Rolling Back Revolution The Emergence Of Low Intensity Conflict:

Rolling Back Revolution Ivan Molloy, 2001-07-20 Leading Marxist thinkers re evaluate Trotsky's key theories an ideal introduction for students Rolling Back Revolution Ivan Molloy, 2001-07-20 Ivan Molloy analyses the de facto foreign policy strategy of Low Intensity Conflict as propagated by the United States He recounts how LIC emerged during the Reagan Administration as a way of counteracting the legacy left by the Vietnam War which constrained America from getting involved in direct military intervention Part covert part overt LIC was developed as a low cost and low risk method of dealing with revolutionary movements and post revolutionary governments usually Marxist considered threatening to national interests As such this secretive strategy was an integral component of the Iran Contra affair and at the heart of the Reagan Doctrine Molloy argues that LIC was a means of civilianising and privatising America's foreign policy He reveals that LIC was always more of a political rather than military tool The United States used LIC selectively in the 1980s to combat guerrilla movements and undermine targeted regimes to achieve its foreign policy objectives The author uses Nicaragua and the Philippines as major case studies to analyse the profile of this multi dimensional strategy as it emerged in the 1980s He also demonstrates using such examples as Cuba Yugoslavia and East Timor that this complex strategy is still evident today and even pursued by other states Outsourced Empire Andrew Thomson, 2018-06-20 There has been a shift in the way that we understand the forces behind imperialism In this book Andrew Thomson re evaluates the history of US imperialism from the Cold War to today by looking at the influence of paramilitary actors Thomson reveals how these agents are central to US imperialism from the Guatemalan coup to the Bay of Pigs from Syrian rebel factions to the Soviet Afghan War bringing these narratives together to reveal the evolution of paramilitary insurgencies across the globe Militias mercenaries and private companies PMCs have formed a central part of the strategies designed to influence political and economic conditions abroad oriented towards the US's Empire Drawing on declassified documents including US training manuals CIA communiqués and the National Security Archive Outsourced Empire reveals new evidence that helps us understand these institutions and their collective role in maintaining global order *The Routledge Handbook of Ethnic Conflict* Karl Cordell, Stefan Wolff, 2016-01-22 A definitive global survey of the interaction of ethnicity nationalism and politics this handbook blends rigorous theoretically grounded analysis with empirically rich illustrations to provide a state of the art overview of the contemporary debates on one of the most pervasive international security challenges today Fully updated for the second edition the book includes a new section which offers detailed analyses of contemporary cases of conflict such as in Ukraine Kosovo the African Great Lakes region and in the Kurdish areas across the Middle East thus providing accessible examples that bridge the gap between theory and practice The contributors offer a 360 degree perspective on ethnic conflict from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict and to the various strategies adopted in response to it Without privileging any specific explanation of why ethnic conflict happens at a particular

place and time or why attempts at preventing or settling it might fail or succeed The Routledge Handbook of Ethnic Conflict enables readers to gain a better insight into such defining moments in post Cold War international history as the disintegration of the Soviet Union and Yugoslavia and their respective consequences the genocide in Rwanda and the relative success of conflict settlement efforts in Northern Ireland By contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of their prevention and settlement the Handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable but rather that they require careful analysis and thoughtful and measured responses

Bourgeois Liberty and the Politics of Fear Marc Mulholland, 2012-10-04 In 1842 Heinrich Heine the German poet wrote that the bourgeoisie obsessed by a nightmare apprehension of disaster and an instinctive dread of communism were driven against their better instincts into tolerating absolutist government Theirs was a politics motivated by fear Over the next 150 years the middle classes were repeatedly accused of betraying liberty for fear of red revolution The failure of the revolutions of 1848 conservative nationalism from the 1860s fascist victories in the first half of the twentieth century and repression of national liberation movements during the Cold War these fateful disasters were all explained by the bourgeoisie s fear of the masses For their part conservatives insisted that demagogues and fanatics exploited the desperation of the poor to subvert liberal revolutions leading to anarchy and tyranny Only evolutionary reform was enduring From the 1970s however liberal revolution revived on an unprecedented scale With the collapse of communism bourgeois liberty once again became a crusading force but now on a global scale In the twenty first century the armed forces of the United States Britain and NATO became instruments of regime change seeking to destroy dictatorship and build free market democracies President George W Bush called the invasion of Iraq in 2003 a watershed event in the global democratic revolution This was an extraordinary turn around with the middle classes now hailed as the truly universal class which in emancipating itself emancipates all society The debacle in Iraq and the Great Recession from 2008 revealed all too clearly that hubris still invited nemesis *Bourgeois Liberty and the Politics of Fear* examines this remarkable story and the fierce debates it occasioned It takes in a span from the seventeenth century to the twenty first covering a wide range of countries and thinkers Broad in its scope it presents a clear set of arguments that shed new light on the creation of our modern world

The Greek Civil War Spyridon Plakoudas, 2017-05-15 The Greek Civil War 1946 1949 was one of the few instances in the

post World War II era of a clear cut and permanent victory by right wing government forces over an insurgent communist movement Spyridon Plakoudas here explores the factors which ultimately caused the downfall of the communist insurgency in Greece which had at some points seemed undefeatable He questions whether the guerrilla movement fell victim to the feud between Stalin and Tito or whether the significant British and above all American aid in fact rescued the Greek monarchist regime from collapse Plakoudas explores the strategies adopted by government forces in order to counter the communist insurgency how external and internal actors influenced these policies and when how and why these policies achieved success Featuring previously unseen sources and documents this book reveals the strategy and tactics of the monarchist regime

The Cold War and After Richard Saull, 2007-01-20 The Cold War is often presented as an international power struggle between the Soviet Union and the US Richard Saull challenges this assumption He broadens our understanding of the defining political conflict of the twentieth century by stressing the social and ideological differences of the superpowers and how these differences conditioned their international behaviour Saull argues that US Soviet antagonism was part of a wider conflict between capitalism and communism involving states and social forces other than the superpowers The US was committed to containing revolutionary and communist movements that emerged out of uneven capitalist development In highlighting the socio economic and ideological dimensions of the Cold War Saull not only provides a richer history of the Cold War than mainstream approaches but is also able to explain why revolutionary domestic transformations caused international crises Tracing the origins of new resistance to American global power Saull's book provides an ideal alternative perspective on the Cold War and its end

An International History of Terrorism Jussi M. Hanhimäki, Bernhard Blumenau, 2013-01-17 The aim of this book is to provide readers with the tools to understand the historical evolution of terrorism and counterterrorism over the past 150 years In order to appreciate the contemporary challenges posed by terrorism it is necessary to look at its evolution at the different phases it has gone through and the transformations it has experienced The same applies to the solutions that states have come up with to combat terrorism the nature of terrorism changes but still it is possible to learn from past experiences even though they are not directly applicable to the present This book provides a fresh look at the history of terrorism by providing in depth analysis of several important terrorist crises and the reactions to them in the West and beyond The general framework is laid out in four parts terrorism prior to the Cold War the Western experience with terrorism non Western experiences with terrorism and contemporary

terrorism and anti terrorism The issues covered offer a broad range of historical and current themes many of which have been neglected in existing scholarship it also features a chapter on the waves phenomenon of terrorism against its international background This book will be of much interest to students of terrorism studies political violence international history security studies and IR 2001 Massimo Mastrogregori,2011-08-02 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors **Cocaine, Death Squads, and the War on Terror** Oliver Villar,Drew Cottle,2011 Since the late 1990s the United States has funneled billions of dollars in aid to Colombia ostensibly to combat the illicit drug trade and State Department designated terrorist groups The result has been a spiral of violence that continues to take lives and destabilize Colombian society This book asks an obvious question are the official reasons given for the wars on drugs and terror in Colombia plausible or are there other deeper factors at work Scholars Villar and Cottle suggest that the answers lie in a close examination of the cocaine trade particularly its class dimensions Their analysis reveals that this trade has fueled extensive economic growth and led to the development of a narco state under the control of a narco bourgeoisie which is not interested in eradicating cocaine but in gaining a monopoly over its production The principal target of this effort is the Revolutionary Armed Forces of Colombia FARC who challenge that monopoly as well as the very existence of the Colombian state Meanwhile U S business interests likewise gain from the cocaine trade and seek to maintain a dominant imperialist relationship with their most important client state in Latin America Suffering the brutal consequences as always are the peasants and workers of Colombia This revelatory book punctures the official propaganda and shows the class war underpinning the politics of the Colombian cocaine trade

The Red Flag David Priestland, 2016-05-03 The best and the most accessible one volume history of communism now available A far reaching vividly written account Foreign Affairs In The Red Flag Oxford professor David Priestland tells the epic story of a movement that has taken root in dozens of countries across two hundred years from its birth after the French Revolution to its ideological maturity in nineteenth century Germany to its rise to dominance and subsequent fall in the twentieth century Beginning with the first modern Communists in the age of Robespierre Priestland examines the motives of thinkers and leaders including Marx Engels Lenin Stalin Castro Che Guevara Mao Ho Chi Minh Gorbachev and many others Priestland also shows how Communism in all its varieties appealed to different societies for different reasons in some as a response to inequalities and in others more out of a desire to catch up with the West But paradoxically while destroying one web of inequality Communist leaders were simultaneously weaving another It was this dynamic together with widespread economic failure and an escalating loss of faith in the system that ultimately destroyed Soviet Communism itself At a time when global capitalism is in crisis and powerful new political forces have arisen to confront Western democracy The Red Flag is essential reading if we are to apply the lessons of the past to navigating the future Detailed and scholarly but written in lively prose this is a rich satisfying account of the most successful utopian political movement in history Publishers Weekly starred review
