Scenes In America Deserta:

Scenes in America Deserta Reyner Banham, 1982 In *Scenes in America Deserta* Reyner Banham steps aside from his familiar role as an architectural historian and confesses himself a delighted intrigued but puzzled visitor to the arid lands of the American Southwest What delights Banham most is visual pleasure and this book is first and foremost a celebration of the pure visual response of a four wheeled voyeur What intrigues him is the works of man the ancient pueblos and the modern observatories the fantasies of Las Vegas and the Spanish missions Frank Lloyd Wright and Paolo Soleri What puzzles him is his response as the archetypal British tourist the discovery that the desert is beautiful in his eyes in a way that no other landscape has ever been This unsettling discovery sends Banham on a search for the roots of this response He seeks explanations in the works of writers is various as Gaston Bachelard Joan Didion Ray Bradbury early historians and explorers the American solitary and aesthete John van Dyke author of the classic *The Desert* and Charles Doughty the English Arabist author of *Travels in Arabia Deserta* The Invention of the American Desert Lyle Massey, James Nisbet, 2021-11-02 Introduction Lyle Massey and James Nisbet Desolate dreams Joseph Masco Air wind breath life desertification and Will Wilson s AIR Auto Immune Response Jessica L Horton Notes from bioteknika Albert Narath Troglodyte modernists Lyle Massey Explosive modernism Hiram Hudson Benedict s Bouldereign and Zabriskie Point at 50 Edward Dimendberg Point Omega Omega Point desert In three parts Stefanie Sobelle The desert in fine grain Emily Eliza Scott The desert as black mythology Bridget R Cooks On the recalcitrance of the desert island by way of Andrea Zittel s A Z West James Nisbet Four theses for the coming deserts Hans Baumann and Karen Pinkus **Building/Object** Charlotte Ashby, Mark Crinson, 2022-06-16 *Building Object* addresses the space in between the conventional objects of design and the conventional objects of architecture probing and reassessing the differences between the disciplines of design history and architectural history Each of the 13 chapters in this book examine things which are neither object like nor building like but somewhere in between air conditioning bookshelves partition walls table monuments TVs convenience stores cars exposing particular political configurations and resonances that otherwise might be occluded In doing so they reveal that the definitions we make of objects in opposition to buildings and of architecture in opposition to design are not as fundamental as they seem This book brings new aspects of the creative and experiential into our understanding of the human environment *Desert in Modern Literature and Philosophy* Aidan Tynan, 2020-06-18 Aidan explores the ways in which Nietzsche s warning that the desert grows has been taken up by Heidegger Derrida and Deleuze in their critiques of modernity and the desert in literature ranging from T S Eliot to Don DeLillo from imperial travel writing to postmodernism and from the Old Testament to salvagepunk *The Void, The Grid & The Sign* William L. Fox, 2016-10-01 This is a story that few know but those who do are its disciples The story of the highest and driest of all American deserts the Great Basin has no finer voice than that of William Fox Fox s book is divided into the three sections of the title In *The Void* he leads us through the Great Basin landscape

investigating our visual response to it a pattern of mountains and valleys on a scale of such magnitude and emptiness and undifferentiated by shape form and color that the visual and cognitive expectations of the human mind are confounded and impaired The Grid leads us on a journey through the evolution of cartography in the nineteenth century and the explorations of John Charles Fremont to the net of maps section markers railroads telegraph lines and highways that humans have thrown across the void throughout history The Sign wends us through the metaphors and language we continue to place around and over the void revealing the Great Basin as a palimpsest where for example the neon boulevards of Las Vegas interplay with ancient petroglyphs In this one of a kind travel book that allows us to travel within our own neurophysiological processes as well as out into the arresting void of the Great Basin Fox has created a dazzling new standard at the frontier of writing about the American West His stunning and broad insight draws from the fields of natural history cognitive psychology art history western history archaeology and anthropology and will be of value to scholars and readers in all these subjects

Landscapes of Memory and Experience Jan Birksted, 2012-12-06 It has been argued that the history of landscape and of gardens has been marginalized from the mainstream of art history and visual studies because of a lack of engagement with the theories methods and concepts of these disciplines This book explores possible ways out of this impasse in such a way that landscape studies would become pivotal through its theoretical advances since landscape studies would challenge the underlying assumptions of traditional phenomenological theory Thus the history and theory of twentieth century landscape might not only once again share concepts and methods with contemporary art and design history but might in turn influence them A complementary sequel to *Relating Architecture to Landscape* this volume of essays explores further areas of interest and discussion in the landscape architecture debate and offers contributions from a team of well known researchers teachers and writers The choice of topics is wide ranging and features case studies of modern and contemporary schemes from the USA Far East and Australasia

The Culture of Nature in the History of Design Kjetil Fallan, 2019-03-26 The Culture of Nature in the History of Design confronts the dilemma caused by design's pertinent yet precarious position in environmental discourse through interdisciplinary conversations about the design of nature and the nature of design Demonstrating that the deep entanglements of design and nature have a deeper and broader history than contemporary discourse on sustainable design and ecological design might imply this book presents case studies ranging from the eighteenth to the twenty first century and from Singapore to Mexico It gathers scholarship on a broad range of fields practices from urban planning landscape architecture and architecture to engineering design industrial design furniture design and graphic design From adobe architecture to the atomic bomb from the bonsai tree to Biosphere 2 from pesticides to photovoltaics from rust to recycling the culture of nature permeates the history of design As an activity and a profession always operating in the borderlands between human and non human environments design has always been part of the environmental problem whilst also being an indispensable part of the solution The book ventures into domains as diverse as design theory research

pedagogy politics activism organizations exhibitions and fiction and trade literature to explore how design is constantly making and unmaking the environment and conversely how the environment is both making and unmaking design This book will be of great interest to a range of scholarly fields from design education and design history to environmental policy and environmental history

Changing Representations of Nature and the City Gabriel N. Gee, Alison Vogelaar, 2018-07-04 The turn of the 1960s 70s characterized by the rapid acceleration of globalization prompted a radical transformation in the perception of urban and natural environments The urban revolution and related prospect of the total urbanisation of the planet in concert with rapid population growth and resource exploitation instigated a surge in environmental awareness and activism One implication of this moment is a growing recognition of the integration and interconnection of natural and urban entities The present collection is an interdisciplinary inquiry into the changing modes of representation of nature in the city beginning from the turn of the 1960s 70s Bringing together a number of different disciplinary approaches including architectural studies and aesthetics heritage studies and economics environmental science and communication the collection reflects upon the changing perception of socio natures in the context of increasing urban expansion and global interconnectedness as they are were manifest in specific representations Using cases studies from around the globe the collection offers a historical and theoretical understanding of a paradigmatic shift whose material and symbolic legacies are still accompanying us in the early 21st century

Go East, Young Man Richard Francaviglia, 2011-12-14 Transference of orientalist images and identities to the American landscape and its inhabitants especially in the West in other words portrayal of the West as the Orient has been a common aspect of American cultural history Place names such as the Jordan River or Pyramid Lake offer notable examples but the imagery and its varied meanings are more widespread and significant Understanding that range and significance especially to the western part of the continent means coming to terms with the complicated nuanced ideas of the Orient and of the North American continent that European Americans brought to the West Such complexity is what historical geographer Richard Francaviglia unravels in this book Since the publication of Edward Said s book *Orientalism* the term has come to signify something one dimensionally negative In essence the orientalist vision was an ethnocentric characterization of the peoples of Asia and Africa and the Near East as exotic primitive others subject to conquest by the nations of Europe That now well established point which expresses a postcolonial perspective is critical but Francaviglia suggest that it overlooks much variation and complexity in the views of historical actors and writers many of whom thought of western places in terms of an idealized and romanticized Orient It likewise neglects positive images and interpretations to focus on those of a decadent and ostensibly inferior East We cannot understand well or fully what the pervasive orientalism found in western cultural history meant says Francaviglia if we focus only on its role as an intellectual engine for European imperialism It did play that role as well in the American West One only need think about characterizations of American Indians as Bedouins of the Plains destined for displacement by a settled frontier Other roles

for orientalism though from romantic to commercial ones were also widely in play In *Go East Young Man* Francaviglia explores a broad range of orientalist images deployed in the context of European settlement of the American West and he unfolds their multiple significances

Survival City Tom Vanderbilt, 2010-04-15 On the road to Survival City Tom Vanderbilt maps the visible and invisible legacies of the cold war exhuming the blueprints for the apocalypse we once envisioned and chronicling a time when we all lived at ground zero In this road trip among ruined missile silos atomic storage bunkers and secret test sites a lost battleground emerges amid the architecture of the 1950s accompanied by Walter Cotten's stunning photographs *Survival City* looks deep into the national soul unearthing the dreams and fears that drove us during the latter half of the twentieth century A crucial and dazzling book masterful and for me at least intoxicating Dave Eggers A genuinely engaging book perhaps because Vanderbilt is skillful at conveying his own sense of engagement to the reader Los Angeles Times A retracing of *Dr Strangelove* as ordinary life Greil Marcus Bookforum
