Religions in Asian America Pyong Gap Min, Jung Ha Kim, 2001-12-18 The flux of Asian immigration over the last 35 years has deeply altered the United States religious landscape. But neither social scientists nor religious scholars have fully appreciated the impact of these growing communities. And Asian immigrant religious communities are significant to the study of American religion not only because there are more than ten million Asian Americans. Asian American religions differ substantially from models drawn from European religions, pushing for new wider understandings. *Religions in Asian America* provides a comprehensive overview of the religious practices of Chinese, Filipino, Indian, Korean, Japanese, Vietnamese, Cambodian, and Laotian Americans. How these new communities work through issues of gender, race, transnationalism, income disparities, and social service, and the passing along an ethnic identity to the next generation, make up the common themes that reach across essays about the varying communities. The first sociological overview of Asian American religions, *Religions in Asian America* is necessary reading for those interested in Asians, ethnicity, immigration, or religion in the United States.

Encyclopedia of American Women and Religion June Melby Benowitz, 2017-08-18 This two volume set examines women's contributions to religious and moral development in America, covering individual women, their faith-related organizations, and women's roles and experiences in the broader social and cultural contexts of their times. This second edition of *Encyclopedia of American Women and Religion* provides updated and expanded information from historians and other scholars of religion, covering new issues in religion to better describe and document women's roles within religious groups. For instance, the term evangelical feminism is one newly defined aspect of women's involvement in religious activism. Changes are constantly occurring within the many religious faiths and denominations in America, particularly as women strive to gain positions within religious hierarchies that previously were exclusive to men and rise within their denominations to become theologians, church leaders, and bishops. The entries examine the roles that American women have played in mainstream religious denominations, small religious sects, and non-traditional practices such as witchcraft, as well as in groups that question religious beliefs, including agnostics and atheists. A section containing primary documents gives readers a firsthand look at matters of concern to religious women and their organizations. Many of these documents are the writings of women who merit entries within the encyclopedia. Readers will gain an awareness of women's contributions to religious culture in America from the colonial era to the present day and better understand the many challenges that women have faced to achieve success in their religion-related endeavors.

Race, Gender, and Religion in the Vietnamese Diaspora Thien-Huong T. Ninh, 2017-08-15 This book examines how the racialization of religion facilitates the diasporic formation of ethnic Vietnamese in the U.S. and Cambodia, two communities that have been separated from one another for nearly 30 years.

It compares devotion to female religious figures in two minority religions the Virgin Mary among the Catholics and the Mother Goddess among the Caodaists Visual culture and institutional structures are examined within both communities Thien Huong Ninh invites a critical re thinking of how race gender and religion are proxies for understanding theorizing and addressing social inequalities within global contexts Ethnic Identity, Social Mobility and the Role of Soulmates Marieke Sloodman, 2018-09-21 Based on a study among higher educated adult children of lower class Turkish and Moroccan immigrants in the Netherlands this open access book explores processes of identification among social climbers with ethnic minority backgrounds Using both survey data and open interviews with these minority climbers the study details the contextual and temporal nature of identification The results illustrate how ethnicity is contextual but have tangible and inescapable effects at the same time Also the findings call for a more reflexive use of terms like ethnic ingroup outgroup and bonding bridging Overall the book helps us understand the emergence of middle class segments that articulate their minority identities and as such it will be of great interest to academics policy makers and all those interested in processes of integration and or diversity *Immigrants in American History* Elliott Robert Barkan, 2013-01-17 This encyclopedia is a unique collection of entries covering the arrival adaptation and integration of immigrants into American culture from the 1500s to 2010 Few topics inspire such debate among American citizens as the issue of immigration in the United States Yet it is the steady influx of foreigners into America over 400 years that has shaped the social character of the United States and has favorably positioned this country for globalization *Immigrants in American History Arrival Adaptation and Integration* is a chronological study of the migration of various ethnic groups to the United States from 1500 to the present day This multivolume collection explores dozens of immigrant populations in America and delves into major topical issues affecting different groups across time periods For example the first author of the collection profiles African Americans as an example of the effects of involuntary migrations A cross disciplinary approach derived from the contributions of leading scholars in the fields of history sociology cultural development economics political science law and cultural adaptation introduces a comparative analysis of customs beliefs and character among groups and provides insight into the impact of newcomers on American society and culture Religion, Families, and Health Christopher G. Ellison, Robert A. Hummer, 2010 This book is a compilation of population based research on the relationships of religion to family life and health **Race and Religion in American Buddhism** Joseph Cheah, 2011-10-28 While academic and popular studies of Buddhism have often neglected race as a factor of analysis the issues concerning race and racialization have remained not far below the surface of the wider discussion among ethnic Buddhists converts and sympathizers regarding representations of American Buddhism and adaptations of Buddhist practices to the American context In *Race and Religion in American Buddhism* Joseph Cheah provides a much needed contribution to the field of religious studies by addressing the under theorization of race in the study of American Buddhism Through the lens of racial formation Cheah demonstrates how adaptations of Buddhist practices by

immigrants converts and sympathizers have taken place within an environment already permeated with the logic and ideology of whiteness and white supremacy In other words race and religion Buddhism are so intimately bounded together in the United States that the ideology of white supremacy informs the differing ways in which convert Buddhists and sympathizers and Burmese ethnic Buddhists have adapted Buddhist religious practices to an American context Cheah offers a complex view of how the Burmese American community must negotiate not only the religious and racial terrains of the United States but also the transnational reach of the Burmese junta Race and Religion in American Buddhism marks an important contribution to the study of American Buddhism as well as to the larger fields of U S religions and Asian American studies

Appleby,2000 This text explains what religious terrorists and religious peacemakers share in common and what causes them to take different paths in fighting injustice **Health Behavior** David S. Gochman,1988-08-31 HEALTH

BEHAVIOR AS BASIC RESEARCH Health behavior is not a traditional discipline but a newly emerging interdisciplinary field. It is still in the process of establishing its identity. Few institutional or organizational structures i.e. departments and programs reflect it and few books and journals are directed at it. The primary objective of this book is thus to identify and establish health behavior as an important area of basic research worthy of being studied in its own right. As a basic research area, health behavior transcends commitment to a particular behavior, a specific illness or health problem or a single set of determinants. One way of achieving this objective is to look at health behavior as an outcome of a range of personal and social determinants rather than as a set of risk factors or as targets for intervention strategies directed at behavioral change. The book is thus organized primarily in terms of the size of the determinants of concern rather than in terms of specific health behaviors or specific health problems or conditions. With the first part of the book establishing working definitions of health behavior and health behavior research as basic frameworks, the second part moves from smaller to larger systems informing the reader about basic research that demonstrates how health behavior is determined by personal, family, social, institutional and cultural factors. These distinctions reflect some arbitrariness; the family, organizations and institutions for example are social units.

Women Struggling For a New Life Ai Ra Kim, 1996-01-01. Kim explores the religious impact, particularly that of the Korean Methodist Church, on the lives of Korean immigrant first generation in the United States. To most of these women, America is new soil and they need to adjust to a different cultural and social environment. Consequently, they may be confused and frustrated. As a community center, the Korean church plays a significant role in their lives. Kim examines the church to determine if it is helpful or detrimental to these women as they adjust to their lives in the United States. Although the history of Korean immigrants in the United States is almost 100 years old, resources about Korean immigrants, particularly women, are scarce. These women have long been invisible and unheard in American society as well as in the Korean community and church. Their experiences as minority women and their painful struggle for survival in patriarchal Korean churches reflect not only the plight of women but also genuine human struggle.

Developments in Australian Buddhism Michelle Spuler, 2014-04-04. This book examines the adaptation of Buddhism to the Australian sociocultural context. To gain insight into this process of cross-cultural adaptation, issues arising in the development of Diamond Sangha Zen Buddhist groups, one of the largest Zen lineages in the West in Australia, are contextualised within the broader framework of the adaptations of Buddhist teachings and practices in other Westernised countries. The book also examines the methodological approaches currently used for studying this process and suggests a synthesis of the approaches used for studying convert and ethnic Buddhist groups.

Mobility, Transnationalism and Contemporary African Societies Tilo Grätz, 2010-01-08. The book is meant to shed new light on migratory processes pertinent to Sub-Saharan Africa. It starts out from the position that contemporary migratory movements can only be assessed by employing an appropriate theoretical framework which helps with conceptualising both localised strategies of migrants i.e. their modes of adaptation, economic and

social integration into host societies and the way they maintain relationships back home across places and nations i.e. translocal aspects of their mobility in terms of networking communication or economic as well as cultural transfers. In this respect the book contributes to the current debate on processes and effects of worldwide mobility addressing causes and effects and the various aspects of a culture of migration relevant for the African continent. Additionally the book tries to go beyond the usual structural discussions and reflections on mobility and migration by looking at actual migrant practices, their social creativity, the employment of flexible responses to often restrictive governmental policies. Finally the volume also discusses the often neglected issue of involuntary immobility as well as the significance of borders in both limiting mobility and in creating new borderline strategies to employ a notion by Ines Kohl with regard to migrants' transnational strategies. The book addresses a wide readership in Human Sciences especially from African Studies, Anthropology, Sociology, Geography and Political Sciences.
