Janet E. Snyder, 2017-07-05 Richly illustrated Early Gothic Column Figure Sculpture in France is a comprehensive investigation of church portal sculpture installed between the 1130s and the 1170s At more than twenty great churches beginning at the Royal Abbey of Saint Denis and extending around Paris from Provins in the east south to Bourges and Dijon and west to Chartres and Angers larger than life size statues of human figures were arranged along portal jambs many carved as if wearing the dress of the highest ranks of French society This study takes a close look at twelfth century human figure sculpture describing represented clothing defining the language of textiles and dress that would have been legible in the twelfth century and investigating rationale and significance The concepts conveyed through these extraordinary visual documents and the possible motivations of the patrons of portal programs with column figures are examined through contemporaneous historical textual and visual evidence in various media Appendices include analysis of sculpture production and the transportation and fabrication in limestone from Paris Janet Snyder's new study considers how patrons used sculpture to express and shape perceived reality employing images of textiles and clothing that had political economic and social significances

The Rood in Medieval Britain and Ireland, C.800-c.1500

Philippa Turner, Jane Hawkes, 2020 New readings demonstrate the centrality of the rood to the visual material and devotional cultures of the Middle Ages its richness and complexity The rood was central to medieval Christianity and its visual culture Christ's death on the cross was understood as the means by which humankind was able to gain salvation and depictions of the cross and Christ's death upon it were ubiquitous This volume brings together contributions offering a new perspective on the medieval rood understood in its widest sense as any kind of cross within the context of Britain and Ireland over a wide period of time which saw significant political and cultural change In doing so it crosses geographical chronological material

and functional boundaries which have characterised many previous discussions of the medieval rood

Acknowledging and exploring the capacity of the rood to be both universal and specific to particular locations and audiences these contributions also tease out the ways in which roods related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture dia and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and

gesture The Long Twelfth-Century View of the Anglo-Saxon Past Martin Brett, David A. Woodman, 2016-03-03 Scholars have long been interested in the extent to which the Anglo Saxon past can be understood using material written and produced in the twelfth century and simultaneously in the continued importance or otherwise of the Anglo Saxon past in the generations following the Norman Conquest of England In order to better understand these issues this volume provides a series of essays that moves scholarship forward in two significant ways Firstly it scrutinises how the Anglo Saxon past continued to be reused and recycled throughout the longue dur e of the twelfth century as opposed to the early decades that are usually covered Secondly by bringing together scholars who are experts in various different scholarly disciplines the volume deals with a much broader range of historical linguistic legal artistic palaeographical and cultic evidence than has hitherto been the case Divided into four main parts The Anglo Saxon Saints Anglo Saxon England in the Narrative of Britain Anglo Saxon Law and Charter and Art history and the French Vernacular it scrutinises the majority of different genres of source material that are vital in any study of early medieval British history In so doing the resultant volume will become a standard reference point for students and scholars alike interested in the ways in which the Anglo Saxon past continued to be of importance and interest throughout the twelfth century *Of Armor and Men in Medieval England* Rachel Ann Dressler, 2017-07-05 Despite the profusion of knightly effigies created between c 1240 and c 1330 for tombs throughout the British Isles these commemorative figures are relatively unknown to art historians and medievalists Until now their rich visual impact and significance has been relatively unexplored by scholars In this study Rachel Dressler examines this category of sculpture illustrating how English military figures employ a visual language of pose costume and attributes to construct a masculine ideal that privileges fighting prowess elite status and sexual virility Like military figures on the Continent English effigies represent knights wearing chain mail and surcoats and bearing shields and swords unique to the British examples however is the display of an aggressive sword handling pose and dynamically crossed legs Outwardly hyper masculine the carved figures partake in artistic subterfuge the lives of those memorialized did not always match proffered images testifying to the changing function of the knight in England during the thirteenth and early fourteenth centuries This study traces the development of English military figures and analyzes in detail three fourteenth century examples those commemorating Robert I De Vere in Hatfield Broad Oak Essex Richard Gyverney at Limington Somerset and Henry Allard in Winchelsea Sussex Similar in appearance these three sculptures represent persons of distinctly different social levels De Vere belonged to the highest aristocratic rank where Gyverney was a lesser county knight and Allard was from a merchant family raising questions about his knightly standing Ultimately Dressler s analysis of English knight effigies demonstrates that the masculine warrior during the late Middle Ages was frequently a constructed ideal rather than a lived experience
