Rockets Peter Macinnis,2003-07-01 A fascinating history of the development of rockets from gunpowder filled sticks of bamboo to interstellar commercial satellites Rockets Peter Macinnis,2003-07-01 A fascinating history of the development of rockets from gunpowder filled sticks of bamboo to interstellar commercial satellites **Space Warfare and Defense**

Bert Chapman,2008-03-19 This timely resource provides a history of the development of space weapons and warfare strategies and a comprehensive reference guide to the growing literature on the subject Space Warfare and Defense A Historical Encyclopedia and Research Guide provides comprehensive coverage of the development of space as a possible arena for warfare exploring the military uses of space past present and future and specific details of actual space weapons systems The encyclopedia spans the breadth of U S military space policy comparable programs in the Soviet Union China and the European Union and the full array of international agreements designed to regulate the military uses of space In addition the encyclopedia includes an extensive reference guide nearly 40 percent of the book directing readers to the essential literature on space weapons and defense systems produced by the United States other governments research institutions and additional sources At a time when space is becoming an increasingly important place of military competition and potential conflict Space Warfare and Defense dispels the myths and examines the realities of what may become humanity s ultimate battlefield *To a Distant Day* Chris Gainor,2020-04-01 Insightful instructive and definitely worth the read Greg Andres Journal of the Royal Astronomical Society of Canada As someone who has been teaching a course on space exploration for many years and has visited most of NASA s space centers I have found plenty of new and valuable material in *To a Distant Day* I recommend the book to all who wish to know more about the conditions people and discoveries between 1890 and 1960 that led to the space age Pangratios Papacosta Physics Today Although the dream of flying is as old as the human imagination the notion of rocketing into space may have originated with Chinese gunpowder experiments during the Middle Ages Rockets as both weapons and entertainment are examined in this engaging history of how human beings acquired the ability to catapult themselves into space Chris Gainor s irresistible narrative introduces us to pioneers such as Konstantin Tsiolkovsky Robert Goddard and Hermann Oberth who pointed the way to the cosmos by generating the earliest wave of international enthusiasm for space exploration It shows us German engineer Wernher von Braun creating the V 2 the first large rocket which though opening the door to space failed utterly as the wonder weapon it was meant to be From there Gainor follows the space race to the Soviet Union and the United States giving us a close look at the competitive hysteria that led to Sputnik satellites space probes and finally human flight into space in 1961 As much a story of cultural ambition and personal destiny as of scientific progress and technological history *To a Distant Day* offers a complete and thoroughly compelling account of humanity s determined efforts sometimes poignant sometimes amazing sometimes mad to leave the earth behind **Into That Silent Sea** Francis French,Colin Burgess,2007 A history of early space flight focuses on the

careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles

By Accident or Design Paul Fyfe, 2015-03-19 On the banks of the Thames it is a tremendous chapter of accidents As Henry James surveys London in 1888 he sums up what had fascinated urban observers for a century the random and even accidental development of this unprecedented form of human settlement the modern metropolis *By Accident or Design* Writing the Victorian Metropolis takes James at his word arguing that accident was both a powerful metaphor and material context through which the Victorians arrested the paradoxes of metropolitan modernity and reconfigured understandings of form and change Paul Fyfe shows how the material conditions of urban accidents offer new and compelling modes of analysis for intellectual and literary history Through extensive archival study and interdisciplinary analysis of urban industrial accidents risk management and civic improvements *By Accident or Design* reclaims the metropolis as ground zero for some of the most important thinking about causation in the nineteenth century It demonstrates the centrality of interdependent concepts of design and accident not only to metropolitan discourse but also to current critical discourse about the formal and circulatory dynamics of Victorian metropolitan writing Thus this book offers a new vocabulary for the dialectics of the modern city and the signature forms of writing about it including the newspaper the illustrated periodical the industrial novel and urban broadsheets

The Killer Bean of Calabar and Other Stories Peter Macinnis, 2004-07-01 A triumphantly toxic tome As a dedicated Macinnis fan I relish this latest display of erudition story telling and fun One of his very best Robyn Williams Head ABC Science Unit Was Abraham Lincoln really as mad as a hatter Who poisoned Phar Lap Can wallpaper really kill Was Jack the Ripper an arsenic eater Painting a broad canvas from the early Egyptians to the arsenical tube wells in Bangladesh and the Sarin gas attacks in a Tokyo subway *The Killer Bean of Calabar* explores the accidental and intentional tales of poisons and their use throughout history Historically difficult substances to trace poisons have been used by many for their own dastardly purposes from the Great Poisoners such as Nero and Madame de Brinvilliers to the mass gassings of World War II But the truly great poisoners are those who make selective use of poisons to save human life not the few who use poison to take human life Most of the medicines we take are themselves poisons therapeutic only by virtue of being more deadly to our viruses than to us Poisons are all around us from the plants in our gardens and lead in our homes to the bacteria and toxins in our bodies With ripping yarns and unusual views of famous people Macinnis explains the whys and wherefores of poisons and poisoning

Poisons Peter Macinnis, 2011-05-15 Poisons permeate our world They are in the environment the workplace the home They are in food our favorite whiskey medicine and well water They have been used to cure diseases as well as incapacitate and kill They smooth wrinkles block pain stimulate and enhance athletic ability In this entertaining and fact filled book science writer Peter Macinnis considers poisons in all their aspects He recounts stories of the celebrated poisoners in history and literature from Nero to Thomas Wainewright and from the death of Socrates to Hamlet and Peter Pan From cyanide to strychnine from Botox to ricin and Sarin gas have you ever wondered about their

sources Where do they come from How do you detect something that can kill you in a matter of seconds Macinnis methodically analyzes the science of these killing agents and their uses in medicine cosmetics war and terrorism With wit and precision he weighs these questions and many more Was Lincoln s volatility caused by mercury poisoning Was Jack the Ripper an arsenic eater Can wallpaper kill For anyone who has ever wondered and been afraid to ask here is a rich miscellany for your secret questions about toxins **Australasian Science** ,2003-05 **The Publishers Weekly** ,2004

Solid Rocket Propellants Haridwar Singh,Himanshu Shekhar,2016-12-06 Propellants contain considerable chemical energy that can be used in rocket propulsion Bringing together information on both the theoretical and practical aspects of solid rocket propellants for the first time this book will find a unique place on the readers shelf providing the overall picture of solid rocket propulsion technology Aimed at students engineers and researchers in the area the authors have applied their wealth of knowledge regarding formulation processing and evaluation to provide an up to date and clear text on the subject
