Scene And Structure:

Elements of Fiction Writing - Scene & Structure Jack Bickham, 1999-03-15 Craft your fiction with scene by scene flow logic and readability An imprisoned man receives an unexpected caller after which everything changed And the reader is hooked But whether or not readers will stay on for the entire wild ride will depend on how well the writer structures the story scene by scene This book is your game plan for success Using dozens of examples from his own work including Dropshot Tiebreaker and other popular novels Jack M Bickham will guide you in building a sturdy framework for your novel whatever its form or length You ll learn how to worry your readers into following your story to the end prolong your main character s struggle while moving the story ahead juggle cause and effect to serve your story action As you work on crafting compelling scenes that move the reader moment by moment toward the story s resolution you ll see why believable fiction must make more sense than real life every scene should end in disaster some scenes should be condensed and others built big Whatever your story this book can help you arrive at a happy ending in the company of satisfied readers *Scene and Structure* Jack M. Bickham, 1993-01-01 Offers advice to writers on constructing fiction that flows from one scene to the next with logic discussing how to revise scenes for maximum effect and how to fix common errors *Image and Video Retrieval* Peter Enser, Yiannis Kompatsiaris, Noel E. adapts to the type of environment being mapped In order to further increase the accuracy of the resulting maps a new method is presented allowing detection of images corresponding to the same scene region crossovers Crossovers then used in conjunction with global alignment methods in order to highly reduce estimation errors especially when mapping large areas Our method is based on Visual Bag of Words paradigm BoW offering a more efficient and simpler solution by eliminating the training stage generally required by state of the art BoW algorithms Also towards developing methods for efficient mapping of large areas especially with costs related to map storage transmission and rendering in mind an online 3D model simplification algorithm is proposed This new algorithm presents the advantage of selecting only those vertices that are geometrically representative for the scene
