Women, Love, and Commodity Culture in British Romanticism Professor Daniela Garofalo,2013-05-28 Offering a new understanding of canonical Romanticism Daniela Garofalo suggests that representations of erotic love in the period have been largely misunderstood Commonly understood as a means for transcending political and economic realities love for several canonical Romantic writers offers instead a contestation of those realities Garofalo argues that Romantic writers show that the desire for transcendence through love mimics the desire for commodity consumption and depends on the same dynamic of delayed fulfillment that was advocated by thinkers such as Adam Smith As writers such as William Blake Lord Byron Sir Walter Scott John Keats and Emily Bront engaged with the period s concern with political economy and the nature of desire they challenged stereotypical representations of women either as self denying consumers or as intemperate participants in the market economy Instead their works show the importance of women for understanding modern economics with women s desire conceived as a force that not only undermines the political economy s emphasis on productivity growth and perpetual consumption but also holds forth the possibility of alternatives to a system of capitalist exchange *Feminism Confronts Homo Economicus* Martha Fineman, Terence Dougherty,2018-08-06 The essays in this volume confront the inroads that economics has made into the legal academy Law and Economics uses principles of neoclassical economics to develop laws and social policies that maintain if not bolster current allocations of power from the Introduction The Law and Economics school has had a significant impact on the legal and governmental landscape in the United States It posits a perfectly rational economic man homo economicus who is unconstrained by familial and communal ties and who can and should make decisions solely in light of considerations of economic value *Feminism Confronts Homo Economicus* offers a major intervention in debates about how law has come under the influence of economic principles Drawing on the latest thinking in the fields of feminist legal theory critical legal studies and feminist economics the essays critique the notion that legal and policy decisions should be made solely through the lens of economics While the contributors question the wholesale

incorporation of the neoclassical economic model into legal analysis they do not all discard economic analysis and theory
