failed to win a production order In contrast Convair received major orders for two jet fighter types and one jet bomber At the same time the British Avro company built the 707 family of research aircraft which led to the famous Vulcan to show how the delta wing could be adopted for a highly successful subsonic bomber This book examines the development of the delta wing in Britain and America and the way in which experimental aircraft like the Fairey Deltas proved their potential and versatility In Britain it covers the Fairey Delta 1 and Fairey Delta 2 the proposed Fairey Delta Rocket Fighter and huge Delta 3 long range interceptor and the Avro 707 On the American side it examines the Convair XF 92 and XF 92A the development of the Delta Dagger Delta Dart family and the Convair Sea Dart the world s only supersonic seaplane *Deep Space Probe: KRONOS* John Macurdy,2023-05-11 A manned deep space mission goes horribly wrong Decades in the future when near light speed space travel is a reality an explosion rips through deep space probe Kronos crippling it killing half the crew and terminating their assignment The Perseverance a new class of military ship with the capacity to catch up to Kronos is launched carrying the uncanny Colonel Bruce on board His ability to overcome every obstacle coupled with a secret mission he can t reveal makes him a formidable if inscrutable hero Murder and sabotage become commonplace onboard ship It is up to Colonel Bruce to unravel the mystery and live long enough to tell all that he knows When President of the United States Robert Hughes Daley saves a survivor of a flying vehicle off the coast of the Seychelles What say we take your helmet off and let you

breathe some fresh air Captain Good idea the pilot exasperated wearily He then touched a button at his wrist and the helmet came off with another hiss of an airtight seal being broken The pilot then reached up and removed the helmet completely Daley could only stare in confusion The skin color the shape of the eyes texture of hair the teeth oh my God the teeth The pilot for gross appearances was human but upon further examination was no more human than the orangutans of Borneo

Aircraft Armament Louis Bruchiss,1945 U.S. Air Services ,1945 **Jet Fighters** Michael John Haddrick Taylor,1982 **NASA Technical Translation** ,1969 *Collision of Empires* A. D. Harvey,1993-07-01 The only previous war to match the world wars of the twentieth century in scale and impact was the French War of 1793 1815 This book is the first book to compare these conflicts which together shaped the history of the modern world A D Harvey relates the causes conduct and outcome of these wars to the fundamental nature of the societies which fought them Political decisions economic power and social attitudes interfaced with the demands of military technology to determine the outcome of each case Britain is the centre of focus but is seen against a background of the other combatants Harvey s ability to make large scale generalisations is backed up by a wealth of fascinating and carefully documented detail making this outstanding and exceptionally well written book a pleasure to read The author has tackled a huge subject and has not been afraid to face up to either its complexities or its implications By asking new questions and using a range of unfamiliar sources this book provides an unusually profound analysis not only of these wars but also of the nature of modern society and of our understanding of the past The Last Year of the Luftwaffe Alfred Price,2015-11-30 A historian analyzes Nazi Germany s air force during its final year before Allied forces brought an end to World War II in Europe The Last Year of the Luftwaffe is the story of a once all conquering force struggling to stave off an inevitable and total defeat This book gives a complete account of Luftwaffe operations during the last twelve months of the fighting in Europe including the dramatic Bodenplatte or Baseplate offensive over the Ardennes in December 1944 In this comprehensive examination of Hitler s air force Dr Alfred Price examines its state from May 1944 to May 1945 analyzing not only the forces available to it but also the likely potential and impact of new aircraft and weapons systems He also assesses the Luftwaffe s High Command s performance and the effect of Allied attacks and operations In doing so he rejects several long standing myths clarifies the impact of the jet and rocket fighters and demonstrates that the Luftwaffe performed as well as could be expected under the harsh circumstances of fighting a losing war
