Media Madness Otto F. Wahl,1995 From Psycho Silence of the Lambs Kojak and Melrose Place from books music cartoons advertising and newspapers we all derive our images of mental illness These omnipresent media portrayals are at the least insensitive inaccurate and unfavorable and at the worst stigmatizing and pernicious In this important book Dr Otto Wahl examines the prevalence nature and impact of such depictions using numerous examples from film television and print media He documents the remarkable frequency of these images and demonstrates how the media has stereotyped the mentally ill through exaggeration misunderstanding ridicule and disrespect *Media Madness* also shows the damaging consequences of such stereotypes stigma rejection loss of self esteem reluctance to seek accept or reveal psychiatric treatment discrimination and restriction of opportunity The forces that shape current images of mental illness are clarified as are the efforts of organizations and individuals to combat such exploitation *Communication and Mental Illness* Jenny France,Sarah Kramer,2001-01-01 This book is for improving understanding of individuals with mental illness It offers theoretical knowledge of the methods of communication commonly adopted by individuals with a variety of diagnoses of mental illness and how information about communication can influence service provision ending with suggestions for future policy and practice **Mental Illness** Bob Bennett,2006-08-30 *Mental Illness A Guide to Recovery* gives you information gleaned from many sources which can help you learn to recover Coping skills needed to deal with the illness can be developed Materials which can help you reduce symptoms are presented Recovery does not happen overnight but step by step most can make significant recovery Humpty Dumpty had a great fall and all the king s horses and all the king s men couldn t put Humpty Dumpty back together again The same holds true for those of us with a mental illness The psychiatrists psychologists social workers etc can assist but it is up to the individual to create conditions which will allow recovery to happen The neurobiological basis of mental illness is often presented in a fatalistic way That s the brain chemistry you ve got and that s what you re stuck with as if the individual was unable to change the chemistry inside his or her own head Breathing changes brain chemistry So does exercise the food you eat the words you speak the thoughts you think as well as how often you smile While drugs are capable of making radical changes in the chemistry of the brain it is the slow changes over time which will help most in recovery Thorough and informative without being technical fascinating very enlightening
