In France Belgium and other Francophone countries comic strips called bande dessinée or BD in French have long been considered a major art form capable of addressing a host of contemporary issues Among French speaking intelligentsia graphic narratives were deemed worthy of canonization and critical study decades before the academy and the press in the United States embraced comics The place that BD holds today however belies the contentious political route the art form has traveled In *Drawing France* French Comics and the Republic author Joel E Vessels examines the trek of BD from it being considered a fomenter of rebellion to a medium suitable only for semi literates to an impediment to education and most recently to an art capable of addressing social concerns in mainstream culture In the mid 1800s alarmists feared political caricatures might incite the ire of an illiterate working class To counter this notion proponents yoked the art to a particular articulation of Frenchness based on literacy and reason With the post World War II economic upswing French consumers saw BD as a way to navigate the changes brought by modernization After bande dessinée came to be understood as a compass for the masses the government especially Francois Mitterand's administration brought comics increasingly into official culture Vessels argues that BD are central to the formation of France's self image and a self awareness of what it means to be French *The Francophone Bande Dessinée* Charles Forsdick, Laurence Grove, Libbie McQuillan, 2005

Known as France's Ninth Art the bande dessinée has a status far surpassing that of the equivalent English language comic strip This publication one of the first predominantly in English on the subject provides a thorough introduction to questions of BD history context and bibliography This book supplies an introduction to the BD that will be of use to students and researchers at all levels In addition the format of the individual case studies provides in depth analysis allowing the reader to grasp specific examples in terms both of their place vis a vis the evolution of the BD and more generally of the wider role they play within French and Francophone cultural studies

BOOK JACKET *Cultural Encounters in Translated Children's Literature* Helen Frank, 2014-04-08

Cultural Encounters in Translated Children's Literature offers a detailed and innovative model of analysis for examining the complexities of translating children's literature and sheds light on the interpretive choices at work in moving texts from one culture to another The core of the study addresses the issue of how images of a nation locale or country are constructed in translated children's literature with the translation of Australian children's fiction into French

serving as a case study Issues examined include the selection of books for translation the relationship between children's books and the national and international publishing industry the packaging of translations and the importance of titles blurbs and covers the linguistic and stylistic features specific to translating for children intertextual references the function of the translation in the target culture didactic and pedagogical aims euphemistic language and explicitation and literariness in translated texts The findings of the case study suggest that the most common constructs of Australia in French translations reveal a preponderance of traditional Eurocentric signifiers that identify Australia with the outback the antipodes the exotic the wild the unknown the void the end of the world the young and innocent nation and the Far West Contemporary signifiers that construct Australia as urban multicultural Aboriginal worldly and inharmonious are seriously under represented The study also shows that French translations are conventional conservative and didactic showing preference for an exotic rather than local specificity with systematic manipulation of Australian referents betraying a perception of Australia as antipodean rural exoticism The significance of the study lies in underscoring the manner in which a given culture is constructed in another cultural milieu especially through translated children's literature

A Critical History of French Children's Literature Penny Brown, 2007 *Rousseau's Daughters* Jennifer J. Popiel, 2008 Provocative assessment of how new ideas about motherhood and domesticity in pre Revolutionary France helped women demand social and political equality later on

A Critical History of French Children's Literature Penelope E. Brown, 2008-03-25 These books are the first full length comprehensive study written in English of French children's literature They provide both an overview of developments from the seventeenth century to the present day and detailed discussion of texts that are representative innovative or influential best sellers in their own time and beyond French children's literature is little known in the English speaking world and apart from a small number of writers and texts has been relatively neglected in scholarly studies despite the prominence of the study of children's literature as a discipline This project is groundbreaking in its coverage of a wide range of genres tracing the evolution of children's books in France from early courtesy books fables and fairy tales to eighteenth century moral tales and educational drama nineteenth century novels of domestic realism and adventure stories and contemporary detective fiction and fantasy novels The discussion traces the relationship between children's literature and social change revealing the extent to which children's books were informed by pedagogical moral religious and political agenda and explores the implications of the dual imperatives of instruction and amusement which have underpinned writing for young readers throughout the centuries
