Wirt, 1976-01-01 **Black Mayors and School Politics** Wilbur C Rich, 2021-12-12 First Published in 1996 Some people believe that if inner city black children had excellent schools they would perform better in them Granted schools are a part of the problem but they are not all of the solution Schools are only buildings where teachers administrators and students interact Learning is a more much complex process There are many forces arrayed against an inner city child that preclude him her from mastering the education process Among these forces are poverty family instability disruptive classroom environments and incompetent teachers There seems to be no end to research and speculation about how to overcome these forces However the author asserts that the gap between black and white children continues to widen With research beginning in 1989 exploring three school systems for this study Detroit Michigan Gary Indiana and Newark New Jersey The book presents a systematic survey of school politics in these three cities giving particular emphasis to local reform efforts **School Leadership, Citizenship Education and Politics in China** Shuqin Xu, 2016-08-23 This book examines and theorizes the dynamics and complexities of leadership in citizenship education in junior secondary schools in Shanghai China Specifically it examines from a macro and micro political theoretical perspective the interactions between principals and school party secretaries SPSs and how they respond to the demands of macro and micro political actors This qualitative empirical research found four major school leadership citizenship education scenarios in which principals and SPSs addressed the interests of different macro and micro political actors Moreover principals and SPSs enjoyed a complicated working relationship at the micro political school level in which they collaborated to fulfill their responsibilities and respond to school macro and micro political actors while competing for power over leadership in citizenship education Principals and SPSs leadership in citizenship education was shaped by inter related factors including diverse influences in a multi leveled world the integration of politics and education the demands of macro and micro political actors and personal factors To interpret these findings this study proposes a theoretical framework for understanding leadership in citizenship education in China as a political exercise This theoretical framework is useful for understanding the complexity of school and citizenship education leadership the micro political relationship between Chinese principals and SPSs and their dynamic and complex interactions with macro and micro political actors *Surviving Internal*

The Political Dynamics of School Choice L. Fusarelli, 2003-05-15 Lance D Fusarelli examines the relationship between the charter school and voucher issues To what degree does political support for charter schools from a coalition of teacher associations school board groups superintendents and voucher advocates slow or even stop the forces for vouchers Or do these coalitions which successfully pushed charter school legislation through the legislature actually fuel the fires of privatization Charter schools legislation has enjoyed bipartisan support precisely because the threat of vouchers is so great And contrary to the strategy of voucher opponents the spread of charter school increases rather than alleviates the push for vouchers
