Alvarez,2014-05-12 The Mechanics of the Digestive Tract Fourth Edition An Introduction to Gastro Enterology provides information pertinent to the mechanics of the digestive tract This book reviews the various explanations for the downward progress of intestinal waves Organized into 34 chapters this edition begins with an overview of the main types of activity in the small bowel This text then explains the nature of the polarity and the location of the mechanism that produces it Other chapters consider the duodenal tonus contraction in which the wave seems to originate generally appears a few seconds before a gastric wave reaches the pylorus This book discusses as well the polarity of the bowel that caused every contraction ring to spread caudad as soon it formed The final chapter provides a list of books that are likely to be helpful to readers who are starting on their lifework in the fields of gastro enterology and gastro intestinal physiology This book is a valuable resource for students teachers physicians and research workers *American Quarterly of Roentgenology* ,1913 **Microsurgery of the Temporo-Medial Region** Rezio R. Renella,2012-12-06 The differentiation of the temporal lobe into a lateral neocortical and a medial allocortical region is supported by developmental

anatomical and clinical evidence Although this view of a dual temporal lobe is generally accepted by neurosurgeons dealing with functional surgery it still receives little attention by those approaching structural abnormalities located or extending into the medio basal region Consequently the characterization of the temporo medial area as a distinct surgical region is still lacking The major object of this study is to analyse the medial part of the temporal lobe as a distinct surgical region and to integrate the microsurgical and physiological aspects into a concept applicable to the several types of temporo medial lesion The study includes five sections The first section is devoted to the morphological aspects the second and the third sections present a simplified clinical approach to temporo medial lesions and analyse the ancillary investigations which are indispensable for characterizing their structural and functional features The fourth section deals with the surgical aspects of temporo medial lesions and especially with the selection of the optimal approach in regard to the location of a given process and to the extent of the functional changes The last section is devoted to commentaries concerning the neuropathological aspects and the outcome of surgery in the temporo medial region
