Schmeiber Submachine Gun:

MP 38 and MP 40 Submachine Guns Alejandro de Quesada,2014-07-20 Nazi Germany's MP 38 and MP 40 submachine guns are among World War II's most recognizable weapons. Portable and with folding stocks, both were widely issued to airborne troops and became the hallmark of Germany's infantry section and platoon leaders. A million were produced during the conflict, and many found their way into the hands of paramilitary and irregular forces from Israel to Vietnam after the war. Featuring specially commissioned full color artwork and period and close up photographs, this is the story of the origins, combat use, and lasting influence of two of World War II's most famous firearms. **The Suomi Submachine Gun** Leroy Thompson,2017-04-07 Entering service in 1931, the 9x19mm Suomi KP 31 submachine gun saw extensive combat with Finnish troops during their fight against Soviet forces in 1939-44. It was also manufactured under licence in Switzerland, Denmark, and Sweden and remained in Finnish service until the 1980s, an indication of its durability. Rugged and accurate, the Suomi was a favourite with Finnish ski troops who would strike from ambush, cutting down Soviet troops, then skiing away into the woods. Initially used by the Finns as a light machine gun at infantry squad level, it eventually became a dedicated submachine gun, and since it had been designed to be more accurate than the typical SMG, it was often even used as a sniping weapon or to supplement longer ranged rifles such as the Mosin Nagant. Featuring first hand accounts and specially commissioned colour artwork, this is the story of one of World War II's most distinctive and respected infantry weapons.

The Sterling Submachine Gun Matthew Moss,2018-11-29 Designed by a motorcycle racer turned small arms engineer, George Patchett, the submachine gun that eventually became known as the Sterling was developed during World War II. Some suggest it first saw action during Operation Infatuate with No 4 Commando before becoming fully adopted by the British Army in 1953 as the Sterling Machine Carbine L2A1. It was centre stage for many of Britain's post colonial conflicts, from Malaya to Kenya and from Yemen to Northern Ireland. The silenced L34A1 Sterling Patchett entered service in 1966 and first saw action deep in the jungles of Vietnam in the hands of the elite special forces of Australia, New Zealand, and the United States during prisoner snatches and reconnaissance patrols. Employing first hand accounts and painstaking technical analysis, this engaging account features carefully selected archive photography and specially commissioned colour artwork depicting the submachine gun that armed British and other forces for nearly 60 years. **The MP40 Submachine Gun** Mike

Ingram,2001 Of all infantry weapons conceived during the 20th century, few were as important as the submachine gun, a weapon designed specifically for close quarter combat. This illustrated history examines what was arguably the best such weapon during World War II, the German MP 40. Heavily illustrated with archival photography, cutaway drawings, and twelve color artworks, this account follows the MP 40 from its genesis in preliminary World War I designs through its use by the German forces on all fronts and its postwar service with other nations. Comprehensive appendices include full specifications and extensive comparisons with Allied contemporaries. *Automatic Weapons & Machine Guns* Stephen Cohen,2022-04-29

This book follows in the footsteps of many past conflicts from around the world and introduces the reader to the many different types of automatic machine gun weapons used in those conflicts Having travelled around the world visiting museums and battle sites and actually seeing touching and in some cases firing some of the weapons included in this book provided me with some solid insights into their service through many different theatres of war In most cases you will find references to the weapon s history their service period and specifications as well as other interesting information that I have collected over the years

Infantry and artillery weapons of the Hungarian army in WW2 Péter Mujzer,2025-01-28 Hungary finished the WW1 on the losing side lost significant territory manpower and resources Due to the implementation of the Peace Treaty the existing arms industry and the Armed Forces were seriously limited From the beginning the arms industry and the Armed Forces secretly retained capacities which were over the limitations From the beginning of the 30s the enlargement and modernisation of the Armed Forces started Hungary was an agricultural county with limited heavy industrial assets but it was a solid foundation to modernise and produce infantry weapons and artillery First it based on the modernisation of the WW1 weaponry inherited from the Austro Hungarian Army Later licences were purchased and put into production During WW2 the Hungarian industry was able to supply the Army with all kinds of small arms and artillery weapons however not all were modern designs A significant number of German and captured weaponry also purchased by the Hungarians

Machine Guns James H. Willbanks,2004-11-23 The machine gun often called the killing machine revolutionized modern ground combat brought an end to the traditional infantry and cavalry charge and changed the battlefields of war forever This volume in the Weapons and Warfare series describes the history of machine guns from the mid 19th century to the present following both the evolution of small arms technology and the impact of machine guns on the battlefield on military strategy and on human society This book discusses subjects ranging from the forerunners of mechanical and automatic guns to the unusual history of the Civil War era Gatling gun the first practical machine gun not used by the Union army because Gatling was a Southerner to the machine guns developed for the world wars and those for present day use Readers will see how the advent of the machine gun revolutionized ground combat and how in some instances technology outran tactics and doctrines with disastrous consequences

Nothing but Courage James

Donovan,2025-05-27 From the bestselling author of Shoot for the Moon and A Terrible Glory comes the dramatic story of the courageous paratroopers and glidermen of the 82nd Airborne who risked their lives to seize and secure a small centuries old bridge in France that played a pivotal role in the success of D Day In June 1944 German and American forces converged on an insignificant bridge a few miles inland from the invasion beaches If taken by the Nazis the bridge might have gone down in history as the reason the Allies failed on D Day The narrow road over it was each side s conduit to victory Continued Nazi control over the bridge near an old manoir known as La Fi re one of only two bridges in the region capable of supporting tanks and other heavy armor would allow the Germans to reinforce their defenses at Utah Beach one of the five landing areas chosen for Operation Overlord the Allied invasion of Nazi held Europe But because control of the bridge was also essential to moving U S troops inland and off the beach it could not simply be destroyed it had to be taken and held by the Allies This was part of the formidable mission of the 82nd Airborne whose lightly armed but superbly trained troopers had dropped behind and into German lines five hours before the seaborne assault on Utah While blocking enemy reinforcements they had to seize and secure avenues of approach from the beaches to the interior of Normandy including two bridges over the modest Merderet River and the key crossroads village of Sainte M re glise Failure would give Hitler enough time and the opportunity to build up the resources necessary to defeat the invasion and turn the tide for the Nazis The village was taken early on D Day and the 82nd endured repeated attacks by much larger German forces But the bridge at La Fi re became a bloody three day standoff against tanks and artillery that culminated in a near suicidal charge across it and the narrow 500 yard causeway beyond straight into the teeth of a fierce German defense ordered to hold it to the last man [The Big Book of Gun Trivia](#)
