Abolishing School Fees in Africa, 2009 Progress in literacy and learning especially through universal primary education has done more to advance human conditions than perhaps any other policy Our generation has the possibility of becoming the first generation ever to offer all children access to good quality basic education But it will only happen if we have the political commitment at the country as well as at the international level to give priority to achieve this first in human history And it will only happen if also those who cannot afford to pay school fees can benefit from a complete cycle of good quality primary education Investment in good quality fee free primary education should be a cornerstone in any government's poverty reduction strategy

The Constitution in the Classroom Stu Woolman, Brahm Fleisch, 2009 About the publication The law on education and educational practices in South Africa would exhaust the capacity of any meaningful monograph Instead the authors of this book engage six discrete topics that reflect the broader currents and conflicts in South African education debates a school choice b school fees c the right to an adequate basic education d single medium public schools e school governing bodies and f independent schools The book has two further aims First To move beyond the debates taking place separately in the education policy community and the legal academy and to demonstrate how these disciplines working in concert with each other can advance our understanding of law and education in South Africa Second To show that the ANC's complex education agenda must mirror the egalitarian utilitarian democratic and communitarian commitments found within the Constitution How these competing political claims reflected in our basic law play themselves out in the enabling education legislation the case law and government education policy frames each topic assayed in this work About the editor Stu Woolman is the Academic Director at the South Africa Institute for Advanced Constitutional Public Human Rights and International Law Brahm Fleisch is Associate Professor in the Division of Education Leadership and Policy Studies in Wits School of Education

Bacchus,2006-01-01 This study of the development of education in the British West Indian colonies during the last half of the nineteenth century examines the educational policies and curriculum used in schools following the abolition of slavery During this period the nature and development of the educational system in the region was profoundly affected by the decline of the sugar industry the emergence of black and coloured middle classes and the threat they posed to the ruling white elite and the institutionalization of cultural divisions between the black and white populations Bacchus argues that after 1846 the elite white plantocracy used the educational system to maintain domination following the end of slavery This is the first book to present an overall picture of educational developments in the British West Indies in this period and pays special attention to the historical context in which they occurred In Education as and for Legitimacy the author continues the study of West Indian education he began with his previous book Utilization Misuse and Development of Human Resources in the Early West Indian Colonies **Baptist Missionary Magazine** ,1897 **Reports from Commissioners** Great Britain.
