The Kuwait International Airport Terminal 2 is also a significant project to promote overseas investment in the country. The project was intended to increase the airport's capacity and support the growing demand for air travel into the country. Ultimately, it will enhance economic growth by providing a reliable transport system, a positive sign to promote overseas businesses.

Hirakawa, Ferdinand C. Maquito, 2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China's Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the

possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China

**Economic Geography** An absolute must have for college library reference shelves filled cover to cover with keen analyses that any businessperson seeking to make inroads in an Asian market needs to study at length Midwest Book Review This book serves as an important guide to the many fascinating research questions about Asian business waiting to be addressed The study of Asian business has reached equality in importance to the study of business in Europe and North America

Researchers who study any of these regions have an incentive to follow the study of business in the other regions if for no other reason than that many global firms from each region operate in all regions now Nonetheless the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research

*Pathways from the Periphery* Stephan Haggard, 1990 *Pathways from the Periphery* is an innovative interpretation of the development of the newly industrializing countries NICs which now dominate Third World industry and manufacturing trade While such countries as Brazil and Mexico have achieved industrialization through strategies intended to foster self reliance the East Asian NICs South Korea Taiwan Hong Kong and Singapore have grown rapidly through an aggressive policy promoting the export of manufactured goods Stephan Haggard provides the first comprehensive comparison of the politics of industrialization in these East Asian and Latin American countries and offers new evidence on current issues in comparative political economy including the implications of different growth paths for dependency equity and democracy Recognizing the influence on development strategies of external shocks such as depression war and reduced access to foreign capital Haggard emphasizes the importance of domestic political institutions for economic decision making The East Asian NICs are characterized by close but regulated business government alliances weak labor movements and politically insulated and administratively capable states factors Haggard shows that have facilitated flexible and coherent industrial policies He argues that domestic policy choices can shape the external constraints states face The author considers in detail why Latin America's long standing efforts to achieve self reliance have ironically resulted in a dependence on international capital greater than that of the East Asian countries Addressing a long standing debate on the relationship between industrialization strategy and regime type Haggard carefully assesses the connection between growth and democratic politics Despite their authoritarian growth models the Asian NICs have he observes achieved greater equity than their Latin American counterparts Although the success of export led growth has in the past been associated with authoritarian rule Haggard argues that no compelling

theoretical reasons preclude democratic governments from achieving strong economic performance Breaking new ground in theoretical inquiry and empirical research Pathways from the Periphery will be welcomed by political economists scholars and students of comparative politics historians of Asian and Latin American public policy and others concerned with the challenge of economic development     Transnational Corporations and Development Policy E.
