Roger Bacon's Selected Occult Writings Roger Bacon, 2014-03-29 This Is A New Release Of The Original 1922 Edition

Roger Bacon and the Incorruptible Human, 1220-1292 Meagan S. Allen, 2023-01-01 This book examines the Franciscan alchemist Roger Bacon's 1220-1292 interest in the role of alchemy in medicine and how this interest connected with the thirteenth century milieu in which he was writing. Though twelfth century Latin alchemy had largely been concerned with transmuting base metals into noble ones, Bacon believed that the natural principles taught in alchemy would be better used in medicine. In an age where many physicians were theorizing about ways to prevent the effects of aging, Bacon held that combining alchemy and humoral medicine would allow one to extend their life by decades, even centuries. By examining Bacon's alchemical, medical, and mathematical works, this book argues that Bacon combined a number of sources to create a unique plan for prolonging human life. His understanding of disease and aging was ultimately Galenic in nature, and his understanding of how pharmaceuticals work can be traced back to his mathematical theories, especially that of the multiplication of species. The book provides a new system for organizing Bacon's alchemically produced medicines and explains what Bacon saw as the difference between each and how they could have different physiological effects. Bacon is situated within the thirteenth century contexts in which he was writing: that of the university-educated and newly professionalized medical practitioners who were invested in finding ways to extend human life, and the Franciscan order with their understanding of the innate goodness of the physical body, the resurrection, and corporeal union with God. Filling a major lacuna in scholarship on the history of medieval medical writings, this book provides vital reading for historians of medicine, pre- and early modern European science, and medieval philosophy and religion. Roger Bacon Essays Andrew George Little, 1914 *Heroes of invention and discovery, selected by the editor of 'Risen by perseverance'*. Robert Cochrane (miscellaneous writer.), 1879 *Metamorphosis* Anna-Teresa Tymieniecka, 2013-06-05 How do we endure when we and everything around us are caught up in incessant change? But the course of this change does not seem to be haphazard, and we may seek the modalities of its Logos in the transformations in which it occurs. The classic term Metamorphosis focuses upon the proportions between the transformed and the retained, the principles of sameness and otherness. Applied to life and its becoming, metamorphosis pinpoints the proportions between the vital and the aesthetic significance of life. Where could this metaphysical in-between territory come better to light than in the Fine Arts? In this collection are investigated the various proportions between the vital significance of the constructivism of life and a specifically human contribution made by the creative imagination to the transformatory search for beauty and aesthetic values.
