 Solidarities Sociology addresses the formation and fragmentation of identity in today's postmodern world Informed by the
 conceptual convergence in the theories of Durkheim Peirce Mead and Lacan this book surveys the range of twentieth century
 sociology to deconstruct those favored nostrums of subjective meaning personal power and autonomous selfhood that
 comprise its semantics of agency Revealed beneath this semantic screen is the triad of pragmatic codes premodern affiliation
 modern calibration and postmodern globalization that govern the social construction of the self While the ill comprehended
 confluence of these three signification codes in the present world situation can indeed fragment personal identity their
 formal structural linkages as shown in this book may inform a truly postmodern globally applicable science of culture

Scientific Process S.D. Ross, 2012-12-06 Some preliminary observations must be made concerning the nature and purpose of
 this study What I have attempted here is an essay in the metaphysics of science and not the philosophy of science Rather
 than concentrating on the details of theory construction and the formal structure of scientific systems I have treated science
 as an enterprise a developing process within human experience I have used such an approach in order to analyze science in
 its relationship to other human enterprises such as art and philosophy and to clarify its unique goals and characteristics
 Often the concepts employed in descriptions of scientific methods are conceived too narrowly by broadening the focus of
 attention I have attempted to characterize in a fairly general fashion the goals and methods of science This has led to
 formulations which may seem at first glance to depart radically from some well established distinctions of the philosophy of
 science I hope that it will be clear however that such formulations arise at a different level of analysis and concern very
 different problems from those of the logic of science In particular I am concerned with the general goals of science These
 must not be confused with the narrower principles of method employed in science at any given time Many Worlds in One
 Alex Vilenkin, 2025-06-25 A Leading Figure in the Development of the New Cosmology Explains What It All Means Among his

peers Alex Vilenkin is regarded as one of the most imaginative and creative cosmologists of our time His contributions to our current understanding of the universe include a number of novel ideas two of which eternal cosmic inflation and the quantum creation of the universe from nothing have provided a scientific foundation for the possible existence of multiple universes With this book his first for the general reader Vilenkin joins another select group the handful of first rank scientists who are equally adept at explaining their work to nonspecialists With engaging well paced storytelling a droll sense of humor and a generous sprinkling of helpful cartoons he conjures up a bizarre and fascinating new worldview that to paraphrase Niels Bohr just might be crazy enough to be true

Death Calls Robert Crossland, 2023-03-20 I wade waist deep into the ocean to reach a body floating face down in the local harbor Police first responders and onlookers quietly watch from the shoreline but blood splashes and marks in the sand suggest that something awful has happened here In 1981 while practicing medicine in a small community on the southern coast of British Columbia Dr Robert Crossland is asked if he'd be interested in becoming the local coroner Like many Robert has thrilled to the crusading adventures of TV coroner Wojciech and Quincy M E so he takes up the challenge But soon he is to find just how far these TV programs are from the real world of a community coroner During the following twenty three years Robert will investigate and report on more than 600 sudden unexpected deaths in his community and in the surrounding ocean lakes forests and mountains In each case he must establish not only who has died but when where how and why As a member of the community himself he often finds himself personally connected with those who have died Many of the deaths are natural of course but a surprising number are exceptional due to complicated startling unforeseen and sometimes even astonishing circumstances and findings These are the stories of more than a hundred of these remarkable often horrifying events They happen in homes at work sites during recreation or while travelling in boats planes or on roads Some of the deaths prove controversial and Dr Crossland participates in inquests that lead to changes in policies or procedures that reduce the risk of further deaths or sometimes heartbreakingly make no difference at all Sudden death is always disturbing and in vivid pithy engaging anecdotes based on his case files and notes Dr Crossland shares with readers the who when where how and why
