Power, 1897 **Property, Power and Politics** Jean-Philippe Robé, 2020-10-05 Globalization is an extraordinary phenomenon affecting virtually everything in our lives And it is imperative that we understand the operation of economic power in a globalized world if we are to address the most challenging issues our world is facing today from climate change to world hunger and poverty This revolutionary work rethinks globalization as a power system feeding from and in competition with the state system Cutting across disciplines of law politics and economics it explores how multinational enterprises morphed into world political organisations with global reach and power but without the corresponding responsibilities In illuminating how the concentration of property rights within corporations has led to the rejection of democracy as an ineffective system of government and to the rise in inequality Rob offers a clear pathway to a fairer and more sustainable power system
