Something Wonderful Todd S. Purdum,2018-04-03 A revelatory portrait of the creative partnership that transformed musical theater and provided the soundtrack to the American Century They stand at the apex of the great age of songwriting the creators of the classic Broadway musicals Oklahoma Carousel South Pacific The King and I and The Sound of Music whose songs have never lost their popularity or emotional power Even before they joined forces Richard Rodgers and Oscar Hammerstein II had written dozens of Broadway shows but together they pioneered a new art form the serious musical play

Their songs and dance numbers served to advance the drama and reveal character a sharp break from the past and the template on which all future musicals would be built Though different in personality and often emotionally distant from each other Rodgers and Hammerstein presented an unbroken front to the world and forged much more than a songwriting team their partnership was also one of the most profitable and powerful entertainment businesses of their era They were cultural powerhouses whose work came to define postwar America on stage screen television and radio But they also had their failures and flops and more than once they feared they had lost their touch Todd S Purdum's portrait of these two men their creative process and their groundbreaking innovations will captivate lovers of musical theater lovers of the classic American songbook and young lovers wherever they are He shows that what Rodgers and Hammerstein wrought was truly something wonderful *Oscar Hammerstein II and the Invention of the Musical* Laurie Winer,2023-01-31 A new look at artist Oscar Hammerstein II as a pivotal and underestimated force in the creation of modern American culture You know his work *Show Boat* *Oklahoma* *Carousel* *The King and I* But you don't really know Oscar Hammerstein II the man who more than anyone else invented the American musical Among the most commercially successful artists of his time he was a fighter for social justice who constantly prodded his audiences to be better than they were Diving deep into Hammerstein's life examining his papers and his lyrics critic Laurie Winer shows how he orchestrated a collective reimagining of America urging it forward with a subtly progressive vision of the relationship between country and city rich and poor America and the rest of the world His rejection of bitterness his openness to strangers and his optimistic humor shaped not only the musical but the American dream itself His vision can continue to be a touchstone to this day *Show Music* ,1996 **Historical Dictionary of the Broadway Musical** William A. Tropical Cool: A Buddhist Manual of Air Conditioning

,2018-02-03 A case can be made and has been made by Pope Francis that the extensive use of air conditioning use in the developed world especially the United States is a careless excess and poor example to the rest of the world Indeed it makes a mockery of the current ideology of energy sustainability including concerns about prevention of global warming Extension of wasteful practices of air conditioning to emerging economies like India is easily shown to be unsustainable As with other recalcitrant problems such as over reliance on cars and poor personal health and dietary habits smoking processed foods the source of the problem is found individual moral choices that are championed as individual freedoms but actually represent a degenerate morality which yields more benefit to corporations and big government than to people The Buddhist ethic provides one path into the heart of human choices illuminating as it does the incorrect thinking that underlies bad choices including those that most people think are based on common sense and scientific expertise This book applies this idea to the matter of air conditioning using Thailand and like Southeast Asian settings as an example It makes the claim that emerging western interest in mindfulness could be leveraged to introduce new thinking on personal energy use that will go much further to create true sustainability than programs based on harnessing geophysical technologies such as solar and wind
