**Opportunities for Reference Services**

William A. Katz, 1991 Here is a refreshing new book that takes a unique look at the many aspects of reference librarianship. Written by reference librarians for reference librarians, this new volume explores the changing roles of reference services and offers advice and practical ideas to guide librarians through the increasingly tangled maze of duties being thrust upon the reference staff. Although the everyday work of the reference librarian is often taken for granted, these insightful chapters illuminate the essential service performed by the reference librarians as they facilitate access to information for a wide variety of users. Furthermore, this book helps reference librarians face the future by examining the technological and service developments that will challenge their profession. *Opportunities for Reference Librarians* addresses unique reference problems such as making use of the telephone as an information gathering tool, selecting reference material for the interdisciplinary field of Health, Physical Education and Recreation (HPER), and helping non-law students with legal research. The fascinating anecdotes and encouraging discussions will be invaluable to reference library professionals for years to come. This important book covers a wide variety of topics of interest to reference librarians. Topics related to information systems are examined, such as the limitations of end-user online services and an evaluation of the Library of Congress Information system. Authoritative contributors make recommendations on how to design services to coordinate with the new technology and how to change librarians' roles so they can assist people in using these systems. *Mentoring in Librarianship* Carol Smallwood, Rebecca Tolley-Stokes, 2011-11-08 Both new librarians and those changing directions in the field can benefit greatly from a relationship with a positive and supportive mentor. In this book, public school academic and special librarians, as well as LIS faculty and consultants, offer expertise and wisdom for those wishing to become a mentor or a protégé or to implement a mentoring program. Topics include reasons for choosing mentoring relationships, practical tips on setting up a program, internships, practicums, job shadowing, virtual reference opportunities for those new to the profession, and those in mid-career and mentoring across disciplines. By sharing their personal successes as well as their failures in mentoring, the 35 contributors offer sound advice backed by years of experience, advice that will aid all librarians who seek guidance or want to guide the future of the library profession.
