Scenes Of Inquiry On The Reality Of Questions In The Sciences:

The Scenes of Inquiry Nicholas Jardine, 1991 This book advocates a radical shift of concern in philosophical historical and sociological studies of the sciences and explores the consequences of such a shift The historically oriented first part of the work deals with the ways in which ranges of questions become real and cease to be real for communities of inquirers The more philosophically oriented second part of the work introduces the notion of absolute reality of questions and addresses doubt about the claims of the sciences to have accumulated absolutely real questions It is argued that recent studies in the sociology and social history of the science pose strong challenges to the sciences by revealing how appeals to authority vested interests and rhetorical and aesthetic sensibilities play substantial roles in the practices of the sciences The final chapter defends the pragmatic stance of the work and of its companion *The Fortunes of Inquiry* and draws morals about the roles of criticism and reflection in the philosophy of science and in the sciences themselves **The Scenes of Inquiry**

Nicholas Jardine, 2000 *The Scenes of Inquiry* Nicholas Jardine, 1991 **The Laboratory Revolution in Medicine** Andrew Cunningham, Perry Williams, 2002-07-11 Essays by leading researchers on the nature and genesis of laboratory medicine *Books and the Sciences in History* Marina Frasca-Spada, Nicholas Jardine, 2000-11-02 This book published in 2000 examines the intersection between science and books from early medieval times to the nineteenth century

Language and the History of Thought Nancy S. Struever, 1995 17 essays discussing the role of language in the history of western thought Since Adam before the Fall named the animals by true insight into their essences language has never ceased to be the pivot of efforts to understand human nature and our capacity to feel at home in the twin worlds of nature and society This volume brings together seventeen essays that have appeared in the *Journal of the History of Ideas* over the last thirty years Their common theme is the role of language in aspects of the history of western thought from the Renaissance to the nineteenth century The essays cover questions in epistemology religion anthropology lexicography evolution the theory of signs and the origin of language Contributors FRANK L BORCHARDT MARGRETA DE GRAZIA SIDONIE CLAUS JAN MIEL THOMAS C SINGER VICTOR ANTHONY RUDOWSKI JULES PAUL SEIGEL JAMES McLAVERTY J R KNOWLSON STEPHEN K LAND LIA FORMIGARI H J JACKSON W JAY REEDY V P BYNACK CYMBRE QUINCY RAUB MICHAEL SPRINKER S MORRIS ENGEL *Handbook of Epistemology* I. Niiniluoto, Matti Sintonen, Jan Wolenski, 2004-03-31 Epistemology or theory of knowledge has always been one of the most important if not the most important field of philosophy New arguments are constantly brought to bear on old views new variants are marshalled to revive ancient stands new concepts and distinctions increase the sophistication of epistemological theories There are a great many excellent textbooks monographs as well as anthologies consisting of articles in epistemology Similarly there are useful philosophical dictionaries which contain a great number of relatively short entries and general philosophical handbooks which also touch epistemological issues This volume of 27 essays grew out from the interest to see a handbook which is devoted entirely to the historical roots and systematic

development of theory of knowledge It is not intended to compete but to supplement the already existing literature It aims at giving both beginners and more advanced students as well as professionals in epistemology and other areas of philosophy an overview of the central problems and solutions of epistemology The essays are self contained and still often rather extensive discussions of the chosen aspects of knowledge The contributions presuppose very little familiarity with previous literature and only a few of them require the mastery of even elementary logical notation This we hope makes the volume also accessible to the philosophically interested wider audience The contributors were asked to provide substantial up to date self contained and balanced surveys of the various subareas and more specific topics of epistemology with reference to literature

Conceptual Revolutions Wenceslao J. González, 2011 **Rethinking Reality** Duncan F. Kennedy, 2002 A clear concise introduction to current debates on the relationship of representation and reality in science studies On Truth and the Representation of Reality Dan Neshier, 2002 In *On Truth and the Representation of Reality* Dan Neshier develops a new theory of truth in the framework of pragmatist theory of representation Using the pragmatist theory of perception for the basis of his epistemological explanation of our confrontation with external Reality and how it is represented Neshier shows that in our perceptual operations we quasi prove the truth of our perceptual judgments
