throughout the period 900 to 323 BCE but it also demonstrates that children did not necessarily become more prominent in Attic society as a consequence. It suggests that children's identities and the symbolism of them in many ways remained constant with children always prized for the stability and continuity they represented but appreciated for their role in perpetuating society with increasing frequency over time and more when society was under threat. Ultimately the author suggests major socio-political change impacted children's experiences of childhood and what it meant to be a child in ancient Athens primarily because of how it affected the agency of their family members especially the women responsible for caring for them. Warfare and political transformation concentrated in the Classical period gave women more agency to influence the range of material culture made for children making characterisations of them in art at once more realistic and more common even when other evidence suggests children were in fact probably less visible in society.
