*Death and the Classic Maya Kings* James L. Fitzsimmons, 2009-01-01 Like their regal counterparts in societies around the globe ancient Maya rulers departed this world with elaborate burial ceremonies and lavish grave goods which often included ceramics red pigments earflares stingray spines jades pearls obsidian blades and mosaics Archaeological investigation of these burials as well as the decipherment of inscriptions that record Maya rulers funerary rites have opened a fascinating window on how the ancient Maya envisaged the ruler's passage from the world of the living to the realm of the ancestors Focusing on the Classic Period AD 250 900 James Fitzsimmons examines and compares textual and archaeological evidence for rites of death and burial in the Maya lowlands from which he creates models of royal Maya funerary behavior Exploring ancient Maya attitudes toward death expressed at well known sites such as Tikal Guatemala and Copan Honduras as well as less explored archaeological locations Fitzsimmons reconstructs royal mortuary rites and expands our understanding of key Maya concepts including the afterlife and ancestor veneration

**Maya Imagery, Architecture, and Activity** Maline D. Werness-Rude, Kaylee R. Spencer, 2015-05 Maya Imagery Architecture and Activity privileges art historical perspectives in addressing the ways the ancient Maya organized manipulated created interacted with and conceived of the world around them The Maya provide a particularly strong example of the ways in which the built and imaged environment are intentionally oriented relative to political religious economic and other spatial constructs In examining space the contributors of this volume demonstrate the core interrelationships inherent in a wide variety of places and spaces both concrete and

abstract They explore the links between spatial order and cosmic order and the possibility that such connections have sociopolitical consequences This book will prove useful not just to Mayanists but to art historians in other fields and scholars from a variety of disciplines including anthropology archaeology geography and landscape architecture The Memory of Bones Stephen D. Houston, Stuart David, Karl Taube, 2013-05-01 An analysis of the intellectual and emotional life of ancient Mesoamerican people through studies of figural works and inscriptions All of human experience flows from bodies that feel express emotion and think about what such experiences mean But is it possible for us embodied as we are in a particular time and place to know how people of long ago thought about the body and its experiences In this groundbreaking book three leading experts on the Classic Maya ca AD 250 to 850 marshal a vast array of evidence from Maya iconography and hieroglyphic writing as well as archaeological findings to argue that the Classic Maya developed an approach to the human body that we can recover and understand today Starting with a cartography of the Maya body as depicted in imagery and texts the authors explore how the body was replicated in portraiture how it experienced the world through ingestion the senses and the emotions how the body experienced war and sacrifice and the pain and sexuality how words often heaven sent could be embodied and how bodies could be blurred through spirit possession From these investigations the authors convincingly demonstrate that the Maya conceptualized the body in varying roles as a metaphor of time as a gendered sexualized being in distinct stages of life as an instrument of honor and dishonor as a vehicle for communication and consumption as an exemplification of beauty and ugliness and as a dancer and song maker Their findings open a new avenue for empathetically understanding the ancient Maya as living human beings who experienced the world as we do through the body

**Beyond Kinship** Rosemary A. Joyce, Susan D. Gillespie, 2017-06-13 Beyond Kinship brings together ethnohistorians archaeologists and cultural anthropologists for the first time in a common discussion of the social model of house societies proposed by Claude Levi Strauss While kinship theory has been central to the study of social organization an alternative approach has emerged that of seeing the house both as a physical and symbolic structure and a principle of social organization The house stands as a model social formation that is

distinguished by its attention to a number of material domains and the dwelling ritual and nonritual objects. As the essays in this volume make clear, the focus on material culture and on place contributes to the ongoing convergence of anthropology and history and helps erase the artificial distinctions between prehistory and history. Contributions to the volume offer significant new interpretations of primary data as well as reconsidering classic ethnographic material. Beyond Kinship crosses the boundaries within anthropology not only between cultural anthropology and archaeology but between structuralist and materialist approaches and between American and British schools of anthropology; it is intended to advance the fruitful dialogue now taking place within the field.

**Yaxchilan** Carolyn E. Tate, 2013-08-28 As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America, other scholars have only a limited time to study and understand the sites before the jungle weather and human encroachment efface them again, perhaps forever. This urgency underlies *Yaxchilan: The Design of a Maya Ceremonial City*. Carolyn Tate's comprehensive catalog and analysis of all the city's extant buildings and sculptures. During a year of field work, Tate fully documented the appearance of the site as of 1987. For each sculpture and building, she records its discovery, present location, condition, measurements, and astronomical orientation and reconstructs its Long Count and Julian dates from Calendar Rounds. Line drawings and photographs provide a visual document of the art and architecture of Yaxchilan. More than mere documentation, however, the book explores the phenomenon of art within Maya society. Tate establishes a general framework of cultural practices, spiritual beliefs, and knowledge likely to have been shared by eighth-century Maya people. The process of making public art is considered in relation to other modes of aesthetic expression, such as oral tradition and ritual. This kind of analysis is new in Maya studies and offers fresh insight into the function of these magnificent cities and the powerful role public art and architecture play in establishing cultural norms in education in a semiliterate society and in developing the personal and community identities of individuals. Several chapters cover the specifics of art and iconography at Yaxchilan as a basis for examining the creation of the city in the Late Classic period. Individual sculptures are attributed to the hands of single artists and workshops, thus aiding in dating several of the monuments. The significance of headdresses, backracks, and other costume elements seen on monuments is tied to specific rituals and fashions, and influence from other sites is traced. These analyses lead to a history of the design of the city under the reigns of Shield Jaguar A.D. 681-741 and Bird Jaguar IV A.D. 752-772. In Tate's view, Yaxchilan and other Maya cities were designed as both a theater for ritual activities and a nexus of public art and social structures that were crucial in defining the self within Maya society.

**Parallel Worlds** Kerry M. Hull, Michael D. Carrasco, 2012-05-15 Despite recent developments in epigraphy, ethnoepoetics, and the literary investigation of colonial and modern materials, few studies have compared glyphic texts and historic Maya literatures. *Parallel Worlds* examines Maya writing and literary traditions from the Classic period until today, revealing remarkable continuities across time. In this volume, contributions from leading scholars in Maya literary studies examine Maya discourse from Classic period

hieroglyphic inscriptions to contemporary spoken narratives focusing on parallelism to unite the literature historically Contributors take an ethno poetic approach examining literary and verbal arts from a historical perspective acknowledging that poetic form is as important as narrative content in deciphering what these writings reveal about ancient and contemporary worldviews Encompassing a variety of literary motifs including humor folklore incantation mythology and more specific forms of parallelism such as couplets chiasms kennings and hyperbatons *Parallel Worlds* is a rich journey through Maya culture and pre Columbian literature that will be of interest to students and scholars of anthropology ethnography Latin American history epigraphy comparative literature language studies indigenous studies and mythology

Winner Association for Latin American Art Book Award 2010 The Maya of Mexico and Central America have performed ritual dances for more than two millennia Dance is still an essential component of religious experience today serving as a medium for communication with the supernatural During the Late Classic period AD 600 900 dance assumed additional importance in Maya royal courts through an association with feasting and gift exchange These performances allowed rulers to forge political alliances and demonstrate their control of trade in luxury goods The aesthetic values embodied in these performances were closely tied to Maya social structure expressing notions of gender rank and status Dance was thus not simply entertainment but was fundamental to ancient Maya notions of social religious and political identity Using an

innovative interdisciplinary approach Matthew Looper examines several types of data relevant to ancient Maya dance including hieroglyphic texts pictorial images in diverse media and architecture A series of case studies illustrates the application of various analytical methodologies and offers interpretations of the form meaning and social significance of dance performance Although the nuances of movement in Maya dances are impossible to recover Looper demonstrates that a wealth of other data survives which allows a detailed consideration of many aspects of performance To Be Like Gods thus provides the first comprehensive interpretation of the role of dance in ancient Maya society and also serves as a model for comparative research in the archaeology of performance Translating Maya Hieroglyphs Scott A.J.
